DynaTrol® II

General Purpose Polyurethane Sealant

Specification Data Sheet

BASIC USES

DynaTrol® II is designed for use in expansion and control joints in precast panels, tilt walls and curtainwalls; bedding panels, coping joints, window and door perimeters, glazing, acoustical and firestopping applications. Its wide color range and low modulus make it highly effective in exterior insulated finish systems (EIFS).

2. MANUFACTURER

Pecora Corporation
165 Wambold Road
Harleysville, PA 19438
Phone: 215-723-6051
800-523-6688
Fax: 215-721-0286
Website: www.pecora.com

3. PRODUCT DESCRIPTION

DynaTrol® II is a general purpose non-sag elastomeric sealant that creates a tenacious bond and watertight seal between materials of similar or dissimilar surface textures, porosities or expansion coefficients.

Fire Rated Systems: Three-hour fire and temperature rated wall and floor Design Joint systems up to 3" (75 mm) wide can be designed with Ultra Block® fire-blocking material and/or mineral wool fire safing.

These designs have been full scale tested and classified by Underwriters Laboratories, Inc. and appear in the 2001 UL Fire Resistance Directory, Vol. 2.

Ref: Standard "Fire Tests of Building Construction Materials," ANSI/UL 263, ASTM E119, NFPA No. 251.

Consult Technical Bulletins # 85J and # 85P for a complete listing of Pecora Firestop Systems.

Ultra-Block® is a product of Backer Rod Mfg. Co., Denver, CO.

Limitations: DynaTrol® II should not be used:

- as a cap, heel or toe bead in glazing systems utilizing high-performance glass or acrylic polycarbonate sheet,
- in areas exposed to harsh chemicals.

PACKAGING

- 1 1/2-gallon (347 cu. in.) (5.7 L) unit including Base and Activator
- Color Pack is packaged separately

COLOR

- Color-Pack system has pre-measured tint paste for 48 standard colors.
- Custom colors are available upon request: minimum 15 color packs.
- The base material is not to be used without addition of color.
- Also available in pre-tinted limestone – this version eliminates need for color pack.

4. TECHNICAL DATA

Federal Specification TT-S-00227E, Class A, Type II; ASTM C-920, Type M, Grade NS, Class 50, use M,A,G and O.

DynaTrol® II will withstand structural movement of 50% in extension and 50% in compression without adhesive or cohesive failure in properly designed joints.

Joint Design: Good joint design in the construction industry dictates four times (4x) the anticipated movement of building components be used when calculating joint width. The theoretically derived 2:1 movement factor is based on thermal movement alone and does not allow for variances found at the jobsite and therefore should not be used.

The 4:1 design factor accommodates both thermal movement and wide variations in tolerances of construction materials, fabrication and erection often found in the

field. This will also accommodate joints installed narrower than originally designed.

The width or depth of the joint should not be less than 1/4" (6 mm). In joints up to 1/2" (12 mm) wide, the depth of the sealant should be equal to the width. In joints wider than 1/2" (12 mm) but not exceeding 2" (50 mm), the depth should be maintained at 1/2" (12 mm). For joints wider than 2" (50 mm), please consult our Technical Services department.

Joint sealants do not change volume with expansion or compression - only shape; the greater the change in shape (strain), the greater the stress on the sealant and bond line.

5. INSTALLATION

Surface Preparation: Joint surfaces must be dry, clean and free of all contamination. Glass, metal and other nonporous surfaces must be free of any coatings and wiped clean with solvent. Precast panels using form-release agents other than polyethylene film must be sandblasted or mechanically abraded and blown or brushed dust free.

Priming: Not required on glass or anodized aluminum and usually not necessary on most other common building materials. However, varieties of brick, natural stone, plastics, paints, coatings and other surface treatments

TYPICAL PHYSICAL PROPERTIES at 77°F (25°C), 50% RH

Test Property	Value	Test Procedure

**when tested for ±50% movement

*aluminum, glass and primed concrete substrates

Specification Data Sheet

often present the need for priming. Due to the number and unpredictable nature of these substrates, a field or laboratory test is recommended to determine the adhesion of Dynatrol® II with or without primer. When priming is indicated, P-75 or P-150 should be used on porous substrates and P-120 on nonporous substrates or consult Technical Services.

