Instructions: The student must perform the client care in the capacity of primary midwife, while licensed or certified. The care must be correctly charted in the client charts. The student and her/his approved NCM preceptor(s) complete chart review together. The student submits this updated form to NCM with End-of-Trimester submissions to document progress.

The Complete Chart Review consists of the following:

- A. Identification of client problem list and risk status: AP, IP, PP, NB, WW.
- B. Development of plans of care using Subjective, Objective, Assessment, Plan format for every problem above.
- C. Description of most up-to-date evidence-based care that applies to the client's problems.
- D. Review of outcomes for improvement of quality of services.
- E. Implementation of quality improvement measures based on review of outcomes.

Supervision: The BSM candidate can complete these births independently. Only the approved NCM preceptor(s) who personally reviewed the charts can sign them off on this form.
