"Swimming for Life"

Start 2009 With A Double Bang! Swim the 1 Hour Postal and the FFC

**32nd Annual
2009 United States Masters Swimming
One Hour Postal
National Championship**
Sanctioned by Pacific Northwest Association
For USMS, Inc
Sanction Number 369-01

18th Annual February Fitness Challenge

Hosted by the Tualatin Hills Barracudas

This Annual event promotes fitness through swimming by encouraging swimmers to visit the pool regularly and to track their results over a monthly period.

Bob Bruce, the OMS Chair of Long Distance Swimming writes about these two National events in his Long Distance Column on page 7. You will find the Entry Blanks for both of these events in this issue of the Aqua Master. The 1 Hour Postal and The FFC (February Fitness Challenge) are great swims for all levels of swimmers whether you are mainly a Competitive swimmer or a Fitness swimmer. Do yourself a favor this year and participate in these swims. You'll be glad you did.

Chair's Corner by Jody Welborn

Come gather 'round people

Wherever you roam

And admit that the waters

Around you have grown

And accept it that soon

You'll be drenched to the bone.

If your time to you

Is worth savin'

Then you better start swimmin'

Or you'll sink like a stone

For the times they are a-changin'. Bob Dylan

This swimming year has been exciting with the Olympics and Masters Nationals. It has also been challenging, personally, economically and politically. "For the times they are a changing".

I am a physician and healthcare will be hotly debated over the next year. The population is aging and as we age chronic disease and treatment becomes a huge issue, personally and economically. As I have mentioned before, swimmers are at the forefront of what I hope is a healthcare revolution: Disease Prevention!

What is the best prevention? Exercise!

And what is the best exercise? Swimming!

With a decrease in incidence of chronic disease health care costs will naturally decrease. But more importantly, we will stay healthier and active longer.

Just 30 minutes of aerobic exercise daily will:

Reduce the risk of developing diseases such as hypertension, diabetes, heart disease and certain types of cancer.

Helps manage chronic diseases such as hypertension, diabetes and coronary artery disease.

Keeps your arteries clear by increasing good cholesterol and decreasing bad cholesterol.

Keeps extra pounds at bay.

Strengthens normal hearts and improves stamina.

Strengthens muscles and helps maintain mobility which becomes important to maintaining independence as we age.

Improves mood and decreases stress.

Decreases risk of heart attacks.

And generally people who exercise regularly live longer than people who don't.

Keep healthy. Keep exercising. Keep swimming.

and

Remember,

Swimming is for Life and Life Matters.

United States Masters Swimming Inc., is now, as it always has been, concerned for the safety and health of its members. It will continue to disseminate such information concerning swimming safety and health as comes to its attention. However, United States Masters Swimming cannot and does not accept responsibility for the content of any information or material not authorized by United States Masters Swimming Inc. All opinions stated in any such material are solely those of the author(s) and not necessarily those of United States Masters Swimming Inc. or Oregon Masters Swimming.

Aqua-Master is the official publication of Oregon Masters Swimming, Inc. 1211 SW Fifth Ave. Portland, OR 97204-3795. It is the source for meet entries and results of OMS/USMS sanctioned swim meets in Oregon. Contact Darlene Staley or Tia Sitton for membership information. A subscription is part of membership in OMS. Non-members can subscribe using the membership form and sending a check for \$12.00 payable to OMS. OMS is a Local Masters Swimming Committee (LMSC) and part of United States Masters Swimming Inc. Information is also available on line at www.swimmoregon.org

Off the Block

Doug Brockbank

Doug Brockbank, the creator and moderator of the web site 'Watering Hole', takes the dive Off the Block this month.

Turning to One Another: The Watering Hole for OMS

It's a perfect time of year to think about our community ("common unity" as the root suggests).

I don't know about you, but I feel no shortage of individual expression and freedom in our lives. What seems more rare--and therefore precious--is a deep sense of belonging. Those of us with some grey hair often look back to days of real neighborhoods, front porches, and town squares with nostalgia. For all the magic of technology and instant personal entertainment, meaningful relationships within a larger community can easily come up short.

