

FUNDING INFORMATION

The UK College of Engineering Alumni Association (UKEAA) has assistance funds available for support of UK COE senior "capstone" projects. The UKEAA realizes that these projects can be expensive but are a very critical part of the engineering students' senior year and learning experience while at UK. To that end, the UKEAA would like to offer to help fund projects at \$250 per project team. The review team will be looking to assist complex, innovative proposals that fully leverage the students learning to date and are aligned with their department's senior project criteria.
