Frequently Asked Questions

Q: What will be covered in this training?

A: A bulk of this Technical Training will focus on Fence Installation. We will cover everything from technology information to the installation and calibration of the FiberPatrol® FP1100-X. We will touch on other FiberPatrol products and features but this will not be the main topic of this training.

Q: Who should attend this training?

A: Integrators and installers of the FiberPatrol line of products should attend. If an end user or client wishes to attend, they will need to be accompanied by the integrator/installer working on their project.

Q: Why should you attend this Training?

A: Starting in 2013, you are required to become a Certified Optellios Partner before any installations occur.

Q: How long is this certifications training good for?

A: Once you have completed the Optellios Technical Training Program, you will be a Certified Partner for two years. At that time, you will need to apply for the course.

Q: What do you need to bring?

A: You must bring a laptop computer with you in order to fulfill the training course. This will be used for hand-on training of the FiberPatrol Software. If you are unable to bring a laptop computer with you, but would still like to attend the Optellios Technical Training Program, please email training@optellios.com. All other materials will be provided for you.
