Statement of Nondiscrimination and Affirmative Action

The Community College of Rhode Island does not discriminate on the basis of race, color, creed, national or ethnic origin, gender, religion, disability, age, sexual orientation, gender identity or expression, or status as a veteran.

Individuals who are interested in attending CCRI events but require special accommodations because of a disability should contact the Director of Affirmative Action at 401-455-6011 at least one week before the event. CCRI campuses are accessible to handicapped students. Questions regarding handicapped access and evacuation procedures should be directed to the security offices in Lincoln at 401-333-7035, in Warwick at 401-825-2109, in Providence at 401-455-6050 and in Newport at 401-851-1600.

A message from President Ray Di Pasquale

We all know the state of the economy has changed greatly within the past year. There is no question that times are tough, but the Community College of Rhode Island and its graduates are doing their parts to help our economy. CCRI prides itself on preparing its students for success in the work force or continuing their education.

We offer more than 80 degree and certificate programs in nine major areas of study – the arts, business, computer studies, engineering, general studies, health sciences, human services, liberal arts and science. Each semester more than 16,800 students come to CCRI to change their lives and achieve their dreams. Some come with the intention of graduating; others with the intention of transferring; and still others come to CCRI to continue their journey of lifelong learning. CCRI's dedicated faculty and staff are here to help all students obtain their goals.

As of May 2007, more than 53,000 degrees and certificates have been awarded since the college's first graduation in 1966, and most graduates still live and work in Rhode Island. Each year more than 1,200 Rhode Islanders graduate from CCRI, so it is with a great sense of pride that I share with you the accomplishments of the graduates of the Class of 2007.

Of the 1,320 who graduated in 2007, 79.4 percent responded to the survey; 92.3 percent report being employed, continuing their education or a combination of both; 29.4 percent indicated they were attending school full time and another 6.5 percent were going to school part time. Additionally, many students transfer before completing a degree at CCRI. In 2007, 1,006 students transferred to the University of Rhode Island and Rhode Island College. Many others transferred to colleges and universities across the country.

Established in 1964 to give all Rhode Islanders an opportunity to achieve their educational goals, CCRI remains committed to helping every student succeed. The community college serves recent high school graduates, older adults looking for a new career and businesses providing additional training to their employees so they can stay competitive in a global economy. This report presents an overview of their successes and exemplifies the endless possibilities made possible by a CCRI education.

A handwritten signature in black ink that reads "Ray Di Pasquale". The signature is fluid and cursive, with the first name "Ray" being particularly prominent.

Survey of the Class of 2007

Total Graduates Employed, Continuing their Education or a Combination of Both	967	92.3%
Total Graduates for 2006-2007	1,320	

About this report...

Since the *Career Placement and Graduate Transfer Report* is based on a self-report survey, some caution in interpretation is suggested. In reviewing the information, please be advised that average salaries, based on a 40-hour week, are reported only for education-related employment and may show an unexpectedly broad range due to data collected from graduates in entry-level positions and professionally employed graduates who attended CCRI for further professional development.

The overall results from this year's survey again validate, as have all reports since 1985, CCRI's success in preparing graduates for further education as well as for jobs in the Rhode Island economy.

Where did our graduates go?

Graduates who decided to continue their education full time chose universities and colleges located in the following states:

State of Higher Education														
Program	AR	CT	FL	LA	MA	MD	NH	NJ	PA	RI	VA	VT	Not Rep.	Total

The true measure of CCRI's success ...

Cristian Potter

Cristian Potter of Providence has overcome several life struggles on his journey to accomplish his goals. He lost his mother to an aneurism and his sister to cancer when he was 21. To overcome depression and substance abuse, Potter drew strength from one of his last conversations with his sister.

"She told me she wanted me to try and live the best life I could live. ... She told me that she knew I could do great things and that was all she wanted me to do," said Potter.

Then he began caring for his father, who has a degenerative brain disorder, and his younger brother while working full time and attending classes. Despite these many obligations, he also scheduled frequent visits with his wife, who is doing her residency in North Carolina, and his children, who live in Washington, D.C. He finished his general studies program at CCRI with a 4.0 GPA and is attending Brown University, where he is studying mathematics on a full scholarship.

