2015

ASHRAE Product Directory

Consulting Engineers

Mechanical Contractors

CENTRAL FLORIDA
CHAPTER OF ASHRAE
52 YEARS OF
EXCELLENCE

2014-2015

FOREWORD

This FY 2014-2015 Directory of the Manufacturers' Representatives was prepared by the Central Florida Chapter of ASHRAE to foster better communications between all segments of the local industry.

Listings are not limited to ASHRAE members. THE DIRECTORY IS NOT ADVERTISEMENT NOR CONSTITUTES ANY ENDORSEMENT OF ANY PRODUCT OR COMPANY BY ASHRAE. The information herein was furnished by listing firms, and is edited to give as much conformity to basic information as possible. The Chapter cannot be responsible for errors or inaccuracies that might occur.

A committee consisting of ASHRAE members prepared the Directory. Firms not listed that would like to be included in future annual issues should contact one of the BOARD OF GOVERNORS listed in the proceeding pages.

IN THE BEGINNING.....

If you had been a member of ASHRAE in 1960 and wished to participate in and receive the benefits of Chapter activities, once a month around 3:30 or 4:00 in the afternoon, you would meet some like-minded friends at some convenient place, get into as few cars as possible, and head for Tampa. After a couple of years of doing that, it would get pretty old; so on the long ride back and forth you start thinking about all the people in Central Florida who are in this business and asking why can't we have a chapter in Orlando, and do them and us a favor. That's what four of the first five past presidents listed on the next page, and a few other civic-minded individuals did.

They started talking to their friends and competitors. They wrote to Society headquarters and were told that within the geographic boundaries from Ormond Beach to Vero Beach on the East Coast and from Leesburg to Lakeland on the western side of the state, there were already 50-60 known members. As a result of their efforts, a charter was granted and the Central Florida Chapter of ASHRAE started meeting in the fall of 1962, with 70 area assigned members. Due to the perennial Florida problem of retirees, they struggled to get twenty active participants; but they persisted, and thanks to their efforts and those of a lot of people who followed them, the Chapter has grown and flourished to what it is today.

Today the chapter has over 324 area assigned members and typically 50-80 people regularly attend monthly meetings.

John Simmonds (and others)

From the desk of the Chapter President,

Welcome to this year's Product Directory. I want to thank all the vendors who participated in the Directory making the Directory a valuable tool for designers, owners and contractors. The proceeds from the Directory help fund all Chapter activities which increases its value to members.

The Directory's main value is that it is a one stop source for who represent which manufacturer and the manufacturer's products. In today's every changing landscape, the Directory provides up to date vendor product lines. This combined with sales person names, phone numbers, email address, and web sites make it easier to find the correct product make/model to solve the problem at hand.

The Directory has two cross references. The first is a generic product name to manufacturer. The second is manufacturer to vendor, thus closing the loop from product to vendor. Contacting the correct vendor first saves time and money.

The Directory has a listing of Chapter Officers, Regional Officers, Chapter meeting dates/locations, local design firms and contractors. This is provided for your convenience.

And lastly the Directory provides a listing useful engineering equations. This always comes in handy and is a quick reference.

Please obtain a copy of the Directory from your vendors and I know you will find it useful on a daily basis. Feel free to put the directory on your local networks for all to use.

We hope to see you at our meetings, golf tournaments, and annual Shrimp Boil. Everybody has a good time.

