# RealQuest Professional™

THE INDUSTRY STANDARD IN PROPERTY DATA AND ANALYTICS.

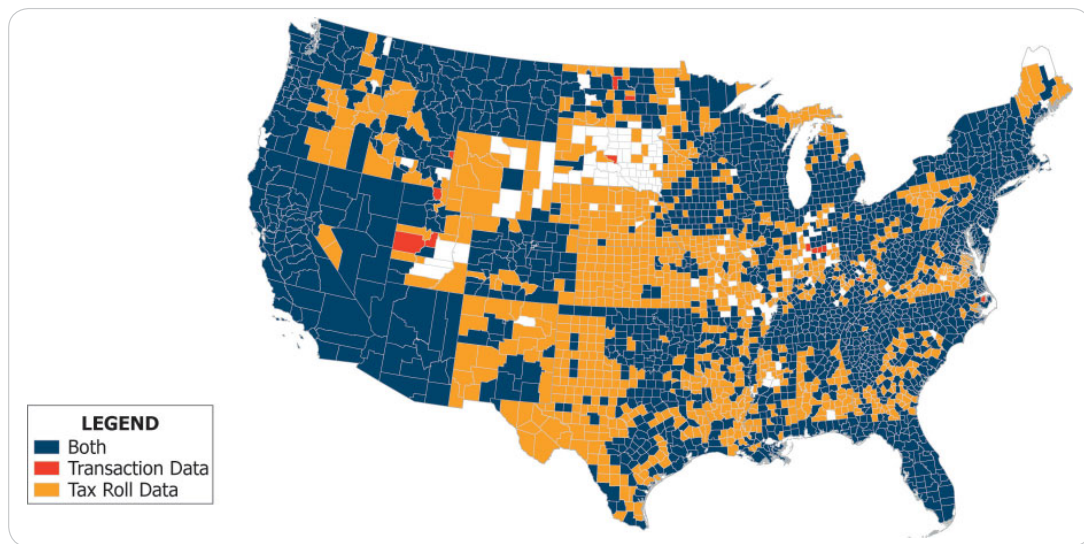

*Search the nation's broadest, deepest, and most current property and ownership database.*

*Behind its uncomplicated interface lies a real estate data powerhouse. Harness that power to streamline tasks, strengthen decisions, and gain the insight you need for peak performance. For the inside track on anything and everything related to real estate, we offer the power of RealQuest Professional.*

## Diligent Work and Rigorous Standards

### Information

RealQuest Professional draws from the nation's largest, most accurate database, covering more than 3,085 counties and representing 97 percent of all U.S. real estate transactions. Updated daily, our database is gathered from more than 10,000 government and proprietary sources. We obtain property records, tax assessments, property characteristics, and parcel maps from tax assessors and county recorders offices across the nation. This information is combined with flood, demographics, crime, maps and property visuals, document images, trending data and other information to round out a complete picture.

- 145+ million total properties, including residential, agricultural, vacant land and more
- 25 million commercial properties – including 5.7 million representing office, retail, multifamily, industrial, lodging, etc.
- 3+ billion document images
- 500+ million historical transactions
- 50+ million active mortgages
- 4.5+ million new transaction records per month

Purpose built for professional organizations requiring an all-encompassing array of reports, mapping solutions, analytics and delivery options.

# authority

## Quality

We stand alone in providing a 97 percent match rate on a unique identifying attribute – the assessor parcel number (APN). We append this unique code to transaction data for ease in querying and stratifying data. More than half a century of data collection and refinement has yielded 99.6 percent accuracy at the character level—the highest standard in the industry. With content updated daily, RealQuest Professional delivers currency, accuracy and relevance unmatched in the industry.

- Universal code standardization across all states, counties, jurisdictions
- Sophisticated analytics to match deeds, mortgage and other property transactions to tax assessor information
- Multiple owner name capture, cleanup and parsing to enhance searchability
- Field summarization to accurately capture square footage, tax rate, baths, etc.
- Value-added data overlays (e.g. phone, demographics, school, crime, flood maps)

## Technology

Drawing from the largest database of its kind ensures RealQuest Professional remains first in reliability. To safeguard business-critical data, our world-class technology center operates under tight security and applies exacting protection processes. Its mirrored database, double-redundancy architecture with automatic fail-over, and technical support provide the highest levels of protection against service interruptions.

