

International Symposium 19 - 21 Nov 2009

STRUCTURALISM in Architecture & Urbanism RELOADED

Originally developed in linguistics, the structuralist approach was introduced as a scientific method in anthropology and other human sciences in the 1950s and later. In the 1960s and 70s the double category of primary and secondary structure (langue and parole) that is essential to Structuralism, in which the primary structure's system of rules determines how the secondary elements are placed in relation to one another, also advanced to a leading ideology in the field of architecture and urban planning. From its development in Holland and within the Team 10 circle of architects, Structuralism in architecture quickly spread worldwide. Almost all the utopian movements of the 1960s can be related to Structuralism, and in retrospect many research projects and theoretical approaches from this period can be characterized as structuralist. Although initially aimed at developing more humane environmental structures for mass society, Structuralism in architecture was never able to liberate itself from the taint of seriality and monotony. The built examples were perceived as inhumane, as they often failed in terms of practical use. The lack of individuality and the determinism of the primary structure brought Structuralism the reproach of anti-humanism. In the late 1970s it lost its appeal as a leading ideology in architecture.

Since the early 1990s we have been witnessing a revival of structuralist tendencies in architecture. In a parallel development, interest in the utopian aspects of the structuralist currents of the 1960s has also increased. Whereas the Structuralism of the 1970s encountered limits in complexity that were insurmountable at the time, today there is much to suggest that the return to this apparently unfinished project is causally connected to information technology, which has opened up new possibilities for dealing with complexity. There is talk of Neo-Structuralism with a digital imprint. This differs in several critical points from the precursor of the 1960s. The

new, computer-aided tools lead logically to new approaches and different results. We are confronted with an enormous increase of complexity in the primary structures: away from simple grids to complex, irregular structures, with algorithmic design far exceeding the horizons of the old Structuralism. The question arises as to whether primary and secondary structures should be understood today as being in a state of complex interactions with one another which could be described through algorithms.

This further development and the current interest in design methods based on rules (ARCH+ 189) makes structuralism today one of the most productive and comprehensive approaches for the organisation and design of the built environment. At the same time it provides the systemic and meta-theoretical background for all disciplines involved in the production of space. In its digital reappearance however, structuralism often shows a naïve, technocratic belief in progress and feasibility in-as-much as it claims to be able to solve the demands for individuation in a mass society solely by numerical methods of planning and production technology. Today's digital Structuralism will probably only be able to bring us closer to the solution of the still unresolved issue of housing a mass society while simultaneously respecting man's individuality if there is also a utopian synthesis of all relevant aspects, including psychological, social and socio-political. The question of the sustainability of the structuralist approach in the future will probably boil down to whether its humanization (its individuation) will be sought within the system (i.e. in the course of perfecting the numerical-technological mastery of the complexities), or whether system-independent elements can be drawn upon for solving the problem.

