Newline Stormpack is a break through in latest laminating technology and TPU film performance. Durability, waterproof and moisture permeability are important criteria for our research to find the ultimate conditions for the runners. Newline Stormpack membranes are based on many years experience of developing, manufacturing and supplying membranes for high performance garments.

Built from a 30D/36 F knitted nylon fabric this two-layer waterproof breathable shell with all seams sealed features the weight of a light rain and storm jacket with high durability for runners and bikers. Full waterproof zip. Welded ultra light cuffs and endings gives you 230 grams of the best protection ever made.

Our compact packaging collection is a concept that makes running more convenient and enjoyable. Weight is a primary parameter, and the concept holds some of the lightest products on the market, but still not forgetting the qualities to be windproof, waterproof and breathable. The uniqueness of the concept is the compact solution that makes the products convenient e.g. on longer runs or days with changing weather conditions.

newlinebodywear

Newline introduces a revolutionary new Bodywear as intelligent as it is sporty. Based on human body and physiological function our exclusive Bodywear of 90% Nylon microfiber and 10% 3D Spandex yarns provides a revolutionary concept for a smooth, perfect fit with high acceleration of moisture management you will find only at Newline. Innovative seamless technology – designed mesh panels to enhance ventilation-ergonomic flat lock seaming caresses your body free movement and fits like a natural second skin. Newline Bodywear is designed to have a snug fit, so we recommend you to choose the size that you would normally wear. Will be great under your shirt or jacket for extra performance and accelerate moisture to the whole layer – and next layer.

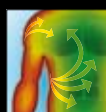

Moisture accelerator.

Rise of body temperature radiates heat and moisture from your skin. Hydrostatic Nylon microfiber distributes and accelerates moisture to the whole Bodywear layer – and to the next layer. Your skin stays dry and comfortable during your exercise.

Sporty second skin

Newest seamless knitting technology – body fit styling – exclusive High Dtex Nylon yarns – creates a Bodywear layer – as a sporty and functional second skin. Nothing less.

Intelligent air circulation

Designed engineered mesh inserts create a cooling effect and airflow circulation – lower the heat reflection and increasing moisture radiation from your skin. Cooling you down.

newlinebodywear dry mesh

is a close to body second skin layer, made of Polypropylene functional yarns – Ultra low moisture absorption for dry skin effect. Bodywear dry mesh creates small “airpockets” between the skin and next layer. Air space body heat storage for thermal effect and increased dry skin effect. You will experience great comfort don’t feel damp or wet. Because of the extremely low absorption, the polypropylene material is natural anti-bacterial.
