11. Malaria	14	4	63	74	18
12. Leptospirosis	0	0	0	0	0

Threshold calculation		
1W before	*2W before*	*3W before*
25	24	29
0	0	0
38	72	61
3	9	6
8	12	16
0	0	0

Event based Alert:

	Diseases	Insiders	outsiders	Total
13. Cluster of disease (e.g., jaundice, fever with rash, etc.)	Conjunctivitis	0	0	0
	-	0	0	0
	-	0	0	0
	-	0	0	0
	-	0	0	0

14. Suspected vaccine preventable diseases rubella, pertussis, diphtheria, mumps, neonatal tetanus	**Rubella**	0	0	0
	Pertussis	0	0	0
	Diphtheria	0	0	0
	Mumps	0	0	0
	Neonatal Tetanus	0	0	0

Note: Report diseases No.7-14 or zero report **each** Tuesday for the previous week(Sunday to Saturday). Send this form via email to DHO, PHO and cc to ODPC and BOE (camp.border@gmail.com and outbreak@health.moph.go.th), CCSDPT (win@ccsdpt.org), WHO (aree@searo.who.int), and TUC (TUC-IRHP@th.cdc.gov).

Response to the outbreak or epidemic detected:

Diseases under urgent surveillance
- There was no case detected for disease under urgent surveillance during week 16, 2013.
- PU-AMI will continue the monitoring of the disease trends closely and will report timely.

Diseases under statistical cut-off
- Diseases under stastical cut-off were lower than 5 years median threshold and also lower than that of 1.5 times mean of 3 previous week thresholds.
- The number of cases will be closely monitored with thresholds.