Chosen as student speaker at his CCRI commencement, Potter spoke about opportunity as the way to a better life. "It's easy to say it's too hard or I don't have the time or I can't afford it," he said. "If you are willing to work hard, and you seek opportunity, good things will happen to you. A wise man told me recently that good luck is the residue of hard work." Potter continued, "CCRI, specifically, and community colleges, generally, are the most American of all places. This is where one can come and get professional and technical training to become or continue to be competitive in today's dynamic job market."

Renée Coletta

As a CCRI student, Renée Coletta of Cranston had to bring home her grades to four judges who had to approve of her work – her children, David Scott, Kathleen, Francis and John Paul.

"I had to answer to them when I had a test just as much as they have to answer to me about their grades," said the single mother who graduated with an associate degree in special education. A member of Phi Theta Kappa, the international honor society of two-year colleges, and Psi Beta, the psychology honor society, Coletta earned a 3.84 GPA.

"There were plenty of times I said, 'I can't do this. I just won't do this anymore,'" she said. "But going back to school has allowed me to set a good example for my children."

Coletta, 39, wanted to go back to school to support her family and she believed she needed a degree to launch a stable career. In addition to her CCRI studies, Coletta took psychology courses at Rhode Island College, where she is now two classes shy of completing her bachelor's degree. Coletta works in development at St. Patrick's School in Providence and also serves as a teacher's

assistant. Her ultimate goal is to earn a master's in teaching or psychology and to continue her career of working with children.

Outside of the classroom Coletta is just as busy as a volunteer for the Rhode Island Coalition of Domestic Violence and SOAR (Sisters Overcoming Abusive Relationships), working on events and advocacy projects. She also coaches basketball and volleyball teams for the Catholic Youth League.

Juggling a full-time job, her parental responsibilities, school and volunteer work was challenging for Coletta. But the support of her family and CCRI faculty and staff helped her reach her goals.

The true measure of CCRI's success ...

Jacqueline Foshey

Jacqueline Foshey of Johnston considered herself lucky to be a stay-at-home mother while she raised her three children. But when her marriage ended after 18 years, she knew she needed a plan to get back on her feet.

"After I got divorced, I realized I could not support myself," she said. "I needed a career."

She was always interested in health care and a distant cousin was involved in radiography and enjoyed it. Foshey wanted to learn more about it, but was nervous about returning to school. She met with CCRI advisers several times before she decided to go for it.

"I thought I was too old. I didn't think my brain would work," she said with a laugh. "I hemmed and hawed for about a year. I can't tell you how nervous I was."

She began taking classes in 2003, but there was a two-year wait for the radiography program. "I wasn't sure if I could wait," she said. "I made the decision that I really wanted to do the program. I was going to be 45 either way, whether I waited or not." Her patience paid off.

"It's a very hard, very intense program, but so worth it," she said. "The teachers are all very available. They gave us their home numbers to call if we had any problems: in class, in clinicals, at home, whatever."

She needn't have worried about her brain power. She graduated from CCRI with a 4.0 GPA.

"I can't believe it," she said of her grade point average. "When I took my first test, I thought I flunked and would have to drop out of the program, but then I got it back and I got a 94. I just kept telling myself that I got a 94 and I can get another 94."

Foshey was at the top of her class, elected president of the Radiography Club, led her patient care class in a service learning project and joined Phi Theta Kappa, CCRI's international honor society.

"I was cracking my kids up," she said of her new academic persona. She has one son in college and another who just completed his service in the U.S. Navy. She hopes that her 19-year old daughter, a certified nursing assistant, learned the importance of being independent by watching her. "It never had dawned on me that I should be able to take care of myself," she said. "I tell her that she needs to be able to be independent."

Foshey worked in a nail salon to support herself while in school. She got a job as a tech aide at Our Lady of Fatima Hospital to gain experience, and it helped her get her first post-graduation job at Rhode Island Medical Imaging. After starting her new job, she continued her education and earned her mammography certificate at Rhode Island Imaging, where she is now a mammographer. "I always knew I wanted to go into mammography so I could help even more people with this important screening," she said. It's a topic that hits close to home because her grandmother had breast cancer.

"I love to put a smile on people's faces who you would think would never smile in a million years. I like to alleviate their fears," she said. "I also like that I get to be part of the doctor's diagnosis and to know that I helped in that process."

Beyond professional development, her time at CCRI offered her something else.

"Before, I was kind of dependent. Now I'm a lot more confident. I know I can do it if I try. I'm amazed I did it," she said. "I highly recommend CCRI. It gave me a life."