STRUCTURALISM IN ARCHITECTURE & URBANISM RELOADED

Thursday 19 Nov 09		Friday 20 Nov 09		Saturday 21 Nov 09		Saturday 21 Nov 09	
13.00	Registration	8.30	Registration	8.30	Registration		
14.00	Introduction Prof Dr Tomáš Valena (HM Munich)	9.00	Section 2 The Heroic Structuralism Keynote Prof Dr Koos Bosma (VU Amsterdam) Structuralism in Architecture: Patterns for a Civil Society or the Charms of Seriality and Deviation?	9.00	Section 3 Neo-Structuralism with a Digital Character Keynote Fabian Scheurer (Zurich) Algorithmic Design - Werkzeug oder Weltbild?	16.30	Plenum Structuralism – a Critical Look Ahead Dr Stefan Hajek Strukturalismus Reloaded Der Versuch eines Ausblicks auf das Scheitern
14.40	Section 1 Structuralism and Architecture Ruth Baumeister / Prof Dr Herman van Bergeijk Discovery of the Driving Forces behind Dutch Structuralism Prof Dr Joaquín Medina Warmburg Forum 1962: Wachstumsstrukturen und Geschichtsmaschinen Prof Dr Tom Avermaete From Deep Structure to Spatial Practice: Team 10, Structuralist Attitudes and the Influence of Anthropology	9.30	Inderbir Singh Riar Habitat 67 or Structuralism Redux Dr Asseel Al-Ragam Explorations in Mat-Building: Kuwait Urban Critique Anne Kockelkorn Verstädterung von Architektur: Freie Universität Berlin 1963-1979	9.30	Dr Reinhard König Generative Planungsmethoden aus strukturalistischer Perspektive Prof Uwe Brederlau Parametrische Entwurfsprozesse im Städtebau Thomas Wortmann Strukturalismus Recoded	17.40	Gernot Weckherlin Lehren aus Missverständnissen: Die kreative Adaption neuer Wissensfelder beim Entwerfen Strukturalismus und Entwurfsmethoden heute Dr Toni Kotnik Algorithmic design: Strukturalismus reloaded? Plenum with speakers of the Symposiums Chair: Nikolaus Kuhnert (ARCH +)
15.50	Coffee break	10.40	Coffee break	10.40	Coffee break		
16.20	Dr Michael Hecker Structurel / Structural Prinzipien und Merkmale der “strukturalistischen” Strömung kybernetischer Prägung in Westdeutschland Prof Dr Andri Gerber (neo-)Structuralism and (neo-)Marxism? Keynote	11.10	Prof Dr Catherine Blain „The city as a combinatory“ French Structuralism of Atelier de Montrouge 1967-1972 Cornelia Regine Escher Der Mega-Strukturalismus der Groupe d'étude d'architecture mobile Markus Stempl Der strukturalistische Ansatz und die Raumstadt Schwebende Städte für eine globalisierte Gesellschaft 1958-1974	11.10	Heike Matcha Massenvielfalt: Individualität durch parametrische Typologien Steffen Lemmerzähl / Benjamin Dillenburger Architektur-Automat - Häuser als gebaute Kosten-Nutzen Analyse Oder: der blinde Architekt Niels Nötzel / Rüdiger Karzel Evolutionary Structuralism Dr Michael Dürfeld Ornamentaler Strukturalismus Vom Rhythmus zur Evolution als Zukunft des Strukturalismus		
17.10	Prof Dr Georges Teyssot (Québec) The Ethnographic Paradigm, Revisited Round table with speakers of the section 1 Chair: Bernhard Langer (ETH Zurich) Special guest: Arnulf Lüchinger (Den Haag)	12.20	Lunch	11.10	Dr Michael Dürfeld Ornamentaler Strukturalismus Vom Rhythmus zur Evolution als Zukunft des Strukturalismus		
17.40		13.30	Andrej Hrausky Structuralism in Slovenia Dr Ersi Ioannidou Structuralism and Metabolism Bernhard Langer Denken in Strukturen: Ekistics und der Objektivitätsanspruch in der Architektur Round table with speakers of the section 2 Chair: Dirk van den Heuvel (TU Delft) Special guest: Prof Doris Thut (HM Munich)	12.50	Lunch		
		14.40		14.00	Prof Bernd Knies / Prof Christopher Dell Struktur, Diagram, reverse functionalism Überlegungen zu einer Universität der Nachbarschaften Walter Stelzhammer „Himmel über Fünfhaus“ Strukturalismus und Teppichbebauungen aus heutiger Sicht Peter Haimerl Dynamisches Planen Round table with speakers of the section 3 Chair: Dr des Georg Vrachliotis (ETH Zurich)		
		15.30	Coffee break	15.10			
		16.00	Public lectures Structuralism Reloaded? Prof Dr Herman Hertzberger (Amsterdam) Open Systems Prof Winy Maas (MVRDV Rotterdam) Pixelpower Prof Dr Jörg Gleiter (FU Bozen) struktural, material, digital Zum strukturalistischen Denken in der Architektur Round table with the speakers Chair: Nikolaus Kuhnert (ARCH +)	16.00	Coffee break		
		18.30				Organisation and direction Prof Dr Tomáš Valena valena@hm.edu	
						Registration via post, fax or email (s. Contact) After payment of the symposium fee your registration will be confirmed Account: Tomas Valena „Structuralism“ Account: 0202131285 Liga-Bank München BLZ 750 903 00 IBAN: DE 1475 0903 0002 0213 1285 BIC: GENODEF1M05	
						Symposium fee Early bird (until 5 Nov 2009) Regular 60 € whole symposium (incl. 2x lunch, drinks and booklet) 15 € half day 30 € one day Reduced (students and partner institutions with verification) 30 € whole symposium (incl. 2x lunch, drinks and booklet)	
						Later registration 80 € whole symposium 20 € half day 40 € one day	

I apply to the