Slash the **time** you spend  
researching and use it  
for what matters —  
whether it's **relaxing** or  
taking on **more business**.

# intelligent

## Generate detailed reports

RealQuest Professional provides flexible access to a specific property or broader market view from a single search request. Its all-encompassing array of functions and reports includes:

- Property detail
- Comparables
- Multiple mapping views
- Transaction history
- Voluntary liens
- Transaction document images
- Legal & vesting
- Neighborhood and demographic insight
- Loan lead validation tool
- Foreclosure activity
- Distressed property valuation
- Individual and cascaded automated valuation models
- Borrower-risk analytics
- Current loan-to-value ratio
- Fraud detection solutions
- Collateral-risk analytics
- Investment scoring

No other data source offers the level of detail or ease of access to the information you need to excel.

## Flexible output for easy integration

We designed RealQuest Professional to fit into your existing workflow. Our goal was to give you the simplicity of a single research tool that integrates easily with other production software, database tools, mailing label programs, and other business applications.

Case selection of all upper case or mixed case is available with many reports capable of being exported as Microsoft® Excel® spreadsheet files. Select to export some or all of the records retrieved. Search results export through .CSV files for easy importation into database and other application software. Additionally, three commonly used Avery label formats are available for click and go labels.

Information that once took hours, days and weeks to gather can now be found in seconds.

# Flexible searching. Dependable results.

## Find it faster

Whether you want to know about a specific parcel, view a targeted list of properties, or get a broader market view, RealQuest Professional makes your task fast and easy. Search by address, property type, owner name, assessor's parcel number (APN), building characteristics, sales price, or assessed value. Each option allows you to use the wild card and range searching function to expand or refine your results. Additionally, RealQuest Professional lets you dig deeply into our database by offering more than 90 custom search criteria that hone in on the exact information you're after.

## Mapping Tools You Have to See to Believe

Pinpoint an area or location on a map using the RQ Map search. This robust search tool provides a unique viewpoint for any property by combining real estate information with mapping and parcel boundary layers.

By integrating Bing™ Maps technology, RealQuest Professional gives you a clear view of the property and its surrounding area. From the aerial view, RealQuest Professional overlays the road

### Did You Know?

RealQuest Professional's owner name search empowers users to find a specific owner name across an entire state or specific county.

maps and property parcel maps, adding geography, built structures, and other details to the parcel map.

Custom Search allows you to locate multiple properties in a regional area by building your own custom search criteria in a simple four-step process. You can then export or print your retrieved property information in various report formats.

**SUBJECT SEARCH - OWNER NAME**

You have the option of changing your search page by selecting one of the buttons below. Additional search selections are available on the Custom Search page.

Address  Advanced Address  Range  Owner Name  APN

**HINT:** This search page uses an auto wild-card, matching all names that start with the portion entered.

# shed light

The next best thing to being there, the **dynamic functionality** and **clear visuals** answer questions and shed light on a property's proximity to freeways, surrounding properties, waterways and more – all with supportive area demographics such as schools, shopping and traffic patterns.

- Search maps to locate properties where an exact address is unknown, including vacant land
- Define the neighborhood of interest by custom area polygon, rectangle or radius
- Search by cross streets when you don't know the exact address
- Link directly from a map to property reports, AVMs and other analytics
- Research and build lists for notifications and other service announcements
- Filter by property type, characteristics, year built, sale price, mortgage information, ownership and more
- Choose your output; export file, mailing labels, formatted detail or reports
- View property and comparable property locations; zoom in for a bird's eye views
- Measure the acreage of an area
- Locate vacant land or properties adjacent to features such as railroad lines or interstates
- Select an area, choose from a variety of property information tags including owner name, assessor parcel number, bedrooms/bathrooms, lot area and more, then watch the information visually display on the map

Switch from road or aerial to a bird's eye view. The four direction views available provide a clear look at a property's location, condition and surroundings, and let you see comparable properties, as well.

## Bridging the Gap between a Printed Page and Real World Property Data

Expand your reach and your opportunity. Whether you are prospecting for leads, verifying property information or searching for investment opportunities, find what you need easily from the largest online property and ownership database in the nation.

Creating informative, professional reports is fast and easy with RealQuest. As the industry standard, it offers the information and visual references you need to populate your property listing and custom client reports. Easily export information and merge with your existing report templates. Access and customize county assessor's parcel maps, and copy and paste them to your property listing reports along with customized street and aerial map views. At the enterprise level, RealQuest Professional helps you expand brand awareness by personalizing the user interface and report formats with your company logo.