Sealant should be applied within 8 hours after priming; otherwise, it will be necessary to reprime.

All Exterior Insulation Finish Systems must be primed with P-75 or P-150 as required by manufacturers of various EIFS systems.

Also, because architectural stones such as marble and granite vary considerably in porosity, some bleeding of the sealant into the substrate is a possibility. Again, a field or laboratory test to confirm this possibility is recommended.

Pecora offers complimentary adhesion, compatibility and stain testing in its laboratory on actual field samples of substrate from the jobsite or on representative samples from the same lots. Contact Technical Services for details.

Joint Backing: Backer rod controls the depth of the sealant and allows it to be applied under pressure. Closed-cell polyethylene or open-cell polyurethane is recommended. Use a size that will compress 25% when inserted into the joint. In joints too shallow for backer rod, use a bond-breaker tape to prevent undesirable three-sided adhesion.

Application: The Base and Activator (nested in Base container) are formulated and pre-measured to function as a unit. Do not interchange Base or Activator components from one shipment with those from another. The two components should be blended thoroughly along with the desired Color Pack for a minimum of six (6) minutes in accordance with mixing instructions appearing on the container label.

Do not thin with solvents or adulterate it in any way. Apply sealant to joints, using standard caulking equipment. Application life is 3-4 hours at 77° F (25° C), 50% R.H. Higher temperature and/or humidity will shorten this application life.

Tooling: Tool immediately to assure full

adhesion. Tooling without a slicking agent is preferred but if conditions require one, mineral spirits is recommended. (See Caution statement.)

Painting: Due to variability in paint products and their raw materials, installation conditions, installation techniques as well as primers, it is required that contractors who apply paint, pretest paint onto sealant, to determine suitability. Oil based paints can exhibit a slow/non-curing condition. Field test is required and user must determine suitability. Paintable after 72 hours. Consult Technical Bulletin # 31 for further information.

Clean Up: Immediately remove all excess sealant and smears adjacent to joints with mineral spirits. Also use mineral spirits to clean uncured sealant from equipment. Remove cured sealant by scraping, sandpapering, etc. (Caution: mineral spirits is flammable and toxic. Observe manufacturer's precautions.)

Storage Life: Dynatrol® II has a shelf life of approximately one (1) year from the date of manufacture when stored in sealed containers at temperatures lower than 80°F (26°C). Dynatrol® II performs equally well during any part of this shelf life.

Precautions: Toxic. The Activator portion of Dynatrol® II contains diisocyanates. Avoid prolonged breathing of vapors and contact with skin or eyes. Wash hands after use and before eating or smoking. Upon accidental contact with eyes, flush with water and seek medical attention at once. Ultra Block® is a noncarcinogenic processed continuous filament textile glass fiber that may cause skin, eye and respiratory irritation. When applying, wear long sleeves, gloves, cap, goggles or safety glasses and NIOSH/MSHA approved dust respirator. After use, bathe with soap and warm water. Wash clothes separately and rinse after use.

Refer to Material Safety Data Sheets for additional information.

6. AVAILABILITY AND COST

Pecora products are available from stocking distributors nationwide. For the name and telephone number of your nearest repre-

sentative, call the number below or visit our website at www.pecora.com.

7. WARRANTY

Pecora Corporation warrants its products to be free of defects. Under this warranty, we will provide, at no charge, replacement materials for, or refund the purchase price of, any product proven to be defective when used in strict accordance with our published recommendations and in applications considered by us as suitable for this product. The determination of eligibility for this warranty, or the choice of remedy available under this warranty, shall be made in our sole discretion and any decisions made by Pecora Corporation shall be final. This warranty is in lieu of any and all other warranties, expressed or implied, including but not limited to a warranty of merchantability or fitness for a particular purpose and in no case will Pecora be liable for damages other than those expressly stated in this warranty, including but not limited to incidental or consequential damages.