It is in this context that we are so privileged to be part of the Oregon Masters Community. It's leadership, communication (like this newsletter), and all of the interests and activities that we have in "common" create "unity" of immeasurable value. And because technology is also a great enabler, The Watering Hole was created as way to get even more of a good thing.

For those unfamiliar with it, The Watering Hole is an online social network for Oregon Masters Swimmers. It has about 230 members and is growing daily. It's mostly a series of conversations, which is the life blood of any community. It can't replace the physical gatherings and connections that we love and need, but rather creates more of them, and makes them even better. And, it keeps us connected during the times that we are otherwise occupied with the business of life.

It can also be more. Much more. Like the fax machine, it's value grows exponentially with every new member. In addition to the 100+ videos and 300+ photos of all of you in action, The Watering Hole makes it easy to coordinate attendance at workouts, plan meets or social functions (including invites and RSVPs), share health and training resources, better prepare for competition, etc. It's newest features include the ability to do live chat, and most notably: anyone can now form private sub-groups to coordinate anything from carpools, to running the activities of a large local OMS team. A lot of this is happening already, and if the majority of OMS members were to join the network, it could take this already great community to another level.

I get particularly excited about it's ability to contribute to our emergence as a dominant force in US Masters Swimming. The better we are connected, the more motivated and informed we are, and the better we swim. I can't let go of a persistent feeling that we in OMS are already raising eyebrows in the world of Masters Swimming, yet have barely scratched the surface of what we are capable of.

Whether it's the competitive edge that excites you, or getting new ideas, coordinating activities, or simply having easier ways to connect with friends, I think you'll find The Watering Hole to be well worth your time and attention. If you haven't already, please join at:

<http://oregonmasters.ning.com>

It's free, of course, and the web software used to create it is also free (courtesy of a few google ads that I barely notice). There's plenty to read, but I invite you to contribute as well. Technical skill is not required. Just follow simple links, and be willing to experiment. You can always "delete".

Finally, a special thanks to the early founders and supporters for getting The Watering Hole off the ground: Wes Edwards, Karen Andrus-Hughes, Bert Petersen, and Dave Radcliff.

FITNESS

Skoss**

S h o u l d e r

Injury Prevention Part 1

(Presented by USA Swimming and the *Network Task Force on Injury Prevention*. April 2002)

A series of exercises for the UN-injured athlete.

Pain in the shoulder is common in swimmers. Shoulder function is highly dependent on the coordinated function of many muscle groups. These include the muscles around the shoulder, those that control the scapula or shoulder blade, muscles in the upper and lower back, as well as abdominal and pelvic muscles.

Since the shoulder is an inherently unstable joint, muscle forces are critical for maintaining stability, proper motion, and painless function. The repetitive overhead activity of the swimming stroke can result in fatigue of these muscles. This in turn can lead to distinct changes in the function of the shoulder, resulting in the pain that is commonly known as "swimmer's shoulder".

One of the major factors causing shoulder pain is overuse and subsequent fatigue of the rotator cuff muscles, scapular muscles, and muscles of the upper and lower back. Consequently, this fatigue can lead to shoulder instability and predispose a swimmer to shoulder pain. The risk of injury and pain is especially true for swimmers who swim with poor technique.

It is well established that a comprehensive program to develop strength, endurance, balance, and flexibility of the muscles is the most important way to prevent "swimmer's shoulder". The exercises described in this review were chosen to develop these characteristics based on a sound knowledge of the muscles that are most important for optimal shoulder function.

THE EXERCISES

These exercises were chosen and reviewed by a panel of physicians, therapists, biomechanists, trainers, and coaches from USA Swimming's Sports Medicine Society. These exercises have been proven to be effective in improving shoulder function for swimmers. These exercises address the three important areas:

- 1) the rotator cuff,
- 2) the muscles that stabilize the shoulder blade, and
- 3) the muscles of the low back, abdominal, and pelvis that make up the "core" of the body – the

abdominal and lower back muscles.

It is important to note that these exercises should only be performed by the uninjured athlete. Injured athletes may need to modify the exercises in duration and/ or range of motion depending on the level of pain or impairment the athlete is experiencing.

