Mika Kohonen

SSL: 270 games (Scoring points: 731)

Salibandyliiga: 182 games (Scoring points: 374)

National Team: 120 games (Scoring points: 186)

Medals: 2 Swedish Championship Gold
2 Swedish Championship Silver
6 Bronze (in Sweden and Finland)
1 World Cup Gold
3 World Cup Silver
2 World Cup Bronze

Voted into: 4 World Cup All-Star Teams

Voted: "Best player in the world" twice

Player of the year: (in Sweden): 2000/2001

Center of the year: (in Sweden): 5 times

Center of the year: (in Finland): 3 times

Martin Östholm

SSL: 60 games (Scoring points: 55)

National Team: 5 games (Scoring points: 1)

Junior National Team: 12 games (Scoring points: 12)

Medals: 1 Swedish Cup Gold
1 Swedish Cup Bronze
1 Junior World Cup Gold

Speed shooting: 185 km/h

OUR WORLD WIDE PARTNERS

THE WORLD IS OUR PLAYGROUND

In the rapidly growing floorball world, Unihoc is continuing to lead the way. Supporting the best club teams in the world at the same time as we are closely co-operating with national teams in many of the booming floorball nations, we are certain to always get the necessary input about what is hot and what is not. That way we can continue to give the world what it wants.

Currently Unihoc is available in 53 countries around the globe, with active sponsorship agreements with the best teams and the national federations in the ten countries below.

PRODUCTION PROCESS – Floorball shafts

To create a floorball shaft you need strong and durable raw materials. Our floorball shafts consist of top class carbon fibre and glass fibre, and normally a stick is a mix of these two materials, which is called composite. Simply put, you could say that the higher proportion carbon fibre used in the shaft, the better the final product becomes in terms of strength, stiffness, performance and low weight. The rebound of the shaft also gets faster by using a high percentage of carbon fibre in the shaft.

The production process of a shaft is very time consuming and consists of over 100 different steps before the final product is finished. The small pieces of woven carbon fibre pre-preg, which is the raw material that you start with, is placed along the shaft at different angles to give strength at the exactly correct positions and pressure points. Each shaft model is unique and the pattern for placing the carbon fibre is very different from stick to stick. For instance, a curved shaft has certain requirements and a straight shaft has completely different needs.

After having created the correct pattern of pre-preg pieces, the shaft is heated to 150 degrees Celsius inside a customized oven for approximately 40 minutes. Then the manual process of refining the shaft begins, and the customization includes a very large number of steps before the final product is complete with paint, decal, gripband and packaging.

In our opinion, it's a piece of art.

This year's stick series are available with the following special shafts:

NEW

★ **TWIN CURVE**

TWIN CURVE: This is the latest addition to our moulded shaft range. Twin Curve is created to offer a new version of the popular Curve shaft, this time with a new curved handle solution for the upper hand which makes it possible to hold the stick closer to your body. Further, the new 2.0 curved angle of the shaft offers a new option in the Curve range.

Material: Air Pressure Carbon Fibre.

NEW

★ **FEATHER**

FEATHER LIGHT: Actually, this is not a stick technique in its real sense. It is more a setup of the components of a complete stick, which together reduce the total weight of the model enough to create our lightest stick yet. The materials used in the grip band and in the blade are the lightest ones available on the market, and the result is simply Feather Light. To top it off, the Unihoc logos have been embossed into the shaft with a magnificent result.

Material: Air Pressure Carbon Fibre.

NEW

★ **FEATHER**

FEATHER CURVE: This new model is exactly what its name says; a combination of the Feather Light stick and the Curve shaft. The result is our lightest Curve model yet.

Material: Air Pressure Carbon Fibre.

★ **CURVE**

★ **CURVE**

CURVE: This world sensation is yet another fantastic invention by Unihoc. The lower part of the shaft is curved to create an increased angle towards the blade, adding increased power to the shots. We guarantee that the Curve shaft will give you a completely new floorball experience. Once you have tried your first shot you will know what we mean. The shaft is available with three different curved angles, and also with various flex.

Material: Air Pressure Carbon Fibre.

★ **BAMBOO**

BAMBOO: This bamboo shaped shaft is created with step power technique, bringing several advantages to the finished product. Its ingenious, yet simple construction makes it possible to create an extremely light shaft and still keep the strength of the flex. The fine-tuned balance of the shaft is extraordinary.

Material: Air Pressure Carbon Fibre.

★ **BOW**

BOW: One of our greatest inventions within the field of shaft technology is called BOW, which is a refined version of the successful Curve shaft. The bent shape of the shaft enables the player to transfer more power from the stick to the ball than ever before. The feeling of added power is very distinct. Hard gets harder, the feeling of control is increased and the joy of playing is inevitable. Available with two different angles depending on how much effect you prefer.

