POST Forms Converted to Electronic Process Content Changes

POST has converted the content of POST forms used for the course certification process to an electronic format. Course presenters will use the POST Electronic Data Interchange (EDI) Course Certification Process instead of the paper forms.

The electronic format captures the content of the paper forms, with the below-listed exceptions. The “new” items collect information needed to better evaluate the certification request and, in several cases, collect needed information that POST staff currently obtains by telephone. The “deleted” items are either redundant, collected in another part of the Course Certification process, or are not applicable in the EDI process (EDI access approval replaces signature). After the Commission approves proceeding with these changes, a statement of reasons will address each change. This statement will appear on the POST website with the notice of proposed regulatory action that is required to adopt these changes.

Course Certification Request, POST 2-103 (rev. 5/00)

The "Course Administration Information" screen collects the bulk of the information collected on the Course Certification Request (CCR). This screen does not, nor was it intended to, serve as a direct replacement to the CCR. The goal of this project is to collect information from the user in a more efficient and effective manner than possible with the current paper process.
