Cat Snip Application

Cat Snip prevents pet overpopulation at the source, by providing free spaying and neutering surgeries for animals otherwise unlikely to be sterilized. Eligibility falls into one of the following categories: pet owners who cannot afford it, or cats not belonging to a household (strays, feral cats and farm cats). In order to determine if you qualify for this program, please complete the following form in its entirety and submit the required documentation listed below.

Any animal that is not current on its rabies and distemper vaccinations will still be considered for the program; however, a rabies vaccination must be administered before surgery and is not covered by Cat Snip. DRHS can administer a rabies vaccination for a charge of \$10 per animal.