Material: Air Pressure Carbon Fibre.

★ **BUBBLE**

BUBBLE: The unique Bubble technology moves the flex closer to the blade, which adds a greater kick to the shot.

Material: Air Pressure Carbon Fibre.

★ **TOP LIGHT**

TOP LIGHT: The Top Light shaft is one of the lightest Unihoc shafts of all times, giving a completely new feeling for the game.

Material: Light weight Carbon Fibre.

★ **TWS**

TWS: Our patented Two Way System, with waves along the lower part of the shaft, gives a harder flex on the forehand side than on the backhand side. This stick is perfect for the two way player, creating a weapon equally lethal from both sides.

Material: Air Pressure Carbon Fibre.

PLAYER+

NEW

Player+ is the new exquisite stick series of the season. Using high-end solutions with carefully crafted details for all parts of the sticks will guarantee making the stick a front runner in the Unihoc range. The new Semi-VS grip with easily replaceable top part and its partially see-through design perfectly matches the aesthetic chrome and metallic beauty of the shaft. The series also introduces the new PLAYER+ blade, optimizing the best features of the successful PLAYER SQL blade and adding several new, modernized features and added size.

VOLCANO

The classy, yet spectacular design combined with the benchmark technology that has always been the trademark of Unihoc ensures to make this series a natural success. The Volcano blade with its maximum dimensions, little concavity and aggressive, yet typical, Unihoc look has been developed to suit the best playmakers in the world. Volcano is the result of all our gathered experience and best components put together in a single stick.

BADGE

The Badge series has been developed to suit the different needs of different players. Available with different flex and in different lengths, there is something for everyone who wishes to get a taste of the impressive powers of the Curve shaft. The stick is equipped with the stylish VS-grip and the special edition Badge blade with incorporated Unihoc symbol as the icing on the cake.

PLAYER SQL

Our most successful stick series of all time plays an important role in our range. Using the best technology available in combination with a new grip design and the same popular blade as before, Player SQL is destined to be the stick of choice for coming generations of players as well, and it remains the undisputable benchmark for top class stick engineering.

iRULE

For the technical player this is a perfect ace up his sleeve. iRule has been shaped for extreme ball handling skills and sometimes for pure magic. This elegant stick series is not only seriously eye-catching, it is also very functional.

EVO3

This is a classic Unihoc series that has now received a face lift for future missions. The series has a new colourful, modern look with minimalistic features and an elegant gripband design. The model is featuring the popular EVO3 blade with its low weight and great shooting ability.

ACE

Year after year the classic ACE series continues to run successfully, and this season is no different. Fine-tuned and re-designed, this stick is still the top choice for the player who enjoys the weekly workout with his friends. But, as the keen floorball fan knows, this stick is also being successfully used even by elite players.

NIÑO

The NIÑO series has been especially developed to be the perfect choice for our youngest players, who need shorter sticks with more flex than grown-ups. Also the blade is tailor made for kids with its reduced size that makes it easy to handle and that also offers low weight and increased ball control.

NEW

PLAYER+

This year we introduce the new PLAYER+ blade, optimizing the best features of the successful PLAYER SQL blade and adding several new modernized features and more size. The blade is stronger than before and we have enhanced logo and added the trademark  in the top.

- Soft silver / Art.no: 12021
- Medium graphite grey / Art.no: 12025
- Medium black / Art.no: 12027
- Medium blood red / Art.no: 12029
- Medium Feather Light white / Art.no: 12031
- Hard white / Art.no: 12035

★ 75g

VOLCANO

For the VOLCANO blade we have maximized the playing surface of the face and combined it with modest concavity and a longer radius towards the floor to create a top modern blade. The progressively tilted bars give an aggressive look; still there is no doubt that this is a typical Unihoc blade.

- Soft pink / Art.no: 11961
- Medium black metallic / Art.no: 11963
- Medium turquoise / Art.no: 11967
- Hard white / Art.no: 11969
- Super hard white / Art.no: 11971
- Medium copper / Art.no: 11991
- Medium Feather Light white / Art.no: 11993

★ 83g

PLAYER SQL

With a rather modest concavity the PLAYER SQL blade combines extremely low weight with unprecedented firmness, still offering a fantastic touch.

- Soft royal blue / Art.no: 11909
- Soft silver / Art.no: 11903
- Soft grass green / Art.no: 12001
- Medium neon orange / Art.no: 12003
- Medium Feather Light white / Art.no: 12005
- Medium graphite grey / Art.no: 12007
- Medium dark blue metallic / Art.no: 11911
- Medium copper / Art.no: 11915
- Medium blood red / Art.no: 11917
- Medium gold / Art.no: 11907
- Medium black / Art.no: 11895
- Hard white / Art.no: 11899

★ 74g

BADGE

The BADGE blade was originally developed as an anniversary model, as a slightly adjusted version of the PLAYER SQL blade with the Unihoc symbol in the top. The success that followed made us keep the model in our regular blade range.