Thank-you,

Nate Boyd

American Wheatley	ASME Tangential Air Separators, In-line Air Purgers, Bladder Expansion Tanks (Non-Potable and Potable applications), Chilled Water Buffer Tanks, Vertical and Horizontal Flash Tanks and ASME Expansion and Compression Tanks (Carbon Steel and Galvanized), Standard and high velocity air & dirt separators
Flow Design	Automatic (AutoFlow) and Manual (FlowSet) flow Balancing Valves, Flow Venturis, prefabricated Coil Connection packages, VersaFlow Heat Pump Hose Kits, Hydronic accessories and Pressure Independent Control Valves. Piping Packages
IslandAire	Thru-Wall Replacement Air Conditioners and Heat Pumps, Water Source Heat Pumps and Gas Fired Heating Units
John Wood Company, The	ASME Tangential Air Separators, In-line Air Purgers, Bladder Expansion Tanks (Non-Potable and Potable applications), Chilled Water Buffer Tanks, Vertical and Horizontal Flash Tanks and ASME Expansion and Compression Tanks (Carbon Steel and Galvanized)
Kinetics Noise Controls	Free-standing isolators, restrained spring isolators, seismic restraint isolators, and snubbers, seismic cable restraints, housed spring isolators, isolation hangers, thrust restraints, air mounts, fiberglass isolators, neoprene isolators, isolation bases, rooftop isolation curbs
Mueller Steam Specialty Products	Grooved and Flanged Suction Diffusers, Y-Strainers, Simplex and Duplex Basket Strainers, Double Disk Wafer type Check Valve, Silent Check Valves and Center Guided Check Valves
Patterson Pumps	HVAC pumps, Shell and Tube Heat Exchangers, Plate and Frame Heat Exchangers, Thermal Expansion Equipment, Hydronic specialties, Balancing valves, Packaged Skid mounted Variable Primary, Variable Secondary and Heat Transfer systems
Patterson Pumps Flo-Pac & Aqua Flo-Pac	Packaged booster plumbing systems, pre-engineered plumbing packages duplex & triplex systems. Aqua FloPak TDH model designed for higher pressures, variable speed packages, split base skid packages to fit thru 36" doors
South Eastern Hose	Stainless Steel Braided Connectors, Bronze Braided Connectors, Tie Rod Bellows Connectors, Expansion/Compression Compensators, Flex-Rubber Expansion Joints, Heat Pump Connectors, Heavy Duty Pipe Guides and Molded Teflon Connectors
Weksler/Dresser Instrumentation:	Adjustable Angle Thermometers (Spirit Filled), By-Metal Thermometers, Contractor Gauges, Process Gauges, Thermometer Wells, Piston Snubbers and Gauge Accessories.

Liebert Data Center & Mission Critical Cooling Systems: Liebert manufactures a complete line of Floor, Wall, & Ceiling hung Precision Air Conditioning Units for Computer Rooms and other mission critical cooling facilities that demand continuous 24x7x365 precision cooling without interruption. These Liebert Precision cooling systems are available in a variety of capacities ranging from 1 to 60 Tons in a variety of flexible heat rejection configurations that include Split System Air Cooled, Water Cooled, Chilled Water, & Glycol. Liebert also manufactures a complete line of UPS, Power, Racks, and Data Center Monitoring systems.

High Density Modular Data Center Cooling - Energy-efficient and flexible high heat density Liebert XD and Liebert DCW cooling solutions optimize data center infrastructure design. Liebert high density data center cooling solutions are available with open or closed architecture, and pumped refrigerant-based or water-based technology or water based technology.

Small Room Data Center & Network Closet Cooling - Space-saving precision system cooling available in configurations and sizes to meet the needs of electronic equipment in tight spaces. Ceiling Hung and wall hung systems are also available at 1 to 10 Tons.

Large Data Center & Mission Critical Room Cooling: Precision data center cooling and humidity control solutions provide protection in raised floor or ducted applications. A variety of models and configurations are available. Sizes range from 10 to 80 Tons per single unit.

Telecom Enclosures: Precision cooling system designed for year-round cooling of remote communications shelters.

SmartAisle - The SmartAisle offering optimizes infrastructure deployment and management with an intelligent row-based system that integrates data center racks, power, row cooling, aisle containment, monitoring and control technologies for spaces with up to 40 racks

Heat Rejection System-matched condensers, dry coolers and condensing units for continuous, proper operation of data center cooling systems.

Economizer Data Center Cooling Solutions Economizer cooling solutions including Liebert Air Economizer, GLYCOOL glycol-cooled economizer, and chiller plant economizer compatibility, can reduce data center cooling costs by up to 50%, without compromising system reliability.

Twitter- http://twitter.com/#!/luvata_Coatings

Luvata Insitu® is a water-based (solvent free) and water reducible synthetic flexible polymer coating engineered specifically for HVAC/R heat transfer coils and components. Luvata Insitu® is applied at our facilities or on-site after the units have been manufactured.

The major benefits of using Luvata Insitu® spray application process are:

- Modernized, fully licensed and permitted facilities
- Applied in our facilities or on site
- A post manufactured coil and cabinet coating application
- Applied by Luvata certified employee technicians
- Excellent corrosion and UV resistance make it suitable for costal environments
- Extend the operation life of your HVAC/R equipment
- Open mindset, passion for results and delivering on our promises

TRICOIL
www.tricoil.com

Recuperative heat recovery – similar to a heat pipe system but uses water instead of refrigerant for heat transfer.

