

**SCCF/YMAD
COMMUNITY GRANT
2014 Application**

“South Central Community Foundation wants to know how you can make a big change with \$small change”

SCCF has adopted the grassroots style of grant making. Grassroots grant making brings the community to the foundation and the foundation to the community. Grassroots grant making is a place-based grant making approach that focuses on strengthening and connecting resident-led organizations and their leaders in rural communities. Typically, it is aimed at strengthening the capacity of people who come together to improve their communities through projects and activities that they initiate and manage.

More often than not, funders involved in this type of grant making combine modest grants with technical assistance, training, leadership development and convening to enable grantees to become better connected with one another and other resources in the community.