- Identify prospects, market to property owners and increase sales
- Extend your reach by tapping into a robust database of all publicly recorded sales
- Calculate the market value for any property
- Pierce the LLC and reveal principals behind it
- Research sales history and assessments
- Uncover all property owned by an investor
- Position yourself as the expert

### Pierce the LLC

Commercial real estate professionals, investors, attorneys, and others appreciate that RealQuest Professional Property Detail Reports include a clickable option to view the LLC principal's name. In cases where this option is not available, you can typically uncover the principals by clicking "Document Image" on the list of reports to immediately download and view the deed containing principals' names.

**Neighborhood Detail** – Research neighborhoods and produce a report with area listings and statistics including education, population, income, workforce dynamics, crime detail, nearby schools, local businesses and more.

**StreetMaps Plus Reports** – Plot subject property and comparables on a map; choose street map, aerial or bird's eye view. Overlay with parcel boundaries where available.

**Parcel maps** – Review ownership boundaries for all public and private lands. Gain access to property measurements and boundaries, including easements, with one quick search. Calculate lot area, enlarge, annotate, highlight, insert arrows and print or copy to reports and presentations.

**Flood Zone & Maps** – Knowing a property's flood zone can help assess the potential risk of financial loss. Examine flood maps with the subject property plotted and full-text legends for key flood information. Access community name, zone panel and panel date, flood zone code, and other pertinent information.

# Data + Analytics = Knowledge

## Foreclosure Reporting & Valuation

Locate distressed properties and markets through RealQuest Professional's foreclosure flags and reporting. RealQuest Professional returns foreclosure information on any property search and also lets you search for commercial and residential properties in all stages of the foreclosure process. Once located, RealQuest Professional delivers detailed reports about the most recent foreclosure-related actions. The Foreclosure Activity Report gives you a proactive view into a single or portfolio of properties. Search for and analyze reports using any number of property characteristics. Quickly access foreclosure reports, recorded documents, AVMs and subject property details for a complete situation analysis.

- Target potentially undervalued or distressed properties for investment purposes
- Establish foreclosure status for loan origination purposes
- Perform due diligence on any number of properties

With RealQuest Professional, you get much more than a database search engine. You also gain access to industry-leading analytic tools that enable you to make wise, well-informed decisions. The analytic tools available through RealQuest Professional include:

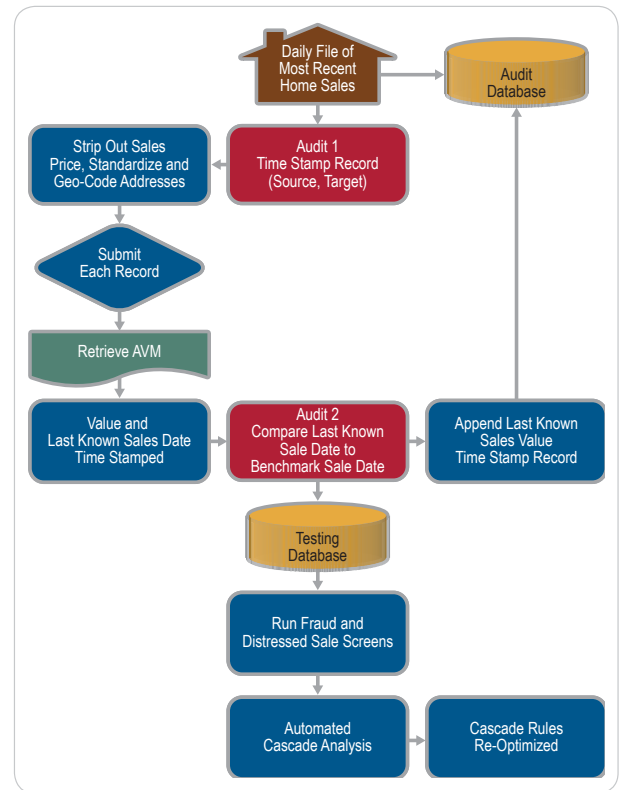

The screenshot displays a map search interface for '123 Main St Anytown CA'. A legend at the bottom left identifies foreclosure stages: Pre-Foreclosure (orange square), Auction (yellow square), REO (green square), and Short Sale (white square). A 'Tags' dropdown menu is open, showing options for 'None', 'Values', 'Owner Name', 'APN', 'Street Number', 'Bedrooms/Baths', 'Building Area', 'Lot Area', 'Sales - Last 6 Months', and 'Sales - Last 12 Months'. The map shows several properties with estimated values and status labels: '275K' (Pre-Foreclosure), '290K' (Auction), '258K' (REO), '390K' (Short Sale), and '249K' (Estimated Values). A 'Did You Know?' callout box on the right states: 'You can now use the Click and Identify feature for properties without parcel boundaries to purchase reports directly from the map.'