Provides a cost effective, reliable and easily maintained method of air conditioning with enhanced dehumidification

Dedicated outside air systems (DOAS)

Recirculation air systems (any percentage of outside air)

Relief air heat recovery

Multiple zone systems

Low dew point applications (to 38 degrees F)

TRICOIL Systems can be provided as Kits comprising of all specialties for field installation including pumps, valves, control panels (DDC, LON, BACnet) and installation instructions OR prewired and pre-piped pump-packs and/or air handling unit modules from many of the major air handling unit manufacturer's.

Recent Applications include:

- 20,000 CFM system classroom building
- Seven 6,500 CFM systems for Sorority Houses
- Therapy pool facility
- Make-up air for hotel corridors/lobbies
- Indoor shooting range ventilation and air conditioning systems
- Laboratory Make-up air system
- Exhaust air heat recovery system

BALTIMORE AIR COIL
www.baltimoreaircoil.com

Factory assembled, cross flow induced draft and counter flow forced draft cooling towers. Industrial fluid coolers, and evaporative condensers. Industrial modular steel cooling towers. Modular ice on coil thermal storage units as internal or external melt systems.

COMPOSITE COOLING SOLUTIONS
www.compositcooling.com

Pultruded fiberglass structured and/or concrete structure field erected cooling towers. Hurricane resistant and Factory Mutual Approved cooling towers. Retrofit/repair or replacement of existing cooling towers.

COOLING TOWER PARTS AND
REFURBISHMENT
(All Brands)

Replacement Gear Boxes, Drive Shafts, Motors, Sheaves, Belts, Fill, Fans, Bearings and all other cooling tower materials Sold separately or installed.

GEOSTAR HEAT PUMPS
www.geostar-geo.com

Water source heat pumps.

INTERNATIONAL ENVIRONMENTAL
www.iec-okc.com

Vertical and horizontal fan coil units, modular stacked hi-rise fan coils, high performance and belt drive units

JENN FAN
www.jencofan.com

Complete line of QUICKSHIP exhaust and supply fans, gravity vents and utility blowers.

MUELLER HEAT EXCHANGERS
www.muel.com

Stainless steel plate and frame heat exchangers, brazed plate and double wall heat exchangers.

PUROFLUX
www.puroflux.com

Centrifugal solids from liquid separators, sand filters, cooling tower basin cleaning or total systems filtration, and cooling tower control panels.

SQUARE D
www.schneider-electric.us

Motor Starters, variable speed drive and disconnects

THERMACOR
www.thermacor.com

Pre-insulated piping systems for above or below ground, chilled water, hot water, steam, condensate and containment factory fabricated piping systems with available leak detection.

ALYAN PUMP CO. Simplex and duplex condensate return units, domestic booster systems, sump and sewage lift pumps

CB FIRE Multi-fuel burners, Low Emission Burners, Burner Conversions.

CLEAVER-BROOKS CO. Firetube boilers, watertube boilers, condensing boilers, boiler feed systems, boiler room energy management systems, deaerators, water softeners, dealkalizers, chemical feed systems , economizers, alternate fuel, low NOx burners, heat recovery, electric boilers – steam and hot water, boiler stacks

EMCO Vortex, turbine, electromagnetic, Doppler ultrasonic, transit time ultrasonic flow meters. Technologies for numerous applications. Including liquid, gas and steam applications in line sizes from 1/16” to over 100

FEDERAL PUMP Sump pumps, sewage lift stations, boiler feed units, condensate pumps, horizontal split case, end suction centrifugal, in-line centrifugal, pressure booster packages

FLUID POWER ENERGY, INC Thermostatic control valves for controlling liquid inlet temperature to boilers and internal combustion engines Thermostatic control valves for controlling liquid inlet temperature to boilers and internal combustion engines

HAYS CLEVELAND HVAC Control/Solutions for boiler plants

HYDROTHERM Condensing hot water boilers. NeatNet boiler room control.

PAUL MUELLER CO. Process stainless steel heat exchangers, Accu-Therm plate & frame Temp-Plate custom brazed exchangers.

RBI Gas fired boilers, water heaters and pool heaters. Hot water storage tank. Heat Net boiler room control.

