Ring-porous woods such as Ash, Oak, Sassafras and Walnut do not print as well due to open grain. Ring-porous woods are slightly thicker. With the varying density of grain in these woods, flexible areas within the veneer will occur naturally. Printing on a dark wood, like Walnut, may cause the printing not appear as legible as compared to a lighter colored wood specie. Variance in grain pattern and thickness will occur with each wood specie.

Rush Production: We **require** a 2-3 business day turnaround per rush order, for \$25. Not including shipping time. Expedited shipping available, per quote.
