## Handler II

The Handler II comes standard with the innovative Banjo threadless manifold fitting system. Easier assembly, fewer leaks, user friendly option. With a capacity of 42 US gallons/160 litres and 2" or 3" fitting sizes, the Handler II allows the user to batch mix everything from liquids to dry products and powders, as well as directly induct chemical into the sprayer. It's size and accurate calibration makes the Handler II the perfect unit for metering from bulk containers and barrels and it can be adapted to draw directly from these same bulk containers, eliminating the need for slow 12 volt chemical pumps. The Handler II has a standard single nozzle agitation system and comes standard with Banjo threadless manifold fittings.