RENTAL BOILERS Mobile Boiler Rooms - steam and hot water

BOILER SERVICE 24 Hour Service, Factory Authorized, Pressure Vessel Repair, Refractory,

SPIRAX/SARCO	Controls, PM Service Contracts, ASME Piping Non-electric pressure powered condensate pumps, steam traps, steam pressure regulators, strainers, humidifiers, water blender, air vents, self-contained temperature controls, vacuum breakers, pneumatic control valves, relief valves
SPIROTHERM, INC..	Air and Dirt eliminators for hydronic systems, hot and chill water.
SUSSMAN ELECTRIC BOILERS	Steam and Hot Water boilers
SHIPCO	Deaerators, condensate return units, stainless steel tanks, condensate pumps.
THERMAFLO ENGINEERING CO.	Steam fired specialty equipment. Water heaters, storage water heaters, clean steam and steam to steam generators, shell and tube heat exchangers, replacement tube bundles, steam control valves.
WILO USA LLC	Building Services pumps and pump systems for heating, air-conditioning, cooling, pressure boosting, water supply and sewage disposal. Including: circulators, inline pumps, end suction pumps, horizontal split case pumps, packaged booster systems and multistage pumps.

CENTRAL FLORIDA CHAPTER CHARTER MEMBERS

The following is a list of the charter members as recalled by some of the early charter members. Our apologies to any member overlooked in this list. Anyone having additional information on the charter year is encouraged to contact the Chapter Historian.

CHARTER MEMBERS

James A. Oberlin, *Charter President*

James Driver, *Charter Vice President*

William Vincent, *Charter Secretary*

Lloyd Bossoneault

Warren Chase, PE

Robert Collie

William C. Denson, PE

James L. Gay, PE

James Grinnan

Kenneth Hayes

Hugh Martin

William Penn

Edmund P. Senk

CENTRAL FLORIDA CHAPTER - PAST PRESIDENTS

PRESIDENT	YEAR
James A. Oberlin	1962-63
James A. Driver	1963-64
Warren L. Chase	1964-65
Kenneth E. Hayes	1965-66
Lloyd H. Boissoneault	1966-67
William C. Denson, PE	1967-68
Maynard D. Reese	1968-69
William R. Penn	1969-70
Theodore H. Brooks	1970-71
J. Wesley Floreth	1971-72
Wiley M. Cauthen	1972-73
Edwin C. Pratt	1973-74
Lyle M. Houser, Jr., PE	1974-75

Jason Aphonso, PE	2010-11
John Miller, PE	2011-12
Megan Tosh, PE	2012-13
Anik Patel	2013-14

OBJECTS OF ASHRAE

The object of the Society is to advance the arts and sciences of Heating, Refrigerating, and Air - Conditioning, and the allied arts and sciences, for the benefit of the general public by:

1. Stimulating technological progress for the good of mankind.
2. Maintaining a high professional standing among its members.
3. Encouraging the continuing education and professional advancement of its members.
4. Providing educational opportunities through its publications, research, seminars, chapter scholarships and national, chapter and regional meetings.
5. Conducting a program of basic and applied research through grants -in-aid to colleges and laboratories.
6. Developing codes and standards and by co-operating with other organizations in development of standards.
7. Encouraging fellowship among engineers and industry leaders.

THE ADVANTAGES OF MEMBERSHIP

1. You are kept informed of new developments of technical and professional interest.
2. You receive, regularly, as a part of the services available to you for payment of dues...
 - (a) ASHRAE JOURNAL, the Society's monthly publication and the most authoritative periodical on research, design, development, engineering and news in our fields; plus...
 - (b) ASHRAE HANDBOOK & PRODUCTS DIRECTORY, a three volume series constituting a complete reference of current data in Heating, Refrigeration, Air Conditioning and Ventilating. Each year, a member receives a new volume on Applications, Equipment or Systems. The cycle continues every three years.
 - (c) Plus...ASHRAE HANDBOOK OF FUNDAMENTALS, invaluable to the Society members, to the industry, and to the students and teachers as a basic reference in theory, terminology and general engineering data.
 - (d) You may purchase, at a nominal cost, all other ASHRAE Publications such as TRANSACTIONS, our annual compilation of technical papers and discussions, presented at national meetings of the Society; ENGINEERING STANDARDS RESEARCH REPORTS, SYMPOSIUM BULLETINS, RE-PRINTS OF TECHNICAL PAPERS.
3. Provided you meet the particular requirements, you are eligible for membership on any of the Society's administrative or general committees or on the 60 technical committees and nine task groups, which direct ASHRAE's Research and Technical activities.
4. You have access to and may borrow from the Engineering Society's Library, the world's largest engineering library.

5. Most important of all, you have the opportunity to help yourself, your industry, and your profession, by expanding your own knowledge and helping to support the valuable work of ASHRAE.

