Instructions

The Business Continuity and Recovery Plan Template is intended to be used in addition to your Emergency Preparedness and Response Plan. Some key differences between these plans are:

Business Continuity and Recovery Plan

This plan is for use once life and safety are secure in response to a disaster. This plan identifies key resources and needs to ensure that business may continue, perhaps in a limited capacity, or how your nonprofit will fully recover should the disaster be catastrophic. This plan includes information such as:

- Critical assets
- Critical operations
- Key funders, donors and board members
- Alternate business location

Emergency Preparedness and Response Plan

This plan identifies and prioritizes the key hazards that may affect nonprofit operations, and outlines preparedness and mitigation activities. This plan also includes operational procedures to respond effectively and efficiently to an incident. This goal of this procedure is to ensure life and safety are secure in response to a disaster. This plan includes information such as:

- Preparedness
 - Hazard identification and assessment
 - Employee education and training
 - Drills and exercises timelines and plans for your business
 - First aid kits
 - Disaster supply kits
- Response
 - Evacuation procedures
 - Fire procedures
 - Shelter-in-place procedures
 - Staff notification
 - Information gathering procedures
 - Incident management

Continuity Planning and the Business Impact Analysis

An integral part of continuity planning involves the completion of a Business impact analysis (BIA). The BIA is an essential component of an organization's business continuance plan; it includes an exploratory component to reveal any vulnerabilities, and a planning component to develop strategies for minimizing risk. The result of analysis is a report that describes the potential risks specific to the organization studied. One of the basic assumptions behind a BIA is that every component of the organization is reliant upon the continued functioning of every other component. Some components are more crucial than others and require a greater allocation of funds in the wake of a disaster. For example, an organization may be able to continue functioning normally if the cafeteria has to close, but would come to a complete halt if the information system crashes.

As part of a disaster recovery plan, BIA is likely to identify costs linked to failures, such as loss of cash flow, replacement of equipment, salaries paid to catch up with a backlog of work, loss of funding, and so on. A BIA report quantifies the importance of business components and suggests appropriate fund allocation for measures to protect them. The possibilities of failures are likely to be assessed in terms of their impacts on safety, finances, marketing, legal compliance, and quality

assurance. Where possible, impact is expressed monetarily for purposes of comparison. For example, a business may spend three times as much on marketing in the wake of a disaster to rebuild staff and community confidence.

It is a best practice to conduct a BIA at the start of formal business continuity planning efforts. Templates, checklists and sample BIA materials have been included on your *Disaster Planning for Nonprofits Resource CD*. These resources have been provided as tools for your organization once you formally begin the continuity process at your facility.

Today's Workshop

At today's workshop, follow the easy steps and include in this template as much information as you can. Feel free to ask the facilitators questions about key concepts, or ask for tips and ideas. When you return to your office, meet with your business continuity and recovery planning team. You may be able to add more information to each of these sections. Feel free to personalize the tables to your specific needs. The more detail you add, the better your plan will help you recover from a disaster.

This plan is included on your *Disaster Planning for Nonprofits Resource CD* in an electronic format (MS Word) so that you may easily enter and update your information.

This document is also available for download at the Los Angeles County Department of Public Health Emergency Preparedness and Response Program site listed below:

Risk Assessment Matrix

Using your list of potential hazards and critical assets, you are now ready to begin to prioritize things and assess where your nonprofit is vulnerable to disruption. For each of the six categories, you will decide the level of impact each of the hazards will have on your nonprofit.

Before completing your Risk Assessment Matrix you need to understand the difference between the levels of impact. Below the levels are discussed and listed in order of escalation.

- **Negligible** – limited to no business disruptions or property damage
- **Marginal** – a hindrance that may affect business operations without shutting down, you have no minor damage, it may be an occurrence in the surrounding neighborhood
- **Critical** – temporary disruptions of business or major damage to the facility, impacts are to the community
- **Catastrophic** – a disaster that affects entire regional community causing business disruptions and forces closure of building(s). This is an event of large proportions. It can include complete destruction, multiple injuries or deaths, and a regional event which means limited or no outside resources available for prolonged periods of time.