Meeting expectations

CCRI's primary mission is to help students succeed in reaching their educational goals by preparing them to enter the work force or transfer to a four-year college or university. Each year the college attempts to measure its success in this regard by surveying the previous year's graduates.

This year the 1,320 members of the Class of 2007 were asked to provide information about place of employment, job title, salary* and status of continuing education. Of those, 1,048, or 79.4 percent, responded to the survey. The results indicate that, overwhelmingly, CCRI graduates succeeded in reaching their educational goals. In fact, when asked how they would rate the quality of their CCRI education, 98.2 percent indicated they felt the level of education they received was excellent, very good or good.

Additionally, more than 92 percent reported that they were employed, continuing their education or a combination of both. A total of 557 graduates reported that they are working full time, with another 347 employed on a part-time basis (245 of those working part time are also continuing their education. Eighty-three percent of graduates working either full- or part-time are employed in Rhode Island.)

Also, 308 graduates are attending school full time; 88 percent of those are continuing their education in Rhode Island (32.6 percent are attending Rhode Island College and 23.4 percent are studying at the University of Rhode Island.) Members of the Class of 2007 transferred to more than 44 colleges and universities.

** Range and average salaries reported by employed graduates may vary from year to year based on salary levels that may have existed prior to obtaining the degree or certificate.*