In doing these exercises, keep in mind that the shoulder does not act by itself when you swim. You use your back, trunk and even your legs to help stabilize the body and help in the pulling movement. You will use many of these same muscle groups as you perform these exercises. Also, these exercises should be performed **AFTER** practice or several hours before you practice. **DO NOT do these exercises right before your workout** since you do not want to fatigue these muscles before you swim.

Practical Tips

1. While it is beneficial to complete each of the exercises presented in this review each week, it is unlikely that the athlete will complete all of them every day, due to the amount of time it would take. If time is an issue, try the "Light Version" by alternating days with the different groups of exercises. For example, complete the three Rotator Cuff exercises on Monday, the Shoulder Blade Stabilizing exercises on Tuesday, the Core Strength exercises on Wednesday and the Stretching exercises on Thursday. Then start the cycle from the beginning.
2. While it is best not to perform these exercises before practice, we realize that for some programs this may be the only time your group is together. If this is the case, it will not hurt to complete the exercises before the water workout, but realize that in doing so the athlete may experience some degree of fatigue in the targeted muscles during practice.

Primary Rotator Cuff Exercises

The first group of exercises we want to describe is designed to strengthen the rotator cuff muscles in the shoulder. The rotator cuff is made up of four small muscles deep in your shoulder. When these muscles contract they cause the shoulder to:

1. Rotate the arm away from the body (external rotation)
2. Rotate the arm towards the body (internal rotation)
3. Lift the arm away from the body (shoulder abduction)

Exercise #1 - External Rotation

Equipment: To perform this exercise you will need a light to moderate resistance Theraband or surgical tubing. How do you determine what strength Theraband is right for you? Pull on it and if it feels like the resistance is too light – you

probably have the right level of resistance. You will be performing many repetitions so a resistance that feels too easy will probably be just right as you start to fatigue.

The Movement: The External Rotation exercise focuses on strengthening the muscles that externally rotate the shoulders. The muscles that perform this motion usually are weak in swimmers. You are going to strengthen both sides of your body in this exercise. Start by cutting the Theraband and tying it into a loop. The loop should be big enough so that your hands are 6-8 inches apart when your elbows are at your sides and your forearms are parallel to the floor.

Stand up straight with good posture. Do not hunch your shoulders forward. Lift your sternum and your chest towards the ceiling to help set your shoulder blades in the proper position. Your elbows should be at your sides and should be bent 90 degrees so your forearms are parallel to the floor and your thumbs are pointing towards the sky. Perform the exercise by trying to rotate your hands away from your body like you are pulling taffy apart. Focus on squeezing your shoulder blades together before you start this exercise. Feel this squeeze through the ENTIRE exercise. If you do not focus on squeezing the shoulder blades you will be exercising the wrong muscles.

You should take about two seconds to complete each repetition – 1 second as the muscles contract and you externally rotate the shoulders. Then take 1 second as you return to the starting position. Count 1-and-2-and, 1-and-2-and as you perform the exercise to get the correct timing. You should perform 3 sets of this exercise, resting 30 seconds between each set. Each set should end after 2 minutes or when you are no longer able to maintain correct form. It is time to end the set if:

- the shoulders start to roll forward,
- you use your upper body or wrists to help the motion or,
- you are unable to keep your shoulder blades squeezed together.

It is okay if you are only able to complete a few repetitions at first, but strive for completing 3 sets of 2 minutes. When you can do this, move up to a higher resistance Theraband.

Exercise #2 – Full Can Scaption/ Full Can Straight Arm Lifts

Equipment: You do not need equipment to perform this exercise, but as you get stronger, you can use some very light weights. You can make your own weights by filling two small water bottles with sand.

The Movement: The Full Can Scaption Exercise gets its name because performing it is like lifting a can without spilling its contents. The exercise strengthens the part of your rotator cuff that lifts the arm. Start this exercise using no weight. As you progress and get stronger you can use very light weights with this exercise, but even the strongest athletes should not

lift more than 5 extra pounds. Stand upright with your feet shoulder width apart and do not allow the shoulders to slump forward. Lift your chest towards the ceiling to help set the shoulder blades in the proper position. Focus on pinching your shoulder blades together and you should feel tension in these muscles for the entire exercise. Raise your arms so that they extend straight out to your sides. Move your hands forward about 1-2 feet so they are now slightly ahead of your shoulders to get in the proper exercise position. This will actually allow you to perform the movement in the same plane of the shoulder blade. Keep your thumbs turned up so they are facing the sky. Lower your hands to your side and then lift them up again so your hands end up level with the top of your head.

