CSD ASSESSMENT FORM JUSTIFICATION CODES

AC REPLACEMENT

- Existing appliance is a Health & Safety hazard
- · Lack of AC poses imminent harm to 2 occupants
- 3 ◆Appliance defect—Other (explanation required in Assessor Notes)
- Repair exceeds 50% of replacement cost and/or exceeds general maintenance cost
- Replacement parts are obsolete/not available
- Certified technician verified primary cooling source as inoperable/not repairable

ATTIC VENTILATION

- Attic NFVA or ratio inadequate/improper
- Wire mesh is dirty/not conforming

COMBUSTION APPLIANCE SAFETY

- Appliance defect—cracked heat exchanger
- Appliance defect—Other (explanation 10 required in Assessor Notes)
- ◆ Carbon monoxide at/above action level
- 12 Combustion air inadequate/improperly vented
- Draft inadequate / spillage present 13
- Flue/vent has defect/improper termination 14
- ◆Gas leak present 15
- 16 CAZ depressurization exceeds HDL
- 17 Clothes dryer moisture exhaust nonconforming
- 18 FAU return depressurizes open combustion enclosure
- 19 Return leak in furnace room not sealed
- 20 Unvented home heater present
- Kitchen exhaust nonconforming
- Nonconforming open comb. appl. in living

COOKING RANGE REPAIR/REPLACEMENT

- 23 Existing appliance is a Health & Safety hazard
- Repair exceeds 50% of replacement cost
- 25 Replacement parts are obsolete/not available
- 26 · CO hazard cannot be corrected
- 27 · Electrical hazard cannot be corrected
- · Oven door does not close properly because 28 it is sprung or otherwise damaged.
- 29 Certified technician verified as inoperable/not repairable.

COVER PLATE GASKETS

- Cover plate damaged/missing
- Aluminum wiring present in outlet/switch box (Mobile Home)

DOOR REPLACEMENT

- Catastrophic leakage provable & repair not feasible (must have photos and calculations)
- Proven by energy audit
- Building integrity issue: existing window rotten/damaged creating unsafe condition.

DUCT INSULATION

- 35 ♦ HPD/combustion air clearance inadequate
- Attachment improperly/not installed/spaced 36
- Duct is damaged/leaks 37
- Duct support missing/nonconforming 38
- Vapor barrier improperly/not installed

DUCT REPAIR & SEALING

- Connection improperly made/secured/sealed
- Duct/component/boot improperly or not sealed
- Duct support inadequate/improper/missing
- Fiberglass exposed in occupied area
- 44 Insulation not present
- 45 Register defective or hampered by sealant
- Return leak in furnace room not sealed 46

EVAPORATIVE COOLER INSTALLATION

- Existing appliance is a Health & Safety hazard.
- · Lack of unit poses imminent harm to occupants.
- Repair exceeds 50% of replacement cost

- 50 Rusted and/or leaking pan not feasible to repair
- 51 Existing unit undersized for living space being cooled
- 52 Improperly supported/secured
- 53 Inadequate/nonconforming drain system
- Improper disconnect/ dampers/ diffusers/

EVAPORATIVE COOLER REPAIR MAINTENANCE

- Belt/pulley/fan improperly positioned/adjusted
- Defective component requires R&R (explanation required in Assessor Notes)
- Electrical wiring nonconforming
- 58 Unit dirty. Needs cleaning/adjustment

EXHAUST FAN

- Fan missing/not installed (Mobile Homes only)
- Fan repair required (all housing types)
- Range hood repair required (explanation required in Assessor Notes)

FLUORESCENT TORCHIERE

62 Existing torchiere not fluorescent.

GLASS REPLACEMENT

63 Glazing compound missing/not properly tooled

HEATING SYSTEM REPAIR/REPLACEMENT

- Existing appliance is a Health & Safety hazard
- 65 · Lack of furnace poses imminent harm to occupants
- Repair exceeds 50% of replacement cost
- 67 Replacement parts are obsolete/not available
 - · CO hazard cannot be corrected.
- Cracked/damaged/defective/improperly 69 modified existing unit (explanation required in Assessor Notes)
- No existing heating source in the home
 - · Certified technician verified as inoperable/not repairable.