2007

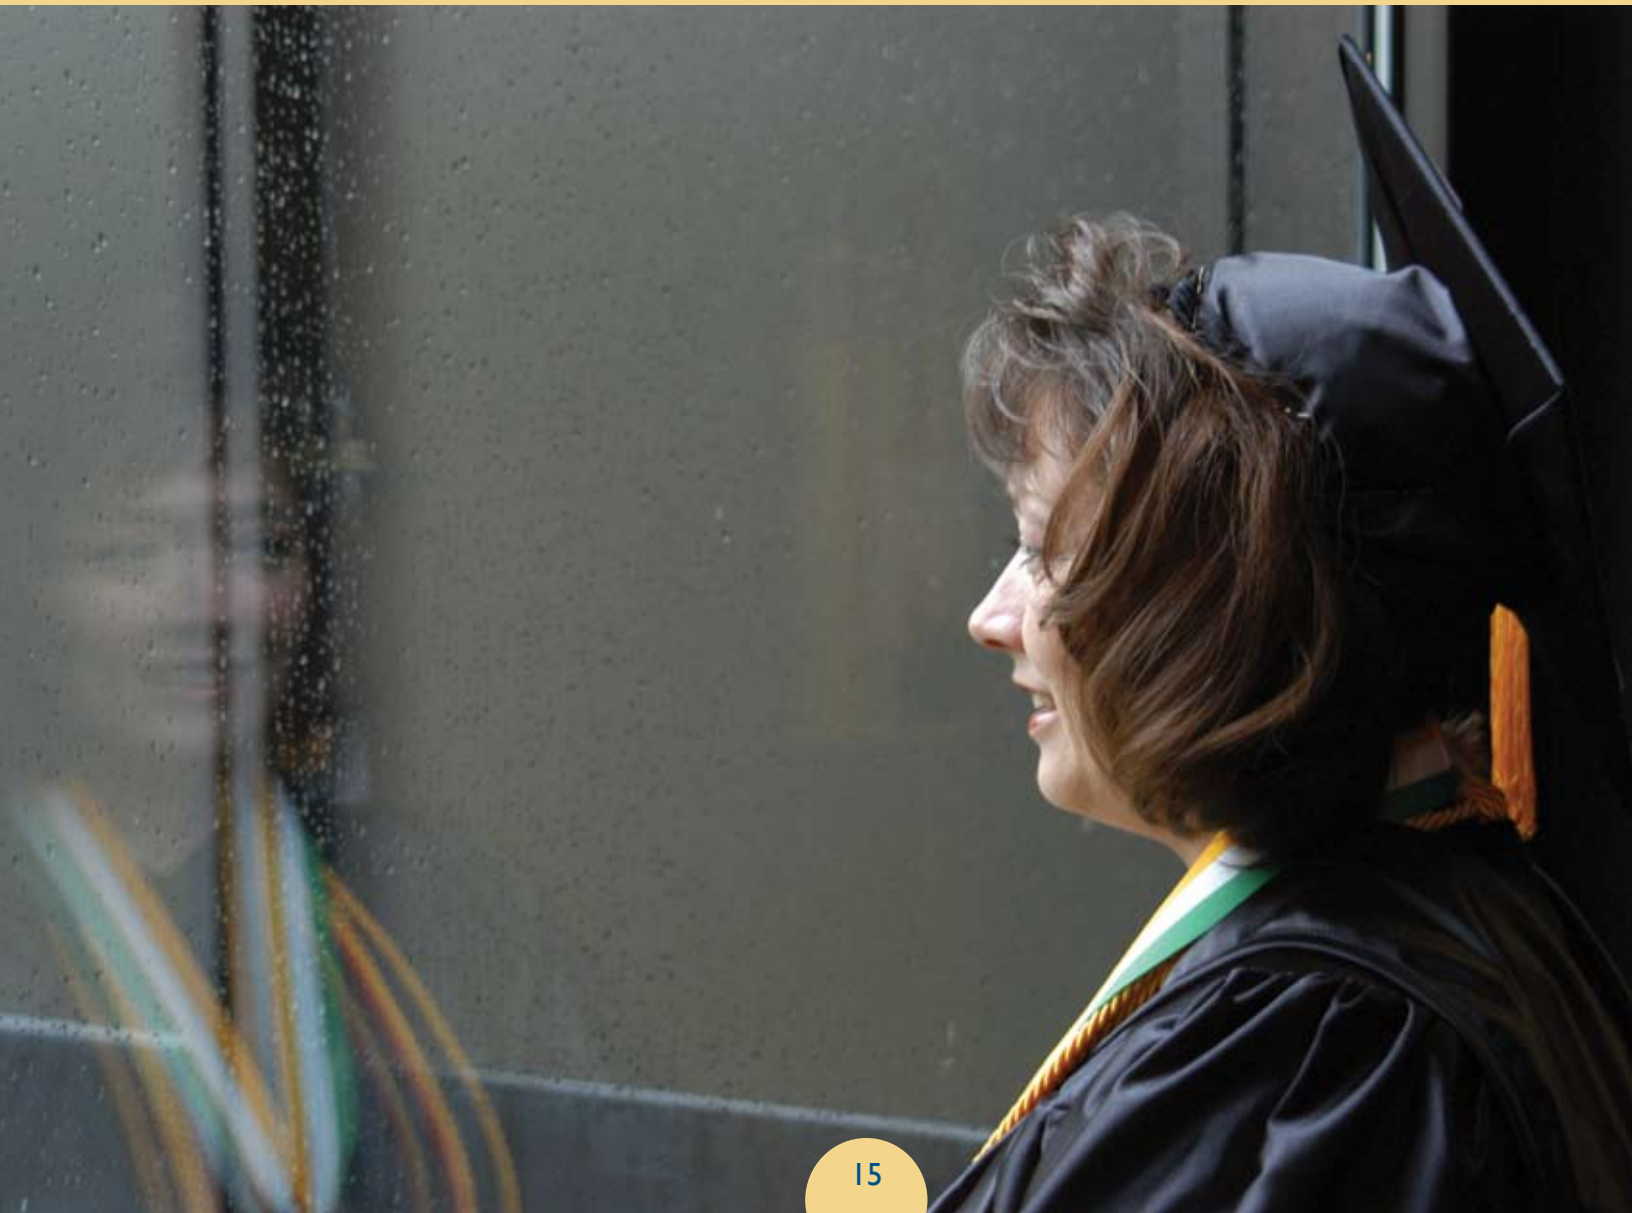

The Administrative Office Technology programs emphasize a variety of computer tasks created by new technologies as well as traditional office tasks. With the shift of work responsibility from middle management, the role of the office professional has become critical. Program degree options include administrative assistant/secretary, legal administrative assistant/secretary and medical administrative assistant/secretary. In addition, the department also offers a number of certificates including Travel, Tourism and Hospitality, Medical Coding, Basic Office Skills and others.

The Biotechnology certificate program offers hands-on, competency-based instruction designed to retrain individuals with previous workplace and/or educational experience and prepare them for entry-level positions in the biomanufacturing industry. Work-related concepts and skills are acquired in the biology, chemical technology and process control/ instrumentation courses required for completion of the certificate program. The program provides students with the necessary theoretical scientific background, while emphasizing practical applications of this knowledge. In the laboratory, students are trained in the actual techniques employed in the industry.