Maintain a steady cadence – Take 1 second to lift your hands to head level and one second to lower the hands back to your sides. As you raise and lower your hands, count slowly 1-up-2-up, 1-down-2-down... Remember to keep your hands and arms ahead of your shoulders and keep your shoulder blades together. Continue this exercise for 2 minutes or until you are unable to lift your arms while keeping your shoulder blades pinched together. Perform 3 sets in this way taking 30 seconds rest between each set.

Exercise #3 - Ball on the Wall

Equipment: One tennis ball or light medicine ball.

The Movement: The Ball on the Wall exercise is designed to strengthen the muscles that stabilize the shoulder blade (scapula) as well as those that internally and externally rotate the shoulder. You will need a tennis ball or a light medicine ball to perform this exercise.

Facing the wall, stand up straight with one arm extended in front of you so that your palm almost touches the wall. Keeping the elbow straight, “pin” the ball between your hand and the wall. Pinch your shoulder blades together and feel that contraction through the entire exercise. Roll the ball in small circles in a counter-clockwise motion for 15 seconds. Each circle should take about 1 second to complete. Without stopping, switch directions and make small circles in a clockwise direction.

Control the cadence so that you make one circle each second. Continue this exercise, switching between making clockwise and counter-clockwise circles, until you become fatigued, or 2 minutes, whichever comes first. You know you are fatigued if you can not keep your shoulder blades squeezed together, if you hunch your shoulders, or if you can not hold the ball against the wall. Perform 3 sets, but do not go longer than 2 minutes for each set. Repeat this procedure for the other arm.

Next month, part 2 of this article from USA Swimming – exercises for the scapula (shoulder blade).

Shake and Swim with “Bake”

Don't Let “Jet Lag” Get You Down Coach Dennis Baker

During most of my swimming years I have had a real problem with traveling back east and being able to swim to the best of my ability. Jet Lag is a real problem for many business travelers and athletes. Recently, I did some research and found some interesting and helpful tips to help with Jet Lag and they have helped me a great deal in my last couple of swim meets. I have also added a few of my own tips after trying many different methods to help remedy the fatigue of flying eastbound across many time zones. Try these helpful tips and you will be well on your way to swimming better in far away destinations. This list is in time order of how I attack Jet Lag. This list is based on giving yourself at least two days at your destination before you start to swim.

swimgraphics.com

cabin to save money. While you are stretching and walking in the back of the plane take some nice long deep breaths the air is often better back there.

- 5) Your first swim when arriving at the pool after the flight should be easy and smooth and not to far in yardage, just get wet and become familiar with the pool.
- 6) The next morning when you wake up you must eat immediately!!!! This is a big one gang. By eating early you will take a valuable step in re-setting your inner clock, so you must eat

- 1) Two weeks before the trip up your vitamin B intake for a little extra energy boost. I take B-1 and B-12.
- 2) Three days before the trip switch to whatever time zone you will be competing in. For example for my last trip to Atlanta I woke at 3:30am.
- 3) While in the airplane get up and walk and stretch whenever possible.
- 4) Regulate and watch your breathing while flying. Many of us don't like to fly that much. Your breathing tends to become short and shallow. You continue this even when you are off the plane and is a big energy drain. Many of the airlines don't pump that much oxygen into the
- even if you are not hungry. This tip helps the blood flow in your body start at the proper time each day in your new surroundings.
- 7) The second time you get in the water swim a longer aerobic set. For example 12x100's with 10 seconds rest in between. You want to feel a little aerobic burn in your body. This will help your blood flow and clean out some of the aches from the long plane trip.
- 8) From here on you can do your normal pace sets and sprinting to prepare you for your race. Do some good race pace sets and fast dive 25's to get your heart rate up. Have fun and swim great!!!

Long Distance Swimming

**Bob
Bruce**

The USMS One-Hour Swim is a great fitness event and a wonderful way you and your team to start 2009. Put your New Year's fitness resolutions into action! Intending to boost Oregon involvement in this event, I am asking for your support in getting your local team to participate fully in this year's One-Hour Swim during January.