Identify properties or loans with pre-foreclosure and foreclosure activity and instantly view their estimated market value.

## Property Valuation Tools

**Automated Valuation Models (AVMs) and Cascades** – Not sure which AVM delivers the most accurate results? Cascade the four with a single request or bypass the cascading feature altogether by making a direct AVM selection.

- **GeoAVM™ Cascade Solutions** use the four industry-acclaimed First American CoreLogic automated valuation models. Each cascade delivers hit rate and accuracy results superior to the performance of any individual AVM. Extensive due diligence is completed quarterly on the GeoAVM cascades and as a result, the cascades are updated quarterly based on the due diligence findings. No other company offers such diverse cascade options; specifically one as superior as Precision.
- **GeoAVM™ Core** was created to deliver our strongest hit rate with high accuracy.
- **GeoAVM™ Precision** was designed with interagency guidelines in mind and offers our premier level of accuracy designed to meet the unique needs of financial institutions who intend to use an AVM in lieu of an appraisal for a funding decision.

- **Build Your Own Cascade** allows customers that must use their own or a specific third-party AVM to choose from ten valuation models to create a custom cascade and configure the selection order.
- **Additional Best-In-Class AVMs** are available to ensure our customers get the full benefit of a single source solution. In addition to First American CoreLogic AVMs, RealQuest Professional incorporates such popular AVM models as AVMax, CASA®, Home Value Explorer® (HVE®), i-Val™, ValueWizard™ and VeroValue™