8. MAINTENANCE

If the sealant is damaged and the bond is intact, cut out the damaged area and prime with P-75 or P-150 primer and recaulk. If the bond has been affected, remove the sealant, clean and prepare the joint in accordance with instructions under "Installation".

9. TECHNICAL SERVICES

Pecora representatives are available to assist you in selecting an appropriate product and to provide on-site application instructions or to conduct jobsite inspections. For further assistance call our Technical Service Department at 800-523-6688 or 215-723-6051.

Pecora 890FTS and Pecora 890FTS-TXTR

Field Tintable, Non-Staining Silicone Sealant - Smooth and Textured Formulas

Specification Data Sheet

1. BASIC USES

- For sealing expansion and control joints in precast concrete panels, architectural and natural stone, masonry, steel, metal curtain walls, sealing of door and window perimeters, Exterior Insulation Finish Systems (EIFS), fluoropolymer and powder coated aluminum, wood, vinyl and many plastics, generally without need for a primer.
- Where the versatility of field tinting through the use of our universal color packs as well as the option of smooth or a textured, grout-like formula is needed.
- New or remedial construction

strong adhesion to all base and top coats and because the ultra-low modulus formulation places minimal stress on the bond line.

Advantages: Pecora 890FTS and Pecora 890FTS-TXTR offers the following features:

- Ability to produce virtually any color in the field through the use of Pecora's universal color pack system and color matching services.
- The option of a smooth (890FTS) or a textured, grout-like appearance (890FTS-TXTR).
- Will not stain natural stone or other porous surfaces.
- Superior adhesion: Will bond tenaciously to most substrates without the need for priming.

- Excellent weatherability: Because of its 100% silicone composition, it is virtually unaffected by UV, precipitation, ozone, and temperature extremes.
- Resilient: Will remain flexible under extreme temperature swings (-60°F to 300°F).

PACKAGING

- 1.5 gallon (5.68 L) units

COLOR

- 890FTS and 890FTS-TXTR are available in 51 standard colors (see 890FTS/890FTS-TXTR color chart for details).
- Unlimited range of custom colors (certain restrictions may apply).

Fax: 215-721-0286
Website: www.pecora.com

3. PRODUCT DESCRIPTION

Pecora 890FTS and Pecora 890FTS-TXTR are field tintable, neutral-curing silicones that will not stain natural stone such as marble and granite, and react with atmospheric moisture to form a durable, flexible building sealant. 890FTS and 890FTS-TXTR both perform exceptionally well under dynamic conditions with 890FTS accommodating long-term movement of +100/-50% and 890FTS-TXTR accommodating long-term movement of +50/-50% in properly designed joints. Harsh weather conditions and extreme temperatures have very little effect on the performance of 890FTS and 890FTS-TXTR even after years of exposure. They are also particularly well suited for use in Exterior Insulation Finish Systems (EIFS) because of their proven

Service temp. range (°F)	-60 to +300	Pecora Corp.
VOC g/L	98	ASTM D-3960

NOTE: 890FTS-TXTR values may differ slightly from that of 890FTS."

Limitations: Pecora 890FTS and Pecora 890FTS-TXTR should not be used in the following applications:

- Sealing horizontal decks, patios, driveway or terrace joints where abrasion or physical abuse is encountered.
- Below grade, submerged joints or below the waterline in marine uses.
- In totally confined or air-free spaces since moisture is necessary for cure.
- In designs that will be painted after the sealant is applied. Apply sealant after painting is completed.
- In structural glazing applications.
- On surfaces with special protective or decorative coatings without prior consultation with Technical Services.
- With building materials that bleed oils, plasticizers or solvents, i.e., impregnated wood, caulks, some vulcanized rubber gaskets or tapes, etc.
- In interior penetration firestop systems.
- On surfaces in direct contact with food, use of Pecora 860 silicone with FDA approval is recommended.