As a coach, I have found that the national postal swims provide excellent fitness opportunities, work very well within a seasonal & overall training plan, help to learn pacing, provide unerring measurement of swimmer progress, and can (for most of you) be done in your home pool. They can serve as strong confidence-builders for timid swimmers. They are even good for sprinters, although invariably they protest. I have also found that turning postal swims into group events are great team builders, and the One-Hour Swim can provide a great team start to the new year.

We have extra, new motivation this year! As you know, USMS offers a special patch for those who participate in all five national postal championships in a calendar year. This is a serious challenge, and only about 50 swimmers in the nation meet the challenge each year (among them five Oregon swimmers last year!). To help Oregon swimmers step towards this challenge, the OMS Board has recently authorized a new participation award for completing three postal swims. Starting this year, every Oregon swimmer who completes and enters the USMS Postal Championships in the One-Hour Swim (held in January), the 5 or 10-km

Swim (held May 15-September 15), and the 3000 or 6000-yd Swim (held September 15-November 15) in a calendar year will receive this award. This requires some planning and dedication over time, so start preparing now for 2009 now by planning for the first leg—the One-Hour Swim!

The Oregon Club is nearly always in the hunt for National club honors in the One-Hour Swim. Last year, we placed third overall in the Extra-Large Club category, with 114 Oregon swimmers entering the event. The scoring is unique, as club placement is determined by total yardage. Everyone counts! I would love to see 150 or more OMS-registered swimmers participate this year, and see us vault upward in the club standings.

You may find the event information & entry form for the One-Hour Swim in this *Aqua Master* (or online at www.usms.org/longdist/ldnats09/1hentry.pdf). You may also find the all-time Oregon Records & Top Twelve for the One-Hour Swim and information about the year-long Oregon Postal Series on the OMS website at www.swimoregon.org/longdistance/.

What do we do when the One-Hour Swim is done? Let's remember that we also have the February Fitness Challenge, sponsored each year by the Tualatin Hills Barracudas. Maintain and improve your hard-earned fitness by doing the swimming and entering this event as well. The February Fitness Challenge is composed of three different challenges. You can accumulate yardage, with awards given to the top three in each age group (Note: this yardage is also eligible for the Go-the-Distance program). Or you can see how many days that you swim, with special pins for those who make 20 or more days during the month. Or you can maximize the number of people in your training group, with awards going to the top three groups. This sounds like good motivation! Find full info, entry form, and split sheet at www.barracudas.org/pool/febfitness/ffc.htm.

Organize, swim well, and have fun! Good luck and good swimming!

Editor's Note: Entry blanks for the 1 Hour Postal and the February Fitness Challenge are in this issue.

10 Reasons to do the One-Hour Swim

- | | |
|---|---|
| 10. Start your fitness year right. | 5. Make your team stronger. |
| 9. Feel confidently smug. | 4. Feel great when you're done. |
| 8. Groove your beautiful stroke. | 3. Improve your aerobic capacity. |
| 7. Earn bragging rights with your sorry lane-mates. | 2. Qualify for the Oregon & USMS Series & Awards. |
| 6. Enjoy a big dessert afterwards (or before, if you're so inclined). | 1. Because it's there. |

Candid Shots of the MAC Meet by Doug Brockbank

Swim Bits # 17 - Feet by Ralph Mohr

How flexible are you in your feet? I have been running some clinics for beginning Masters swimmers, and again and again I see poor kicking. When I look at the feet of these swimmers underwater, I notice that they do they have much flexibility in their ankles.

There is a simple test for ankle flexibility. Get out of the pool and kneel with your hands on the deck directly in front of your knees. Point your toes, preferably on a kick board if the deck surface is hard or rough. Putting your weight on your hands and toes, lift your knees off the deck.

Your legs and ankles should be at an angle more than 180 degrees. If not, you have poor ankle flexibility, and you probably do not kick very well.

How can you increase this ankle flexibility? Use fins more

during kicking. I use Churchill Boogie fins, a body surfing style, that are stiffer than most, and I do all of my kicking with them. Zoomers are good, too, as they do not bend much.