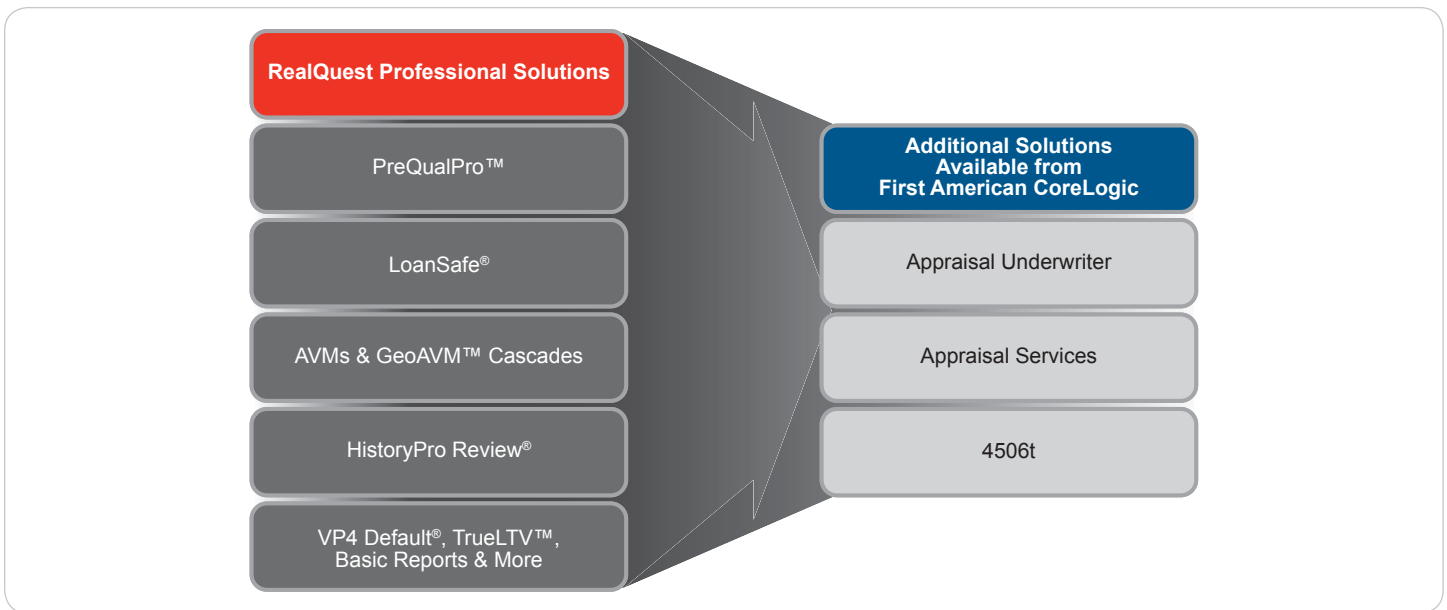

**ValuePoint® 4 Default** offers AVM ease in a hybrid model specifically designed for distressed properties. ValuePoint 4 Default automatically compensates for traditional model valuation limitations, delivering fast, affordable and consistently high reliability on properties with delinquent or defaulted mortgages.

Homes in default and foreclosure present expensive valuation challenges that compound losses. In the best scenario, a home's general condition deteriorates when the owner can no longer afford to maintain it. In the worst case, the home may be vandalized and severely damaged. Our bluePoint 4 Default AVM was specifically designed and calibrated to predict a property's distressed value, as opposed to its normal market value.

## Risk Management Solutions

First American CoreLogic provides automated tools to correctly assess collateral value and borrower and agent integrity. By using our tools early in the loan cycle, you can ensure that the right loans move on to underwriting quickly, while others containing higher levels of risk undergo further scrutiny. Our automated tools offer proven accuracy, providing a fast way to assess a potential loan's quality with minimum resource investment. Using our risk management solutions through RealQuest Professional provides you with a quick assessment of collateral, agent, and borrower risk right from your desktop.

Our powerful combination of trustworthy information with cutting-edge methodologies enables decision-makers to project, isolate, and mediate risks with unambiguous certainty—raising the potential for profits significantly.

- Assess loan quality
- Reduce risk while lowering origination costs
- Detect potential fraud
- Fast track loan approvals while minimizing default risk
- Evaluate underwriting performance

The following suite of automated mortgage risk management tools provide the most complete assessment of mortgage risk by examining a comprehensive view of property, borrower and agent characteristics.

Essential real estate data and analytics for sound decisions.

**LoanSafe®** – Assigns a loan’s overall risk by evaluating, weighting, and combining the risk levels of key contributing metrics, displaying an overall rating next to ratings for each contributing metric—with recommended actions to confirm or correct them.

Lowest Risk

**Severity:** ⊗ High 🔍 Medium ▼ Low

**LoanSafe 2.0 clearly shows a loan potential risk through vibrant colors and corresponding scores from 0 to 25. Each alert provides an easy-to-grasp explanation along with a suggested action to resolve the issue.**

The report helps identify potential risk and fraud. The report conducts an analysis of the loan, property, identity, income, borrower, and market. Each report contains a risk score ranging from 0 to 25 with 0 being the lowest risk possible.

**HistoryPro®** – Analyzes and grades the collateral risk associated with a loan transaction. When it's applied to every loan transaction, this solution weeds out questionable appraisals and streamlines the processing of loans.

▶ MARKET DATA

Average Value		Minimum Value		Maximum Value		Median Value		
\$793,299		\$631,155		\$916,201		\$767,185		
Miles	Units	Own Occ	Rent Occ	SFR	Mult 2-9	Mult 10+	Avg Rms	Avg Val

Sixteen shades of Tan-to-Green shading are used to depict value: (tan is low, green is high)

**HistoryPro Review®** – Compares the appraisal comps and subject property information against extensive internal databases, maps and collateral risk models, then renders an overall quality judgment on the appraisal and underlying transaction risk.

▶ 12 MONTH PRICE TREND

Each monthly % change in value is compared to the beginning of the 12 month period.

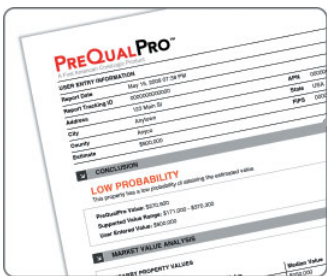

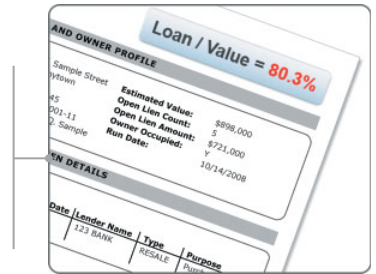

**Home Value Calibrator®** – Measures the risk that an appraisal, or other submitted value estimate of a property, may exceed the actual market value. It assists in identifying loans for further evaluation and prioritizing workflow. Calibrator combines the precision of an automated valuation model with a statistically based scoring model to deliver a score that can help identify loans with potentially inflated collateral valuations.

