

Request for EZ-Net Access

EZ-Net is the Internet Tool to help providers manage their HealthCare Partners patients. EZ-Net allows you and your staff to:

- **Verify** member eligibility
- **Submit** requests for authorization and **view** the status of prior referral requests
- **View** the status of claims
- **View** contact data for providers in the HealthCare Partners, IPA network

What infrastructure do you need to use it?

All you need is a computer with access to the Internet. The service is faster if the Internet service is broadband (DSL or cable modem). You can also access EZ-Net via dial-up Internet providers.

- Please use Internet Explorer only; some parts of the system do not display properly in other browsers.
- Some providers who use *America Online* (AOL) have trouble accessing EZ-Net through AOL's proprietary Internet browser. Our information services team can help you test your access to EZ-Net. Call 1-516-746-2200 and ask for the EZ-Net Support team.

To request an EZ-Net ID and Password, complete this form and return-fax it to (516) 294-9470.

Practice Name: _____ Tax ID #: _____
