EXPLANATION FOR THE BPAF PATIENT CONSULTATION

Adequate means the student functions at an expected level for this stage of medical training. Inadequate means that improvement is necessary.

1. **History:** has collected sufficient history data and interprets correctly.
2. **Physical examination data:** has collected sufficient history data and interprets this information correctly.
3. **Diagnostic tests:** has collected sufficient diagnostic test information and interprets the information correctly.
4. **Formulation of the problem; main issues and side-issues:** understands the problem and knows how to prioritize the information.
5. **Differential diagnosis:** correct and relevant differential diagnosis.
6. **Plan of treatment, prognosis, complications:** adequate plan of treatment and good estimation of the prognosis and possible complications.
7. **Relevant professional knowledge:** shows adequate knowledge for this level of training to manage this patient's care.
8. **Structure of the presentation:** structure (introduction, body, conclusion) and relevant content.
9. **Voice (language, style, diction) and attitude:** correct grammar, little wasting of words, clear voice; natural attitude and movements.
10. **Quality visuals:** clear and appropriate slides, not too many, well legible during presentation.
11. **Pace and time management:** smooth but not too fast, no extension.