The Business Administration program offers students a solid academic background in business as well as specialized training in a variety of areas. The goal of all business programs is to provide students with the opportunity to develop their communication, interpersonal, leadership, critical thinking and teamwork skills. Business Administration students receive a solid foundation in the concentration of their choice. They may choose from the following degree programs – accounting, marketing, management, financial services and general business – or decide to earn a certificate in accounting, marketing, management, financial services or entrepreneurship.

2007

The chemical industry is one of the fastest growing industries in the United States. Its need for trained technicians in quality control, analysis, and research and development laboratories is extensive. The Chemical Technology program prepares graduates to enter the chemical field in any one of a variety of capacities: chemical research technician, laboratory assistant, chemical production technician, junior chemist or analytical technician. The program is structured to develop a fundamental understanding of general, organic and analytical chemistry, with emphasis on laboratory applications and techniques. Graduates from the program find employment in areas ranging from aerospace and biochemistry to pollution control and zinc metallurgy.

Furthermore, the program provides its graduates with an open ended career in science by transferring to most colleges and universities equivalent to the first two years of a traditional chemistry program.

Clinical Laboratory Technology

2007

Clinical laboratory technicians (CLTs) perform general tests in all medical laboratory areas, searching for clues to the absence, presence, extent and causes of diseases. The CLT program is a two-year program that includes clinical training. Upon successful completion, students are eligible to take a national certification examination to become licensed by the state of Rhode Island. Graduates work in a variety of settings, including hospitals, for-profit laboratories, clinics, nursing homes, public health facilities, research, sales, business and industry, and commercial laboratories.

2007

The Computer and Networking Technology program prepares students for entry-level technical positions in computer and networking systems administration, installation and maintenance. This program provides balanced coverage of technological fundamentals, computer hardware and software, and networking technology. Emphasis is placed on operating principles of hardware and software, networking models, operating systems, internetworking components, industry standards and hands-on laboratory activities for developing practical, problem-solving skills.

Students develop the ability to configure and troubleshoot basic PCs, local area networks (LANs) and internetworks using routers and switches. Integrated into the program are courses that prepare students for both the CISCO CCNA examination and CompTIA A+ certification.

2007

In response to the impact of computer technology on communications and industry, CCRI offers various degree and certificate programs through the Department of Computer Studies and Information Processing. Several Associate in Science (A.S.) degree programs are offered.

Computer Programming prepares students to enter a modern programming environment. This program stresses problem definition and solution design using different programming languages in the development of applications. Concentrations in this program include Computer Programming, Computer Science (RIC Track) and Computer Science (URI Track).

Degrees in General Microcomputing, IT Support Specialist, Networking, Web Programming and Web Site Development also are offered. They prepare students to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. Depending on the selection of courses, this program could prepare an individual to be employed in computer user support services.

The following certificate programs are offered at CCRI: Computer Programming, General Microcomputing, IT Support Specialist, Networking, Web Site Development, Web Programming and Office Automation. Certificate programs emphasize technical course work only and do not require students to take electives that are required in the associate degree options.

2007

The Legal Studies program is designed to provide students with the academic courses and specialized training required for a law enforcement career or a paralegal position. The program meets the requirements established by many police departments that mandate 60 hours of college course work in law enforcement for new hires. The Legal Studies program prepares students to become paralegals for the legal profession and the business community.

2007

The CCRI Dental Assisting program is a one-year program accredited by the American Dental Association's Commission on Dental Accreditation. The majority of dental assistants are employed by general dentists, providing chair-side assistance. Additionally, some are employed in specialty practices such as orthodontics and oral surgery.

This course of study prepares students for the certification examination given by the Dental Assisting National Board, Inc.

1	Rhode Island College	Music

2007

CCRI offers the Associate in Fine Arts degree in Art, Jazz Studies, Music and Theater. These programs serve both students transferring to a four-year college or professional school and students who wish to pursue a career. They provide hands-on experience in the first two years of higher education, a strong foundation in the humanities and exposure to interdisciplinary study. CCRI's Jazz Studies program, the first collegiate degree program of its kind in the state, has been offered since 1985 and the theater program is the only one of its kind to offer jazz, ballet and modern dance. Students in the theatre program develop skills and creativity in the areas of acting, musical theater, technical theater and communications. Visual arts offers studies in both new media and traditional, with a strong foundation in art history. Digital Art, Digital Photo and Graphic Design take place in cutting-edge Mac labs, while Ceramics, Drawing, Painting and 3D are held in fully-equipped studios. Music and jazz studies degree programs are designed to be the equivalent of the first half of a bachelor's degree in music performance or education at colleges and universities throughout the United States. The curriculum at CCRI corresponds to the freshman and sophomore years in many four-year bachelor's degree programs in art or a foundation program at a design school.