- Medium silver / Art.no: 11869
- Medium purple / Art.no: 11867
- Medium pearl white / Art.no: 11871
- Medium black metallic / Art.no: 11873

★ 77g

EVO3

EVO3 is the second generation of the successful EVO2 blade. The measures of the blade have been increased to create a larger face, but still keeping all the positive features of the first version.

- Soft green metallic / Art.no: 11879
- Soft neon orange / Art.no: 11881
- Medium blood red / Art.no: 11927
- Medium winered / Art.no: 11913
- Medium dark blue / Art.no: 11885
- Medium black / Art.no: 11887
- Hard white / Art.no: 11889

★ 74g

iRULE

This is the Zorro blade from Unihoc. It has been based on the successful PLAYER SQL blade, with the addition of a pre-hooked top. Approved for match play by the IFF.

- Medium purple metallic / Art.no: 11853
- Medium gold / Art.no: 11855
- Medium royal blue / Art.no: 11857

★ 80g

RAD

RAD is a modern blade with a larger radius towards the floor, creating the feeling of a longer blade and offering extreme torsional rigidity for maximum power.

- Soft yellow / Art.no: 11977
- Soft sky blue / Art.no: 11981
- Medium red / Art.no: 11975
- Medium black metallic / Art.no: 11983
- Medium turquoise / Art.no: 11985
- Hard white / Art.no: 11989

ACE

The ACE blade is created to make use of the maximal dimensions allowed, giving a larger face with a smooth concavity and a rounded top.

- Soft sky blue / Art.no: 11945
- Soft yellow / Art.no: 11949
- Medium black / Art.no: 11951
- Medium neon green / Art.no: 11957
- Hard white / Art.no: 11959

EVO2

With its modest size, slightly concave face and scooped top, the EVO2 is one of the most sold blades in the history of the game.

- Soft neon green / Art.no: 11919
- Medium black / Art.no: 11921
- Medium silver / Art.no: 11923
- Hard white / Art.no: 11941

EVO

★ 79g

This is the very first blade in the EVO line. With its slightly concave face and characteristic design, this is a classic blade in the history of floorball.

- Soft yellow / Art.no: 11901
- Medium black / Art.no: 11905

NIÑO

★ 69g

Developed to suit the needs of our youngest players, the NIÑO blade with its reduced size is easy to handle, and it also offers a low weight and increased ball control.

- Soft turquoise / Art.no: 11861
- Soft neon orange / Art.no: 11863
- Medium black / Art.no: 11865

EVO3 HOOK

The pre-hooked top of the blade helps you improve on your Zorro moves.

- Medium white / Art.no: 11845
- Medium black metallic / Art.no: 11875
- Medium neon orange / Art.no: 11877

EVO2 HOOK

With its pre-hooked top you can easily become the next Zorro star.

- Soft neon green / Art.no: 11929
- Soft yellow / Art.no: 11931
- Soft dark blue / Art.no: 11933

GOALIE

Over the years, Unihoc has been setting the standards for the most elaborate goalie gear available. Developing the right equipment for elite goalies as well as for goalies that merely play for the sake of exercise has been equally important. The range offers all the necessary items for a goalie, with several exciting alternatives to choose from in each segment.

SUMMIT

Our top-of-the-line series is called Summit, which is a complete range of high-end goalie equipment, developed in co-operation with the best goalkeepers in the world. The Summit series features a cutting edge range of goalie masks, which are the lightest on the market and with a completely unique design for the shell, the cage, the padding and the straps. In addition to the masks we also feature the Summit goalie dress, with a stylish and comfortable design for both sweaters and pants. This year we have added a brand new Goalie T-shirt to the range, with a slim fit cut and comfortable padding.

FORCE

The successful Force collection is still standing strong in our goalie assortment. The line offers top notch functionality and quality, and at the same time it features a stunning design. The eye-catching sweaters and pants are suitable for both training and match, and several different materials and colours are available to suit your style and demand.

Classic

To complete our goalie range, we also feature our long-running Classic collection, with goalie gear for the middle-end segment. The Classic items are very functional garments of fine quality at a reasonable price for kids and non-elite goalkeepers.

Zürich Sublimation set

Now you can customize your own unique design for the Zürich set by using sublimation technology. This means that you can create your team's match set exactly as you want it in terms of colours, logos, player names and numbers. The design is sublimated into the fabric, which gives a soft garment without any printed transfers on it.