4. TECHNICAL DATA

Applicable Standards: Pecora 890FTS and Pecora 890FTS-TXTR meets or exceeds the requirements of the following industry specifications:

TT-S-230C, Class A; ASTM C920, Class 100, Type S, Grade NS, Use G,A, M, O, and CGSB-19GP-9

Joint Design: Pecora 890FTS and Pecora 890FTS-TXTR Silicone sealant should be no deeper than 3/8" (9 mm) and no less than 1/8" (3 mm). Ideally, ratio of joint width to the sealant depth is 2:1. Joint width should not exceed 1". For joints greater than 1", consult Technical Services. If Pecora 890FTS and Pecora 890FTS-TXTR cannot be installed when the design width is approximately halfway between the dimensional extremes, the designed joint must be at least twice the total anticipated joint movement. Good architectural practice calls for joint design of four times the anticipated movement due to construction tolerances and material variations.

5. INSTALLATION

Surface Preparation: Clean all joints and glazing areas by removing foreign matter and contaminants such as oil, dust, grease, frost, water, surface dirt, old sealants or glazing compounds and any protective coating. Porous substrates and precast concrete panels using form release agents should be cleaned by grinding, saw cutting, blast cleaning (water or sand), mechanical abrading or a combination of these methods which will provide a sound, clean and dry surface for sealant application. Dust, loose particles, etc. should be blown out of joints with oil-free compressed air or vacuum cleaned. Metal, glass and plastic surfaces should be cleaned with solvent procedure or by mechanical means. Soap or detergent and water cleaning treatments are not recommended. Cleaning of all surfaces should be done on the same day the sealant is applied.

Mixing:

- Remove plastic film. In the event skinning developed during storage, remove and discard prior to mixing.
- Pour contents of Pecora universal color pack into pail using a spatula to scrape as much color tint from container as possible.
- For best overall appearance, use the Albion® 381-G01 4 inch mixing paddle or Pecora #2 mixing paddle (or other comparable mixing paddle). Do not over mix.
- Mix for about 1 minute, moving drill throughout material while avoiding contact with pail.
- Scrape any unmixed material from sides and bottom of can with flat-edge spatula or margin trowel.
- Continue mixing for 1-2 minutes or until a uniform color is achieved. Do not exceed 4 minutes total mixing time.
- Use clean bulk caulking gun for sealant application.
- Dry tooling is recommended. If a slicking agent is required, use mineral spirits.

Cleaning: Excess sealant should be removed from all surfaces while still uncured. Cured sealant is very difficult, if not impossible, to remove without altering

or damaging the surface it is adhered to.

CAUTION: Solvents may be toxic and/or flammable. Refer to solvent manufacturer's instructions or Material Safety Data Sheets.

Priming: Pecora 890FTS and Pecora 890FTS-TXTR does not require priming on most common substrates. However, Pecora strongly suggests adhesion pre-testing, either in the field or in Pecora's laboratory, on all porous substrates, particularly brick, as well as unusual building materials and other substrates where special coatings or surface treatments may impair optimum adhesion. Where primer is indicated, P-150 should be used on porous substrates and P-120 on special metal and plastic surfaces. All EIFS substrates require priming with P-150 primer. Contact Technical Services for primer use on other substrates.

Pecora routinely conducts project specific adhesion, compatibility, and staining tests in its laboratory on representative substrate samples. Consult Technical Services for details.

Joint Backing: Backer rod controls the depth of the sealant and allows it to be applied under pressure. Use a size that will compress 25%. Denver Foam® open-cell polyurethane or reticulated (soft) polyethylene rod is recommended. Closed-cell polyethylene may be used but care must be taken not to puncture the rod which can cause outgassing or bubbling/blistering in the sealant. Open-cell polyurethane is required with non-porous substrates to allow proper curing from both sides of the sealant. In joints too shallow for backer rod, use a polyethylene bond-breaker tape to prevent three-sided adhesion. For detailed information on the use of sealant backing materials, consult Pecora Technical Bulletin #105.