2007

The Fire Science program is designed for individuals who wish to enter the firefighting profession. It provides leadership skills, technical knowledge and Emergency Medical Technician (EMT-B) qualifications needed to be successful in fire service. The curriculum strengthens the knowledge base of the current professional firefighter and augments expertise practiced in the community. Graduates work for municipal fire departments or obtain positions in the fields of industrial fire safety and security, fire protection engineering technology, fire insurance inspection, or investigation underwriting and ambulance services.

The Emergency/Disaster Management program is based upon the Emergency Management Institute (EMI) for higher education. This field is growing, including opportunities for individuals employed in varied capacities. The program focuses on the needs of the general community, with a specific focus of providing an emergency disaster management knowledge base to individuals in many fields. The program is designed to enhance the skills and knowledge of police, fire service, hospital personnel, business, security personnel, risk managers and others. in the principles of emergency/disaster management. This program addresses the beginning level practitioner skill and knowledge requirements.

2007

The Health Care Interpreter certificate program is a four-semester program that prepares students to become assistant level practitioners in the health care community. Health care interpreters provide high-quality and skilled interpreting services in a variety of health care facilities including – acute care, long-term care and community health care agencies. The program includes a total of 16 credits for four distinct courses. Students gain an understanding of the critical role that medical interpreters fulfill within the health care team through theory presented in the classroom, simulated clinical experiences, as well as field work experience in the selected health care settings.

0	Employed Outside Field	

2007

Histotechnicians are integral members of the health care team. It is the histotechnician's job to prepare sections of human tissue from biopsy or autopsy for microscopic examination by processing and cutting tissues, mounting them on slides and staining them with special dyes for microscopic examination by a pathologist for the diagnosis of disease. Most histotechnicians work in hospital laboratories, medical research laboratories, veterinary pathology and forensic laboratories.

The CCRI Histotechnician program prepares students to enter this challenging and rewarding field and provides them with entry-level knowledge, application and problem-solving skills needed to function as active members of the health care team.

Graduates of the program are eligible for employment in a hospital, crime lab, veterinary lab and public health; transfer to a bachelor's degree program; licensure in the state of Rhode Island to practice; and sitting for the national certification examination for HT given by ASCP (American Society of Clinical Pathologists).

The Histotechnician Program was a new program in 2006.

The Liberal Arts program provides the first two years of a traditional liberal arts curriculum. Most CCRI students who enroll in this program plan to transfer to a four-year college or university in pursuit of a bachelor's degree. The Liberal Arts program offers students the opportunity to acquire a perspective on world affairs, human relationships and language while developing essential skills in critical reading, organization, effective writing, analysis and research. Students who successfully complete this program and/or a Liberal Arts concentration receive an Associate in Arts (A.A.) degree. Students may concentrate in: English, Foreign Languages, History, Mathematics, Philosophy or Psychology.

2007

The Nursing program prepares graduates for entry-level positions in a variety of health care settings and in a wide choice of clinical specialties. It is the largest program of its kind in New England and one of the largest and most successful in the country. The Nursing program consists of Level I (Practical Nurse Diploma) and Level II courses (A.S. Nursing). Students who complete the Level I courses receive a diploma and are eligible to take the examination for licensure as a practical nurse (LPN). Students who complete Level I and Level II receive an Associate in Science (A.S.) degree and are eligible to take the licensure examination for registered nursing (RN).

2007

The Practical Nurse program is part of the articulated nursing program. Once accepted into the program, students can complete the requirements for graduation within 11 months and are eligible for the licensing examination for practical nursing. Graduates of this program are quickly assimilated into the health care field and work in a variety of health care settings. As a graduate of this program, the licensed practical nurse may return within five years and complete the requirements necessary to receive an associate degree in science, thus becoming a registered nurse within one year.

2007

Occupational therapy is the use of purposeful activity and interventions to promote health and achieve functional outcomes in performance areas, which include activities of daily living, work and productive activities, and play or leisure activities. Occupational therapy assistants, under the supervision of a registered occupational therapist, help people of all ages to lead productive, satisfying lives. The Occupational Therapy Assistant Program includes 70 credits of general education and occupational therapy technical courses.