INSULATION (ALL TYPES)

- Coverage incomplete/nonconforming
- R-value inadequate/nonconforming

INSULATION—CEILING & KNEEWALL

- . Blocking of HPD, etc. improperly/not installed
- Other blocking improperly/not installed
- Combustion air vent obstructed
- 77 ◆ Electrical wiring/boxes improperly/not protected
- 78 Knob-and-tube requirements not met
- 79 Exhaust fan improperly/not vented outdoors

INSULATION-FLOOR

- ◆ Clearance from HPD/vent/etc. nonconforming
- ◆ Knob-and-tube safety requirements not met 81
- Feasible location/cavity not insulated 82
- Support type/spacing/attachment 83 nonconforming
- Ventilation for crawlspace nonconforming
- 85 Vapor barrier positioned improperly

INSULATION-WALL

Kneewall improperly/not insulated

MICROWAVE OVEN

- Existing unit is inoperable
- 88 No existing unit and stove is inoperable

MECHANICAL VENTILATION

Ventilation below cautionary level

MINOR ENVELOPE REPAIR

- Blower Door-identified shell leak
- CVA requires correction or increased NFVA
- Entrance door modification needed 92
- 93 Kitchen exhaust needed for Mobile Home 94 Water heater floor repair needed for Mobile Home
- 95 Chimney damper existing or non-functioning
- 96 Cover plate broken or missing
- Roof leaks or is structurally substandard

REFRIGERATOR REPLACEMENT

- 98 SIR of 1.0 or greater by audit research
- 99 Properly grounded outlet non-existing
- 100 Refrigerator inoperable
- 101 ◆Defects that compromise operating efficiency Appliance defect-explanation required in Assessor Notes
- 102 Appliance unable to maintain safe temperature (must be proven by metering results)

SHELL SEALING

- 103 Excessive leakage
- 104 Large holes in shell to big to caulk. Patch required.
- 105 Sealing of thermal bypasses required (no insulation to be installed)
- 106 Fireplace chimney damper repair or installation.

SLIDING GLASS DOOR REPLACEMENT

- 107 Catastrophic leakage provable & repair not feasible (must have photos and calculations)
- 108 Proven by energy audit

STORM WINDOWS 109 Prime window is degraded and cannot be replaced

WATER HEATER REPAIR/REPLACEMENT

- 110 ◆Existing appliance is a Health & Safety hazard or inoperable.
- 111 Repair exceeds 50% of replacement cost
- 112 Replacement parts are obsolete/not available
- 113 . CO hazard cannot be corrected.
- 114 Tank is leaking water 115 Mineral buildup significantly reduces efficiency/capacity
- 116 . Cracked/damaged/defective/improperly modified existing unit (explanation required in Assessor Notes)
- 117 No existing heating source in the home
- 118 . Certified technician verified as inoperable/not repairable.

- WINDOW REPLACEMENT 119 Catastrophic leakage provable & repair not feasible (must have photos and calculations)
- 120 Proven by energy audit 121 Building integrity issue: existing window rotten/damaged creating unsafe condition.

- WOOD BURNING STOVES 122 . Existing stove is a Health & Safety hazard
- (CO) 123 . Lack of stove poses imminent harm to occupants
- 124 Repair exceeds 30% of replacement cost 125 Replacement parts are obsolete/not available
- 126 . CO hazard cannot be corrected. 127 • Defective door. Can't repair/replace. 128 . Cracked/damaged/defective/improperly
- modified 129 . Certified technician verified as
- inoperable/not repairable. 130 Existing stove in Mobile Home not listed/approved for use in a mobile (per current HUD Code)

NOTES FOR APPLIANCE

- REPAIR/REPLACEMENT: Repairs & replacements performed under DOE for non-health and safety reasons are subject to the Energy Audit.
- Age is not a basis for appliance replacement.
- May be performed only in conjunction with weatherization services.
- Limited to dwelling's primary appliance.
- Health & Safety Appliance Repair and Replacement Policy governs programmatic
- ♦ = Hazardous Condition