BASIC EQUATIONS

Air

$Q \text{ sensible (BTH)} = \text{CFM} \times 1.1 \times \Delta T \text{ (}^\circ\text{F)}$, moist air, for dry air use 1.08

$Q \text{ total (BTH)} = \text{CFM} \times 4.5 \times \Delta h$, $4.5 = .075 \text{ \#/cf} \times 60 \text{ min/hr}$

$Q \text{ latent (BTU)} = \text{CFM} \times 4840 \times (w_1 - w_2) \text{ gr/gr}$; $= \text{CFM} \times .68 \times (w_1 - w_2) \text{ \#/}$

$h(\text{wb}) = 10.12924 + .000357914 (\text{wb})^{2.6213}$

$\text{MAT} = (\% \text{ OA} \times \text{OAT}) + (\% \text{ RA} \times \text{RAT})$

$\text{Velocity pressure} = (V/4005)^2$

$\% \text{ outside air} = (\text{MAT} - \text{RAT}) / (\text{RAT} - \text{OAT})$

MAT – mixed air temp, RAT – return air temp, OAT – outside air temp

OA – CFM outside air, RA – CFM return air

Air Handling Unit

$\text{BHP} = (\text{CFM} \times \text{SP}) / (6356 \times \text{eff})$ SP in-wg

$\text{BHP} = (\text{RLA} - .5 \times \text{NLA}) / (\text{FLA} - .5 \times \text{NLA}) \times \text{HP}(\text{nameplate})$

NLA – no load amps, RLA – run load amps, FLA – full load amps

$\text{Mech Eff} = (\text{TP} \times \text{CFM}) / (6356 \times \text{BHP})$ (Air HP)/(Shaft HP)

$\text{Static Eff} = (\text{SP} \times \text{CFM}) / (6356 \times \text{BHP})$

$T_{\text{LDB}} = T_{\text{EDB}} - (\text{SHC} / (1.1 \times \text{CFM}))$, T_{LDB} = temp leaving coil, T_{EDB} = temp entering

$h_{\text{L}} = h_{\text{E}} - (\text{THC} / (4.5 \times \text{CFM}))$, h_{L} = enthalpy leaving, h_{E} = temp entering,

THC = total cooling capacity MBH

$\text{CFM}_a = \text{CFM}_b \times (\text{RPM}_a / \text{RPM}_b)$

$\text{CFM}_a = \text{CFM}_b (\text{SP}_a / \text{SP}_b)^{1/2}$

$\text{SP}_a = \text{SP}_b \times (\text{CFM}_a / \text{CFM}_b)^2$

$\text{SP}_a = \text{SP}_b \times (\text{RPM}_a / \text{RPM}_b)^2$

$\text{HP}_a = \text{HP}_b \times (\text{RPM}_a / \text{RPM}_b)^3$

$\text{Temp rise (}^\circ\text{F)} = .413 \times \text{SP}$ (in-wc, ISP+ESP)/net fan efficiency (say 55% to 75% assumes fan motor is in air stream, efficiency = 100% if motor is not in air stream)

Pump

$\text{BHP} = (\text{GPM} \times \text{TDH}) / (3962 \times \text{eff})$

$\text{GPM}_a = \text{GPM}_b \times (\text{RPM}_a / \text{RPM}_b)$

$\text{HEAD}_a = \text{HEAD}_b \times (\text{RPM}_a / \text{RPM}_b)^2$

$\text{BHP}_a = \text{BHP}_b \times (\text{RPM}_a / \text{RPM}_b)^3$

Water

$H_v \text{ (ft)} = (V_o^2 - V_i^2) / (2 \times g)$; V_o – outlet velocity in fps : V_i – inlet velocity in fps

$V = .408 \times \text{GPM} / (D^2)$

$\text{BTU/Hr} = \text{GPM} \times 500 \times \Delta T$

$500 = 8.33 \text{ \#/gal} \times 60 \text{ min/hr}$

$\text{GPM} = C_v \sqrt{\Delta P}$ (ΔP in PSI)

$\text{TONS} = \text{GPM} \times \Delta T / 24$

Refrigeration

$\text{HP/ton} = 4.71 / \text{COP}$

Energy

$\text{KW/ton} = 12 / \text{EER}$

$\text{KW/ton} = 12 / (\text{COP} \times 3.413)$

$\text{KW} = \text{VOLTS} \times \text{AMPS} \times \text{PF} \times \sqrt{(\text{PHASE})} / 1000$

Water Coils

$\Delta T(\text{air}) = 927 \times \text{MBH}(\text{coil}) / \text{CFM}$

$\Delta T(\text{water}) = 2.04 \times \text{MBH}(\text{coil}) / \text{GPM}$