Graduates are eligible to sit for a national certification in their respective field of study. An individual must successfully pass the comprehensive examination in order to apply for licensure to practice as a certified occupational therapy assistant in the state of Rhode Island.

2007

Phlebotomists are essential members of the health care delivery team who are primarily responsible for collecting blood specimens from patients for laboratory testing. The phlebotomist plays a vital role by obtaining quality specimens that enable the laboratory to deliver meaningful and accurate test results to assist the physician in diagnosis. Upon successful completion of this program, graduates are eligible to sit for a national certification examination for phlebotomy given by recognized agencies. Qualified phlebotomists may be employed in hospital laboratories, private laboratories, doctors' offices, clinics, emergency rooms or blood donor centers.

2007

Physical therapist assistants work under the direction of a licensed physical therapist to help patients recover physical function lost through disease, injury or other causes, and to relieve pain and promote healing. Physical therapy services restore, maintain and promote optimal physical function, wellness/fitness, and quality of life and to prevent the onset and progression of functional limitations that result from disease or injury throughout one's lifespan. The Physical Therapist Assistant Program includes 73 credits of general education and physical therapy technical courses.

Graduates are eligible to sit for a national comprehensive examination in their respective field of study. An individual must successfully pass the comprehensive examination in order to apply for licensure to practice as a licensed physical therapist assistant in the state of Rhode Island.

2007

A radiographer uses x-radiation, knowledge of anatomy and imaging principles to aid physicians in the diagnosis of disease, in monitoring patient progress and in controlled screenings to help prevent disease. A radiographer works in hospitals, clinics, doctors' offices and private emergency rooms. The profession offers numerous opportunities for advancement, including computed tomography and special procedures. With additional education, there are opportunities in MRI, medical ultrasonography, nuclear medicine and radiation therapy. Graduates are eligible to take the American Registry of Radiologic Technologists examination.

Diagnostic medical sonography is used to locate, evaluate and record pertinent anatomical, pathological and functional data to aid a physician in the diagnosis and prevention of disease. Students may select a concentration in general ultrasound, vascular or echocardiography. Graduates are eligible to take the American Registry of Diagnostic Medical Sonographers examination and are prepared for entry-level employment as sonographers (ultrasonographers) in hospitals, clinics and private offices.

Magnetic resonance imaging is a dynamic technology used in the diagnosis and treatment of disease. The program prepares students to safely perform magnetic resonance procedures, display the personal qualities of integrity, responsibility and reliability and who function as active members of the health care team. Graduates are eligible to take the American Registry of Radiologic Technologists examination and to work in hospitals, clinics and doctors' offices.

2007

This program is an accredited two-year respiratory therapist course of study leading to an A.A.S. degree. Respiratory care is an allied health profession in which respiratory therapists work under the direction of a physician to evaluate, treat and care for patients with breathing disorders. During the course of study, the student attends clinical practice at various affiliate sites including specialty rotations in neonatal and pediatric care, pulmonary function testing, hemodynamics, subacute/chronic care, pulmonary rehabilitation and home care. Graduates must pass a national entry-level examination and are eligible to sit for the advanced-level credential (RRT). Respiratory care practitioners are licensed in the state of Rhode Island and are employed in hospitals, nursing facilities, clinics, doctors' offices, home care companies and rehabilitation centers.

The Associate in Science Degree program is divided into two tracks. Track A is intended for those who expect to go into the fields of forestry, home economics, mortuary science, nutrition, optometry, physical education or plant science. Track B is for those who wish to enter astronomy, biochemistry, biology, biophysics, chemistry, geochemistry, geology, geophysics, marine biology, meteorology, oceanography, pharmacy, physics, pre-medical, pre-dental or pre-veterinarian studies. Both tracks require proficiency in English, foreign languages, and mathematics, as well as the sciences. This is primarily a transfer program.

2007

Therapeutic massage involves the use of manual soft tissue mobilization to promote health and wellness. Recent scientific studies have documented the many positive physical, mental and emotional effects of massage. The Therapeutic Massage program offers students a strong scientific basis for the understanding and application of various soft tissue techniques. Various types of massage are studied, including both Eastern and Western approaches. The Therapeutic Massage program comprises 61 credits including general education and therapeutic massage courses leading to an associate degree.

Graduates of this program are eligible to sit for a national comprehensive examination. An individual must successfully pass the comprehensive examination in order to apply for licensure to practice as a licensed massage therapist in the state of Rhode Island.