Do the stretching test above in the shower or bathtub with hot water running over your ankles, before and after practice. Massage your feet at home and stretch your toes hard past 180 degrees. Don't run a lot, as running makes the Achilles tendon tight. If you are a runner, be sure to stretch your ankles as described afterwards.

Keep in mind that if you have poor ankle flexibility, you will not change it overnight. However, using fins and stretching your ankles regularly will go a long way to make kicking, and therefore, swimming easier.

Here are my WOWs from the SW SCM Zone meet in Long Beach.

It was a great meet and I saw a lot of my California friends (and competition.)
From Allen Stark

Update on Mike and Lynne Pendleton

Many thanks to MJ Caswell for this information on Mike and Lynne and their new life in Botswana, Africa

Mike is enjoying his work, although it is not without frustration at times. He is impressed with the medical problems he sees. In his city hospital almost everyone admitted is HIV+ with various complications. The HIV rate in the country is 40%.

They lived in the house of a man who is visiting England for 4 months their first 3 months in the country. They were robbed, with a burglar taking the laptop and cell phone on the night stand while they slept. Lynne woke up and chase ensued, but the thief got away. They are now setup in a townhouse much closer to the hospital where Mike works and he is riding a bike to work. They are making friends and adjusting to a very different lifestyle - driving on the right, being expected to have a maid if you are middle class, everything being metric, it's really hot, lots of bugs, zebras by the roadside, etc.

Overall, I think they are now getting into a groove and they are going to South Africa for the weekend tomorrow and have made plans to spend Christmas at a beach in the far south. I think it takes 6 months to really adjust to a new place, and they are just over 3 months into things. Lynne will be back in the area in March for the birth of a new grand

daughter and they both will be back in July for a wedding.

Lynne has been teaching folks to swim and they are working on getting into a pool on a regular basis.

A fun paragraph from Lynn:

"We have had wonderful Northwest weather for the past week, much to the Batswana's dismay. They are freezing to death, while Mike and I are quite happy, thank you very much! It started raining Thursday a week ago and literally rained most of the following week, every day. Sure makes it hard to do laundry! I'd just get it out on the line, and the rain would start up again. Damp stuff hanging all over the house! Since then, we have had sunny, hot, and humid days, but almost every afternoon the clouds pile up and we get a storm. Last night we had a big storm that probably lasted for at least 45 minutes - almost constant lightning, various rolling thunders, and pouring rain. The thunder is interesting to listen to because it doesn't really boom the way I think it should, it is more of a rumbling, ongoing thunder. On occasion we will get a loud clap, but it sort of warns with a 'ca-crack' and then the rumbling. And then this morning it was lovely and clear at 6am, so I did the laundry, and got ready to hang it out, but by 7:30 we were surrounded by clouds and thunder again. It has settled down now, though is still cloudy, so the laundry is out on a dare!"

32nd Annual
2009 United States Masters Swimming
One Hour Postal
National Championship
 Sanctioned by Pacific Northwest Association
 For USMS, Inc
 Sanction Number 369-01

DATE: All swims must take place during January 2009.
All individual entries must be received by February 10, 2009. **NEW Late entry for relays (see FEES).**

OBJECTIVE: To swim as far as possible in one hour. The total number of yards swum determines the order of finish. If two or more swimmers complete the same distance, a tie will be declared.

VENUE: Any pool 25 yards or longer. (For events swum in meter pools, multiply the distance swum by 1.0936 and round down to the nearest five yard increment. Submit the distance in yards.)

ELIGIBILITY: Each participant must be registered for 2009 with USMS (or the equivalent organization for non-U.S. Swimmers). Foreign swimmers are not eligible for USMS records or All-American selection. ***A copy of your 2009 registration card must accompany your entry.***

INDIVIDUAL EVENTS: Men and women compete separately in age groups: 18-24, 25-29, 30-34...100+. The swimmer's age on the day he or she actually completes his/her swim will determine his or her age group. Swimmers who change age groups during January may enter twice but must swim the event twice, one time in each age group.

