

Baptist Hospital of Miami

PREOPERATIVE MEDICAL EVALUATION AND CLEARANCE FOR SURGERY

Fax to (786) 596-3676 **Baptist Pre-Surgery Office** Date of Examination _____

Must be completed: ☐ 3 Days ☐ 7 Days (*major surgery*) before surgery

Patient Name _____ Age _____ Sex _____

Date of Surgery _____ Location of Surgery Baptist Hospital

Physician _____ Surgeon _____

Specialist _____ Specialist _____

Proposed Surgical Procedure _____

Indication for Surgery _____

Medical Problems ☐ None

1. _____
2. _____
3. _____
4. _____
5. _____

Cigarettes _____ Alcohol _____

Medications _____

Allergies ☐ None _____

Prior Surgery ☐ None _____

Previous Surgical Complications ☐ None _____

History of Excessive Bleeding ☐ None ☐ Patient ☐ Family

Physical Exam:

BP _____ HR _____ Ht _____ Wt _____ LMP _____

HEENT _____

Neck _____

Chest and Lungs _____

Heart _____

Abdomen _____

Extremities _____

Neuro/ Mental Status _____

Other Pertinent Findings: _____

**PREOPERATIVE MEDICAL EVALUATION
AND CLEARANCE FOR SURGERY**

Pertinent Diagnostic Data: See attached ASA Recommendations

Not Indicated	Preop Tests	Date	Results
☐	EKG	_____	_____
☐	CXR	_____	_____
☐	U/A	_____	_____
☐	CBC	_____	_____
☐	Chemistry	_____	_____
☐	PT/PTT	_____	_____
☐	Cardiac Echo	_____	_____
☐	Stress/Cath	_____	_____
☐	HgbA1C (Diabetic patients)	_____	_____
☐	SCrCl (PCN allergy)	_____	_____
Other	_____	_____	_____

Recommendations:

☐ The patient is not in optimal medical condition for the proposed surgery for the following reason(s):

☐ Delayed - Surgery should be delayed for the following reason(s):

☐ The patient is in optimal medical condition to undergo surgery at this time

Further Recommendations: _____

Instructions to patients: _____

Signature _____

MD Name _____

Specialty _____ Date _____

Healthy Patients ASA PS Class 1 & 2

- H & H w/ 3 mo for females (after onset of menses)
- Urine UCG day of surgery (after onset of menses and up to 6 mo following cessation)
- EKG within 6 months for patients age 55 and over*, or at least two or more cardiac risk factors (Hyperlipidemia, Family History, Hypertension, Smoking and/or Diabetes)
- Na, K for mild, controlled hypertension if on diuretic med

Patients with MODERATE TO SEVERE SYSTEMIC DISEASE ASA PS Class 3 & 4

These are patients with moderate to severe systemic disease that may or may not be incapacitating. In addition to those tests obtained for healthy patients, we recommend the following tests. Tests should be performed within one month unless there has been a significant change in the patient's condition to warrant new studies. Certain herbal products should be discontinued prior to surgery.

Pre-Surgery Testing Flowchart

Anesthesia Services has designed the above flowchart to provide the practitioner with recommendations for the selection of diagnostic studies for patients undergoing anesthesia. The recommendations are offered as a guideline only and are not intended to replace the practitioner's clinical judgment. Following a thorough clinical examination and review of history, the practitioner should select those tests which are medically necessary for the diagnosis and treatment of the patient and those tests that will assist with determination of the patient's capability to undergo surgery and anesthesia. For additional information or consultation, please contact: Anesthesia Services at Baptist - South Miami Hospitals

* ESRD on hemodialysis with history of stable cardiac disease requires Nephrology clearance only

** T&S for Peds and for patients who have agreed to the administration of Rhogam or Cryoprecipitate

Examples of moderate to severe systemic disease: CAD w/ angina, IDDM, morbid obesity, renal or hepatic insufficiency, COPD w/ SOB, Cardiopulmonary disease, multisystem failure

System Document approved by the Baptist-South Miami Medical Executive Committee January 19, 1998
