 - Anchor is an additive property, 275
 - Anchor property, 30, 274
 - AnchorEditor.APP, 30
 - Anchoring controls, 274
 - ANSI-92 compliance, 181
 - ApplyDiffGram, 229

APRINTERS(), 121
ASCII, 147
ASELOBJ() function, 30
ASQLHANDLES(), 242
audit file, 15
AUSED(), 263-264
auto-complete table supports, 289
auto-completion, 287-288
Auto-refresh, 247
AutoCenter, 24
AutoComp.DBF, 288-289
AutoComplete property, 289
AutoCompSource, 290
AutoHideScrollbar, 293
AUTOINC, 259-260

B

Background compilation, 42-43
Background compilation and underlined code, 42
Backup HOME(7) directory, 78
Band events, 149
Band events of the ReportListener base class, 149
base class handler, 136
basing a combo or listbox on a collection, 291
BatchMode property, 237, 238
BeforeBand event, 149
BeforeBuild method, 26
BeforeDelete method, 245
BeforeRecordRefresh, 250
BeforeRender method, 159, 168
BeforeReport event, 149, 161
BeforeUpdate method, 245
BEGIN TRANSACTION, 259
Behavior changes, 267
Behavior of SELECT with buffering, 200
behaviors associated with RespectCursorCP, 229-231
behaviors associated with UseCodePage, 229-231
behaviors associated with UTF8Encoded, 229-231
Better combos and listboxes, 291
Better speed for TOP n, 198
better support for Terminal Services, 319
Bezier curve, 283
Billboards, 329
Binary index, 203, 231-214
Binary Index and Rushmore, 214
Binary values, 206
BINDEVENT(), 305
BinStringToInt, 133
BINTOC(), 265, 312-313
BINTOC() parameter values, 313
BinToInt, 133
BLANK command, 259
BLANKing data, 259
Blob, 90, 208
Blob details, 208-209
blob field not fetched, 252
Browse FRX, 126
Browse menu, 72

Browser.DBF, 66
BUILD command, 1
Build method, 1
Build process, 1-2
Build Your Release, 337
Builder behavior changes, 54
Builder property, 21
Builder system, 29
Builder table, 30
Builder.DBF, 29, 54
Builder.DBF in Wizards directory, 29
Builders and SET DELETED, 54
BuildPath, 132
By List, 51

C

Calculate new field values on the fly, 189
calculated fields scoped to detail band, 107
Cancel ADO fetch, 243
CancelReport, 152
capitalization, 28-29
Caption hidden, 285
Caption Property, 32
capture errors during GPF crash, 325
CAST(), 190, 267, 315-316
CAST() and SQL SELECT statements, 316
Cathy Pountney, 103
Chain of Responsibility error handling, 303
Chaining of listeners, 155
Chaining reports, 155
change colors in Property Sheet, 17
Changes to Options dialog, 45
changes to technique for parsing classes, 19
changes to technique for parsing forms, 19
ChangesToCursor, 229
Changing menu shortcut behavior, 76
CharsetToLocale, 133
CHECK constraints, 255
CHECK constraints and default values for all data sources, 254
Check out files, 8
Check Out Files dialog, 10-11
CheckIn method, 8
CheckOut method, 8-12
checkout process, 10-12
Chris Probst, 213
Class Browser, 6, 8, 64, 86
Class Browser is dockable, 65
Class Browser Registration table, 66
Class Designer changes, 51-52
Class hacking tool, 7
class libraries opening in the Class Browser, 15
class library, 63
class library added to title bar of dialog box, 53
Class listener, 178
class name added to title bar of dialog box, 53
Class name parameter, 8
Class/Form Designer Tab Order selection, 51