RELAY EVENTS: Relay events will be contested in three categories: 3 men, 3 women, or 4 mixed (2 men, 2 women). The age of the youngest relay member determines the age group of the relay: 18+, 25+, 35+, 45+ ... 95+. Each relay member **MUST** also have entered the individual event. All members of a relay must be registered with the same club. Unattached swimmers are not permitted on relays. The relay with the greatest total yardage will be declared the winner.

CLUB EVENT: Each club will be entered automatically in the club event. At least three divisions will be recognized, based on the number of individual entries from each club, as determined by the event host and the Long Distance Committee chair. Relay yards will not be included.

AWARDS: The top 10 finishers in each age group in the individual event and the top 6 relay teams in each relay age group will receive USMS Long Distance National Championship medals. First-place finishers in each individual and relay age group will also receive USMS championship patches, no more than one per event/participant. Awards

will be presented to top 3 clubs in each division of the club event.

RULES: The 2009 USMS Long Distance Rules govern these events. Drafting, flotation, and propulsive devices (pull buoys, fins, paddles, wet suits, etc.) are not permitted. Only two swimmers may share a lane, and they shall each swim on one side of the lane during the entire race (i.e. no circle swimming). An adult "Verifier," acting as a starter/head timer/counter/referee, must be present at all times during the swim. Each swimmer must have a verifier to time the event with a stop watch, count laps, and record cumulative (running) 50 splits. Split times must be recorded to the nearest second **and** tenth (or hundredth) of a second. A split sheet must be kept for each swimmer and a copy included with the entry form. Distances are to be rounded **down** to the nearest completed five yard increment (i.e., round 2764 yards to 2760). See Venue section for conversion from meters to yards. One person may serve as a counter/verifier for no more than two swimmers per heat. No adjustment may be made for swims completed at altitude.

T-SHIRTS: Athletic Grey t-shirts with various stamp images from the States. See t-shirt design at swimrna.org. Cost \$17 for USMS and \$22 for other FINA masters. We also will have caps available: lime green with Ohana Turtle \$6.

FEES: Individual entry fee is US \$6 for each individual entry; US \$10 for other FINA Masters (non-USMS). Relay fees are US \$15 per entry if received by February 10. Late relay entries will be accepted at a fee of \$25 each but must be received by February 17. All fees are non-refundable. and are payable by check or money order only—no cash. International entrants must submit US funds via international money order or bank check drawn on a bank with a U.S. affiliate.

RESULTS posted at www.usms.org by March 15, 2009.

RELAY ENTRY FORMS: To download forms, please visit <http://www.usms.org/longdist/ldnats09#postals> or send a SASE to: Ohana Swim Team, c/o Janae McCullough, 6204 43rd Ave. NW, Gig Harbor, WA 98335.

QUESTIONS: Contact event host: Ohana Swim Team 253-228-5947, ohanaswimteam@gmail.com.

Staple a copy of your USMS (or equivalent) Registration Card here.

February Fitness Challenge 2009

Host: Tualatin Hills Barracudas, Beaverton, Oregon

Purpose: To promote fitness through aquatics by encouraging participants to visit the pool regularly and to track results over a

monthly period.

Rules & Eligibility: Use of training aids and equipment **IS** permitted. You must be at least 18 years of age.

Three Challenges: We have three challenges: 1) count your yardage; 2) count your days; and 3) count the number of people in your group.

Group Participation: Group Participation Awards, please (when possible) send entries together, in one packet, to the Barracudas. Groups may consist of individuals who do either challenge. Please specify the group name and contact person. There is no additional fee.

Recording Results / Excel FFC Tracking Log and Entry Form: Beginning February 1, 2009, record on the form below: either the number of yards completed each day (for lap swim, jog-a-lap, etc.), AND/OR the number of days you visit the pool for an aquatic fitness activity (e.g. water aerobics, etc.). Check the Barracuda Web Page for a special February Fitness Challenge Excel Tracking Log and Entry Blank. (Can be downloaded as a pdf file and/or Excel file) web page:

<http://www.barracudas.org> (click on February Fitness Challenge on the Menu Bar)

PLEASE BE AS ACCURATE AS POSSIBLE!

Conversions: To convert metres to yards for yardage counting, add 10% to the metre distance to obtain the yard distance.

Monthly Totals: At month's end, add daily results to obtain monthly total.