*First American CoreLogic is an authorized distributor of Freddie Mac's proprietary Home Value Calibrator® (HVC or Calibrator).*

Make informed and intelligent business decisions with RealQuest Professional.

**TrueLTV™** – Assesses projected loan performance and evaluates the complete impact of HELOCs and other second-mortgage liens. Use TrueLTV to get the current loan-to-value ratio by uncovering all liens on a property, even hidden ones (silents, piggybacks, borrower-initiated) and revealing their characteristics.

**PreQualPro™** – Quickly and accurately analyzes a property's collateral value against a value estimate and provides the clearest possible indication whether the input value is supported by current market sales metrics. This solution helps all parties in the origination process more efficiently manage time and cost, increase pull-through rates and effectively decrease costly fallout.

**IncomePro®** – Provides a fast, effective way to establish the soundness of a borrower's income and capacity to repay the loan.

## Investment Scoring Solution

If you're responsible for buying, managing or selling property, CoreScore™ can provide you with a day's worth of research, from multiple data sources, in seconds. CoreScore is the first real estate analytics system to identify the characteristics that make a real estate asset desirable. No other real estate analytics system brings together so many important characteristics into a well-organized, convenient report. CoreScore can give you an advantage by assisting:

- Appraisal review teams reconciling AVM, BPO, or appraisal values
- REO asset managers deciding whether to sell or rent properties
- Investors performing due diligence prior to buying properties or distressed asset pools

The easy-to-read report uses a familiar grading system and stoplight color scheme to distinguish between positive and negative outcomes. CoreScore leads to faster, better decisions that increase efficiency and reduce losses.

- Identify foreclosure activity
- Determine supply/demand dynamics
- Validate pricing strategies
- Explore rental opportunities
- Analyze net present value (NPV) and internal rate of return (IRR)
- Investigate comparable properties.

**CORESCORE ANALYSIS**

**INVESTMENT APPROACH**

## Maximize operational efficiencies using the administrative module.

Manage user profiles, account information and access—all in a cobranded online environment. RealQuest Professional's administrative module requires no capital expenditure, software installation, or extra IT resources to create a self-serve site with your logo and company information prominently on the site and RealQuest Professional reports.

The module enables the account administrator to manage user permissions, including the report permissions for all features, newly added and provisioned products. Set report permissions and quantity limits at the individual user and contracted geographic level.

Access, print and export current and historical usage metrics at the group and individual level—it's that easy.

The screenshot displays the RealQuest Professional user interface. At the top, a navigation bar includes the text "Your Logo Here" and various menu items like "Map", "Subject", "Multi Subjects", "Custom", "Foreclosure", "Doc Image", "Parcel Map", "My Preferences", "Help", and "Logout". Below this is a search bar with "Start New Search" and "Property List" options. The main area features a map search interface with a map of a residential area. A "Property Information - Report Options" window is open, showing a list of report types such as "Property Detail", "Comparables", "Street Map Plus", "Aerial Map", "Transaction History", "Voluntary Lien", "Flood Map", "Document Image", and "Most Current Transfer". A "View My Reports" button is visible at the bottom of this window. In the foreground, a "Property Detail Report" is displayed, featuring the "Your Logo Here" branding and the following information:

Display your logo and company information on the user interface, not First American's brand.

## User Preferences

In addition to having administrative site settings, users have the option to define their own preferences. My Preferences allows users to manage their account in a more efficient manner.

The screenshot shows the 'MY PREFERENCES' interface with various settings for reports, searches, and valuations. Two red callout boxes point to the 'Please review your preference options below:' tabs in the Search and Comps sections.

Additionally, users have the option to::

- Print or email a report in PDF
- Personalize emails and report cover letters with user inputted information
- Display latest recording data on reports
- Include pending sales
- Set defaults for comparables
- Define AVM preferences
- And more...

Keep in mind, from here is where you can also set your comparable, AVM and other report preferences.

Complete property, ownership and document research from a single search request.