Application: All joints should be masked to ensure a neat appearance and prevent sealant applied outside the joint confines from discoloring the substrate.

Storage: 12 months from date of manufacture when stored in original, airtight containers at temperatures below 90°F (32°C).

Precautions: Use in well ventilated

Specification Data Sheet

area or wear an appropriate NIOSH-approved respirator. Contact with uncured sealant or with vapors generated during curing **MAY CAUSE RESPIRATORY TRACT IRRITATION**. Avoid breathing vapor, mist, or dust. Keep container closed when not in use. **MAY CAUSE SKIN AND EYE IRRITATION OR ALLERGIC REACTION**. Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling. **HARMFUL IF SWALLOWED**. Do not taste or swallow.

**FOR PROFESSIONAL USE ONLY.
KEEP OUT OF THE REACH
OF CHILDREN.**

6. AVAILABILITY AND COST

Pecora products are available from stocking distributors nationwide. For the name and telephone number of your nearest representative, call the number below or visit our website at www.pecora.com.

7. WARRANTY

Pecora Corporation warrants its products to be free of defects. Under this warranty, we will provide, at no charge, replacement materials for, or refund the purchase price of, any product proven to be defective when used in strict accordance with our published recommendations and in applications considered by us as suitable for this product. The determination of eligibility for this warranty, or the choice of remedy available under this warranty, shall be made in our sole discretion and any decisions made by Pecora Corporation shall be final. This warranty is in lieu of any and all other warranties, expressed or implied, including but not limited to a warranty of merchantability or fitness for a particular purpose and in no case will Pecora be liable for damages other than those expressly stated in this warranty, including but not limited to incidental or consequential damages.

8. MAINTENANCE

If the sealant is damaged and the bond is intact, cut out the damaged area and re-caulk. No primer is necessary. If the bond has been affected, remove the sealant, clean and repair joint in accordance with instructions under "installation".

9. TECHNICAL SERVICES

Local Pecora representatives are available to assist you in selecting an appropriate product and to provide on-site application instructions, or to conduct job-site inspections. For further information and assistance, please call our Technical Service department at 215-723-6051 or 800-523-6688.

Material Safety Data Sheet

Date last revised May, 2005

Date last revised: May, 2000

I. GENERAL INFORMATION		
Chemical Name & Synonyms SILICONE SEALANT	Trade Name & Synonyms PECORA 890FTS	
Chemical Family POLYDIMETHYLSILOXANE MIXTURE	Formula MIXTURE	
Proper DOT Shipping CALKING COMPOUND	DOT Hazard Classification NONE	
Manufacturer PECORA CORPORATION	Manufacturer's Phone Number 215-723-6051	
Manufacturer's Address 165 Wambold Road, Harleysville, PA 19438	Chemtrec Phone Number 800-424-9300	
II. INGREDIENTS		
Principal Hazardous Components SILICONE DIOXIDE (CAS # 112945-52-5)	Percent 4 - 5 %	Threshold Limit Value (Units) 10 Mg/M ³ DUST
METHYL OXIMINO SILANE (CAS # 34036-80-1)	4 - 5 %	NONE ESTABLISHED
MINERAL SPIRITS (CAS # 64741-41-9)	1 - 3 %	
THIS PRODUCT DOES NOT CONTAIN ANY TOXIC CHEMICALS SUBJECT TO THE REPORTING REQUIREMENTS OF SECTION 313 OF SARA.		
HEALTH 1 FLAMMABILITY 1		REACTIVITY 0
III. PHYSICAL DATA		
Boiling Point (°F) N/A	Specific Gravity (H ₂ O = 1) 1.30	
Vapor Pressure (mm Hg.) UNKNOWN	Percent Volatile by Volume (%) <5%	
Vapor Density (Air = 1) HEAVIER	Evaporation Rate (ETHER= 1) SLOWER	
Solubility in Water INSOLUBLE	pH N/A	
Appearance & Odor SMOOTH PASTE – MILD, SLIGHTLY SOLVENT-LIKE		
IV. FIRE & EXPLOSION HAZARD DATA		
Flash Point (Test Method) > 220° F.	Auto Ignition Temperature	
Flammable Limits UNKNOWN	LEL NOT DETERMINED	UEL NOT DETERMINED
Extinguishing Media : DRY CHEMICAL, WATER SPRAY, FOAM, CARBON DIOXIDE		
Special Fire Fighting Procedures: WEAR SELF-CONTAINED BREATHING APPARATUS WHEN FIGHTING FIRES THAT CONTAIN CHEMICALS.		
Unusual Fire & Explosion Hazards: UNDER FIRE CONDITIONS, IRRITATING OR TOXIC VAPORS MAY BE PRESENT.		