Caution: Use caution when attempting to improve fitness level. Increases in activity should be gradual over an extended period. If you have any questions or concerns, please consult your physician.

Age Groups: 18-24, 25-29, 30-34....etc., (in five-year increments). Age is determined by your age on February 28, 2009.

Awards & Results: All participants receive final results and an achievement certificate. For the Counting Yardage Challenge, the three female and three male swimmers in each age group with the highest monthly yardage totals receive awards. For the Counting Days Challenge a special Gold FFC pin will be given to swimmers who swims 27/28 days. A Silver FFC pin will be given to swimmers who swims 20 - 26 days. Please allow at least 8 weeks after deadline for mailing of results and awards.

100,000 Award: The Barracudas will be giving a complimentary FFC pin to any swimmer who swims 100,000 yards during the Challenge.

Group Awards: The top three groups with the largest number of participants will receive special awards.

Entry Fee: \$10.00 for one individual challenge. Select either "Counting Yardage" or "Counting Days" on the form (below). If you would like to do both individual challenges, select "Both" and add \$5 to your entry fee. All fees payable to **Tualatin Hills Barracudas**.

T-Shirts & Caps: \$15.00 for short sleeve, 100% cotton T-shirts, with the 2009 Fitness Frog (front and back design this year). Custom Latex swim caps with frog logo available for \$5.00.

Entry Deadline: Entries must be RECEIVED by March 12, 2009. Late entries will not be accepted.

Entry Procedure: Send form below and fees to:

February Fitness Challenge
16055 SW Walker Road #126.
Beaverton, Oregon 97006

e-mail: dave@theradcliffs.com

web page: <http://www.barracudas.org>

International Entries: \$10.00 additional postage fee required; mail early to ensure arrival by entry deadline.

The 2009 Check Off Challenge!

Sanctioned by Florida Gold Coast Masters UMSC for USMS, Inc. # 509-001

It's time to make some waves in the pool. The new swimming season is approaching quickly so it's time to think about your fitness goals for 2009. Challenge yourself to swim all the pool events whether in practice or in meets including that dreaded 200 butterfly! This is a great way to stay focused in practice and to join in the camaraderie at the local swim meets.

PLEASE PRINT CLEARLY:

Liability Release Waiver: I, the undersigned participant, intending to be legally bound, hereby certify that I am physically fit and have not been otherwise informed by a physician. I acknowledge that I am aware of all the risks inherent in Masters Swimming (training and competition), including possible permanent disability or death, and agree to assume all of those risks. AS A CONDITION OF MY PARTICIPATION IN THE MASTERS SWIMMING PROGRAM OR ANY ACTIVITIES INCIDENT THERETO, I HEREBY WAIVE ANY AND ALL RIGHTS TO CLAIMS FOR LOSS OR DAMAGES, INCLUDING ALL CLAIMS FOR LOSS OR DAMAGES CAUSED BY THE NEGLIGENCE, ACTIVE OR PASSIVE, OF THE FOLLOWING: UNITED STATES MASTERS SWIMMING, INC., THE LOCAL MASTERS SWIMMING COMMITTEES, THE CLUBS, HOST FACILITIES, EVENT SPONSORS, EVENT COMMITTEES, OR ANY INDIVIDUALS SUPERVISING SUCH ACTIVITIES. In addition, I agree to abide by and be governed by the rules of USMS.

SIGNED: _____ DATE: _____

Please visit www.usms.org/fitness for additional entry forms, and feel free to distribute copies.

Mail this form and your check payable to "Hammerhead Aquatics" to: Larry Caldwell – Attn: "Check off Challenge" 3230 NE 15th Avenue, No. 1, Oakland Park, FL 33334.

Questions? Call Larry at (954) 682-7220 or email larrycaldwell01@msn.com

COACHES: Sign up your entire team and use the event as a team challenge. Spread out the events over a period of time during practice sessions, progressively building up to the tougher events. The entire team can work together, completing all of the events. The event is open to registered Masters swimmers. Enter by filling out the entry form above.

Entries that are received by the 15th of each month, shirts will be mailed at the end of that month. T-shirts are custom-designed by California cartoonist, Chris Aubin.
