Getting Started

Thank you for your interest in a 2015 LSTA grant! The Project Budget is an important part of your grant application. Your budget should help you demonstrate the careful planning that you have put into your grant proposal.

Your budget should provide an overview of all anticipated project costs from federal and local sources.

These slides will provide you with line-by-line budget worksheet instructions. If your question is not answered in these slides, do not hesitate to **call or email Jen Clifton, LSTA Consultant, for help at jclifton@library.in.gov or (800) 451-6028.**

Developing the Budget

Maximum Awards

Before you craft your budget, you must know the maximum amount of LSTA funds available for your project. Maximum award amounts are different for each grant opportunity and are listed in the grant program guidelines, [available on our webpage](#).

Developing the Budget

Required Cash Match

All grant programs require a local cash match equal to at least 10% of the total amount of LSTA funds you are requesting. This local match can be made up of cash contributions and in-kind contributions from your library or other sources.

(In-kind contributions are defined as goods, commodities, or services instead of money contributed to the project by the library or other sources.)

Developing the Budget

Determining Your Cash Match

You will need to determine how you will meet this requirement before you apply for several reasons:

- You will itemize your cash match in your Project Budget in the *Cost Sharing* column.
- You will describe your cash and in-kind contributions in Part VIII of your application form, the Project Budget Narrative.
- If selected as a grantee, you will report your total cash match in the financial final report.
- You are required to keep records of your cash match in your own files until 2021.

Developing the Budget

Allowable Expenses

Certain expenses are not eligible for reimbursement from federal LSTA funds. A list of examples is included in your grant guidelines. Official regulations are available on our webpage: <http://www.in.gov/library/lsta.htm>.

You may pay for these ineligible expenses through local cash and report these as part of your cash match.

Developing the Budget

Estimating Costs

The best practice to develop your budget is to first obtain quotes for products and services. When you complete your Project Budget and Project Budget Narrative (application form Part VIII), you will be able to credit your estimate source, making you a more competitive applicant.

In addition, should your application be approved, your grant contract will include the project budget “as is” unless you request revision in advance. **After contract, changes to the approved project costs must be requested of and are subject to approval by the Indiana State Library.**