PECORA 890FTS SILICONE		PAGE 2 OF 2	
V. Health Hazard Data			
OSHA Permissible Exposure Limit SEE SECTION II		ACGIH Threshold Limit Value SEE SECTION II	
Carcinogen – NTP Program NO		Carcinogen – IARC Program NO	
Symptoms of Exposure: VAPORS EMITTED AS THE SEALANT CURES MAY IRRITATE THE EYES, NOSE AND THROAT PARTICULARLY IN AN ENCLOSED OR POORLY VENTILATED AREA. DIRECT CONTACT WITH THE UNCURED PRODUCT MAY IRRITATE THE EYES AND MOUTH.			
Medical Conditions Aggravated By Exposure: PRECLUDE FROM EXPOSURE THOSE INDIVIDUALS HAVING A HISTORY OF RESPIRATORY ILLNESS OR PRE-EXISTING EYE OR SKIN CONDITIONS.			
Primary Route (s) of Entry: INHALATION AND SKIN OR EYE CONTACT			
Emergency First Aid: INHALATION: MOVE TO FRESH AIR. IF BREATHING IS DIFFICULT, GIVE OXYGEN. CALL A PHYSICIAN. SKIN: REMOVE UNCURED MATERIAL AND WASH WITH SOAP AND WATER. EYES: FLUSH WITH RUNNING WATER 15 MINUTES. CONSULT A PHYSICIAN. INGESTION: CONSULT A PHYSICIAN IMMEDIATELY.			
VI. REACTIVITY DATA			
Stability	<input type="checkbox"/>	Unstable	Conditions to Avoid
	<input checked="" type="checkbox"/>	Stable	WATER AND HIGH TEMPERATURES
Incompatibility			Materials to Avoid WATER AND STRONG ACID
Hazardous	<input type="checkbox"/>	May Occur	Conditions to Avoid
Polymerization	<input checked="" type="checkbox"/>	Will Not Occur	HIGH HUMIDITY AND HIGH TEMPERATURES
Hazardous Decomposition Products: OXIDES OF CARBON, SILOXANE AND POSSIBLY OTHER FUMES WHICH MAY BE TOXIC.			
VII. ENVIRONMENTAL PROTECTION PROCEDURES			
Spill Response: COVER WITH DRY ABSORBENT MATERIAL SUCH AS SAND OR DIRT. PICK UP AND PLACE IN A CONTAINER FOR DISPOSAL.			
Waste Disposal Method: LAND FILL OR INCINERATE IN ACCORDANCE WITH FEDERAL, STATE OR LOCAL ENVIRONMENTAL CONTROL REGULATIONS.			
VIII. SPECIAL PROTECTION INFORMATION			
Eye Protection NONE NORMALLY REQUIRED		Skin Protection NONE NORMALLY REQUIRED	
Respiratory Protection (Specific Type) ORGANIC VAPOR RESPIRATOR IN CONFINED AREAS		Ventilation Recommended LOCAL VENTILATION	
Other Protection: SAFETY GLASSES FOR OVERHEAD APPLICATIONS			
IX. SPECIAL PRECAUTIONS			
Hygienic Practices In Handling & Storage: TO PROLONG SHELF LIFE, STORE AT TEMPERATURES BELOW 80° F. WASH HANDS AFTER USE. STORE IN DRY AREA FROM HEAT.			
Precautions For Repair & Maintenance of Contaminated Equipment: SEE SECTION V			
Other Precautions:			
KEEP OUT OF REACH OF CHILDREN!!!!			

