Detainees in the Special Management Unit have access to health care services.	×			Health care staff visits the SMU every day and will screen any detainee placed there.
Staff provides detainees with health services (sick call) request slips daily, upon request. • Request slips are available in languages other than English, including every language spoken by a sizeable number of the facility's detainee population. • Service-request slips are delivered in a timely fashion to the health care provider.	X			Sick call slips in English and Spanish are available in all housing units, including the SMUs.
The facility has a written plan for the delivery of 24-hour emergency health care when no medical personnel are on duty at the facility, or when immediate outside medical attention is required.	×			The Emergency Plan addresses this requirement. There is medical staff available 24 hours a day, seven days a week. All staff is trained in CPR, first aid, and in the use of the Automated External Defibrillator.
The plan includes an on-call provider.				In case of an emergency, the detainee is transported and the on-call physician is informed after-the-fact. When the case is less defined, the medical staff contacts the physician for a recommendation.
The plan includes a list of telephone numbers for local ambulance and hospital services.	\boxtimes			The emergency telephone numbers are posted in the health care unit and in central control.
The plan includes procedures for facility staff to utilize this emergency health care consistent with security and safety.	×			The medical staff and the security staff share responsibility for addressing any emergency.
Detention staff is trained to respond to health-related emergencies within a 4-minute response time.	X			Two men down drills and a mass casualty drill were conducted during the last year. Response times were under four minutes.

Where staff is used to distribute medication, a health care provider properly trains these officers.				Only health care staff administers medication. A morning medication pass was observed.				
The medical unit keeps written records of medication that is distributed.				The Medication Sheet & Administration Record is utilized to record this information.				
The Form I-819 (or IGSA equivalent) is used to notify the Warden/Facility of a detainee that has special medical needs.				The Physician's Network Association has developed a form to notify the facility of any special needs detainees.				
A signed and dated consent form is obtained from a detainee before medical treatment is administered.				A signed consent is obtained during intake. Consent is assumed for most general procedures, excluding specialized medical treatment or mental health treatment.				
Detainees use the I-813 (or IGSA equivalent) to authorize the release of confidential medical records to outside sources.	\boxtimes			A release of information is obtained prior to releasing any medical information.				
The facility health care provider is given advance notice prior to the release, transfer, or removal of a detainee.	\boxtimes			ICE notifies the center of impending transfers.				
Detainee's medical records or a copy thereof, are available and transferred with the detainee.				Most detainees are returned to their country of origin. A medical summary is sent with them. Detainees that are transferred do not have their medical records with them. The records are sent when the receiving institution requests the information. The center's health care administrator indicated the procedure is being changed, and records will be sent with all departing detainees.				
Medical records are placed in a sealed envelope or other container labeled with the detainee's name and A-number and marked "MEDICAL CONFIDENTIAL".	\boxtimes			When records are sent, they are placed in a sealed envelope and marked appropriately.

REMARKS:

The health care unit at the center is large and fully staffed with RN's and LVN's, who provide the primary medical care. Supervision of treatment is by a licensed physician and physician's assistant, who provide more specialized care. Psychiatry, dental, and on-site mental health services are available.

Upon arrival at the center, detainees are given a chest x-ray which is read within four hours. If the x-ray is positive, the detainee is housed in a positive flow room within the health care unit until a definitive diagnosis is made. While the detainee is waiting for the results of the x-ray, they receive a medical and mental health screening from a Licensed Vocational Nurse and a physical from a Registered Nurse with 14 days.

Thirty-five charts were reviewed and found to have appropriate documentation. Chest x-rays, intake screenings, and physicals were completed in compliance with the NDS. Medical grievances were reviewed, and no findings of significance were noted.

SUICIDE PREVENTION AND INTERVENTION

POLICY: ALL DETENTION STAFF WORKING WITH ICE DETAINEES WILL BE TRAINED TO RECOGNIZE SUICIDE-RISK INDICATORS. STAFF WILL HANDLE POTENTIALLY SUICIDAL INDIVIDUALS WITH SENSITIVITY, SUPERVISION, AND REFERRALS. A CLINICALLY SUICIDAL DETAINEE WILL ECEIVE PREVENTIVE SUPERVISION AND TREATMENT.

COMPONENTS	YES	No	NA	REMARKS
Every new staff member receives suicide-prevention training. Suicide-prevention training occurs during the employee orientation program.				All new staff is provided two hours of suicide prevention training during preservice training. During annual training, one hour of suicide prevention training is provided to all staff.
Training prepares staff to: Recognize potentially suicidal behavior; Refer potentially suicidal detainees, following facility procedures; and Understand and apply suicide-prevention techniques.				Staff seems to be aware of the causes of suicidal behavior and the procedures for referring detainees for appropriate follow-up.
 A health-care provider or specially trained officer screens all detainees for suicide potential as part of the admission process. Screening does not occur later than one working day after the detainee's arrival. 				A Licensed Vocational Nurse completes all mental health screenings upon arrival of the detainee. Any needing follow-up are referred to the mental health staff.
Written procedures cover when and how to refer at-risk detainees to medical staff and procedures are followed.	\boxtimes			The health care procedure manual specifies the appropriate steps to be taken for at-risk detainees.
The facility has a designated isolation room for evaluation and treatment.				Two rooms within the health care unit have been designated for detainees placed on mental health watches.
The designated isolation room does not contain any structures or smaller terms that could be used in a suicide attempt.				One of the isolation rooms is completely devoid of external structures. The other has been modified to reduce the chance of a successful suicide.
Medical staff has approved the room for this purpose.	\boxtimes			Medical staff have inspected and approved both rooms.
Staff observes and documents the status of a suicide-watch detainee at least once every 15 minutes.	×			Detainees on suicide watch are under constant supervision by an officer stationed outside of their room. A 15 minute log is maintained and signed by the officer.