The table on the following page will help you to determine and prioritize your nonprofit risks. General types of events are listed on the left side. There are additional spaces provided to customize for your nonprofit needs.

Begin with the first listed disaster event, earthquake. Circle the number in each asset area to score how the hazard would likely impact your business. Complete the other rows then total your numbers for both columns and rows.

As the last step, prioritize which areas should be addressed first, based on highest vulnerability, and then assign each column with your priority number 1-6.

Step 4: Critical Assets

If these items are taken away, it would drastically affect or harm your nonprofit or cause a major disruption to operations. What does your nonprofit need to operate?

PEOPLE (employees, consumers, donors, board members, clients/constituents, key volunteers, etc.)	
BUILDING (physical structure, storage unit, satellite office, main office, store front, capital lease, etc.)	
COMPUTER EQUIPMENT (computers, software, servers/network, specialty tools, copiers, etc.)	
DATA (documents, payroll, files, records, server back-up tapes, etc.)	
INVENTORY/PRODUCT (stock, supplies, new materials, etc.)	
OPERATIONS (any disruption to ops, accounts receivable/payable, payroll, mail room, etc.)	

Step 4: Critical Assets (continued)

VALUABLE CONTENTS (religious artifacts, valuable collectables, etc.)	
BOOKS AND RECORDS (vital records, payroll information, etc.)	
EQUIPMENT (HVAC, kitchen equipment, audio visual equipment, specialty tools, copiers, etc.)	
FURNITURE AND FIXTURES (office furniture, custom built furniture, auxiliary furniture, etc.)	
GROUNDS (custom decorations, outdoor equipment, signage, etc.)	
OTHER (artwork, antiques, etc.)	

Step 5: Critical Operations

Identify operations that are critical for your nonprofit’s survival. Does your nonprofit provide services crucial to the incident response? How will you continue to perform these functions in a disaster situation? What operations are necessary to fulfill legal and financial obligations? Which are necessary to maintain cash flow and reputation? What operations does your nonprofit provide to others (i.e. shelter, day care, spiritual guidance, food, etc.)? In the event of a disaster will people be congregating at your location needing assistance?

PROCEDURES TO RESTART OPERATION AFTER MINIMAL DISASTER IMPACT: If a disaster causes negligible or marginal impact on operations, these procedures will help to restart the operation in the same location.

PROCEDURES TO COMPLETELY RESTORE OPERATION AFTER SIGNIFICANT DISASTER IMPACT: If a disaster causes critical or catastrophic impact on operations, these procedures will help to restore the operation in the same location, an alternate location, or a new location.

Step 8: Information Technology Security

Data security and backup should be an ongoing process, however, it is crucial before a disaster. If you use a contractor for your IT support, they should be included in your business continuity and recovery planning. Identify the records that are essential to perform your critical functions. Vital records may include employee data, payroll, financial and insurance records, customer data, legal and lease documents. Are any impossible to re-create? Are copies stored offsite?

Step 9: Alternate/Temporary Location

Determine if it is possible to set up an alternate or temporary location if your primary site is unavailable. Would this site become your new primary site? Do you have multiple locations in which you can condense work operations? How much work can be done virtually? Does your nonprofit have options for relocation in the same park? Would a work-from-home strategy work for your organization? What pre-agreements would you need for these options?

Step 11: Key Nonprofit Contact Notification

Key Fundors/grantors, Donors, board members, clients/consumers and other key contacts should be regularly updated on operational status such open hours, orders in progress, etc. This may be done via your website, posting signs at your business, or contacting them individually.

Step 12: Continuity of Management Plan

You can assume that not every key person will be readily available or physically at the facility after an emergency. Ensure that recovery decisions can be made without undue delay. If relevant, consult your legal department regarding laws and corporate bylaws governing continuity of management.

Establish procedures for:

- Assuring the chain of command
- Maintaining lines of succession for key personnel