TECH DATA

Backer Rod Mfg. Inc.

1. PRODUCT NAME

DENVER FOAM®

2. MANUFACTURER

Backer Rod Mfg. Inc.
4244 N. Broadway
Denver, CO 80216
Phone: (800) 595-2950
(303) 308-0363
Fax: (303) 308-0393
Web: www.backerrod.com

3. PRODUCT DESCRIPTION

Basic Use: DENVER FOAM® is a backer rod used as a backing for elastomeric and other applied caulking sealants. DENVER FOAM® controls the depth and amount of sealant required.

DENVER FOAM® also forms the correct hour glass shape of sealant.

Specific Uses: For use in expansion/construction joints in concrete and precast concrete walls, floors, partitions, bridge construction, parking decks, curtain walls, glazing, log home construction, highway construction, and pavement maintenance.

Both hot and cold installations can be installed with DENVER FOAM® backer rod.

Open cell DENVER FOAM® has an advantage allowing air to reach both sides of sealant offering a faster and more uniform cure. This is especially true for one part non-sag sealants. DENVER FOAM® can also be used in floor joints with self-leveling sealants or in traffic areas where additional support is required.

Limitations: Whatever restriction the sealant manufacturer places on their product, the same will apply to DENVER FOAM®.

Composition and Materials: DENVER FOAM® is continuous lengths of flexible, round, fabricated open cell polyurethane. Yellow in color and available in a wide range of diameters.

Packaging: Both mini bags and master bags are compressed into super bundles for economical shipping and storage. Each individual size is color coded for identification.

4. TECHNICAL DATA

DENVER FOAM® is chemically inert and will resist oil, gasoline and most solvents. Material is odorless and will not stain. The open cell construction eliminates the out-gassing and cold flow problem associated with closed cell polyethylene backer rods. Plus sealant has benefits of a two-sided cure.

Physical Properties:

- Density: 1.7 pcf. ASTM D-1622
- Tensile: 25 psi. ASTM D-1623
- Moisture Absorption: .024% by volume. ASTM C-509
- Out Gassing: None
- Temperature Service Range: -60°F to +500°F. ASTM D-5249-95
- Auto Ignition: 700-800°F
- Elongation: 90% ASTM D-3574
- Air Flow: 90%. ASTM D-3574
- Compression Set: less than 5% (after 80% compression for 30 days). ASTM D-3574

5. INSTALLATION

DENVER FOAM® should be installed in expansion/construction joints free from all contaminants, loose materials, and dry and free from frost. Install under 25% compression to offer a good tooling base. Systems can be installed without the fear of out-gassing associated with polyethylene.

6. AVAILABILITY AND COST

DENVER FOAM® is marketed nationally and internationally by our distributors. For name, address, and telephone number of your nearest distributor please contact us at:

Backer Rod Mfg. Inc.

4244 N Broadway
Denver, CO 80216
Phone: (800) 595-2950
(303) 308-0363
Fax: (303) 308-0393
Web: www.backerrod.com

DENVER FOAM® is available in other sizes, shapes, and colors. Please contact Backer Rod Mfg. Inc. for availability on custom made items.

7. WARRANTY

Unless otherwise agreed to in writing, product is sold without warranty. In no case will Backer Rod Mfg. Inc. be liable for incidental or consequential damages on any product.

8. MAINTENANCE

No maintenance is needed.

9. TECHNICAL SERVICES

Contact Backer Rod Mfg. Inc. for technical guidance or special project engineering designs and drawings.
