TESTIMONIALS

Ms. Clark is an excellent speaker who presented the info in a clear concise manner without it being overwhelming. I feel that I can leave this course equipped with better skills, assessment tools and tx techniques that will allow me to be a more effective home health therapist." - *Ayana Reid, PT*

Excellent presentation. Evidenced based tools and teaching materials were extremely helpful. Really great program. Much practical information."- *Kay Kelly*

This was an excellent experience which was as worthwhile for our 15 years veteran as it was for the OT with only one year's Home Care experience. I would recommend this program for any Home Care therapist and would anticipate marked improvement in enthusiasm and expertise as a result of attending. -*Sue Rushfirth*

Excellent speaker, very knowledgeable. I would recommend this course to any therapist. The handouts and tools were great. - *Kelly Loescher*

Ms. Clark was very well informed, articulate and gave a broad overview of the multiple facets of home health care. She was approachable and receptive to questions and experiences." - *Beth Wiedower*

COURSE DESCRIPTION

As society ages and medical treatments advance, many older adults are living at home with complex medical problems. Home health care has become more complicated and requires specialized, advanced skills. Do you have the skills to provide your patients with the safest and best possible care? This course is designed to provide physical and occupational therapists with the most up-to-date, evidenced-based techniques for assessment and treatment of the medically complex geriatric home care patient. The course format is lecture with discussion of the most recent Medicare changes, research, tests and tools. Participants will also learn how to access the best current evidence using the internet to make best practice decisions for their patients. Case studies and audiovisuals will be incorporated to facilitate an active learning environment.

COURSE OBJECTIVES

Upon completion of this seminar participants will be able to:

- Accurately assess vital signs, pain, mental status, wounds, heart and lung sounds.
- Identify patients that require emergent and non-emergent referral for medical or allied health assessment.
- Integrate evidenced-based diagnostic tests and screening tools into practice.
- Develop a therapeutic plan of care based on the medical status of the complex home care patient.
- Institute a falls prevention program in their home care agency.
- Understand the effects of common medications used by complex homecare patients.
- Locate the current best evidence for therapeutic assessment and treatment of the geriatric home care patient.
- Understand the latest Medicare home health care regulatory changes.

FACULTY

Suzanne E. Clark, PT, DPT, COS-C has over 20 years experience treating geriatric patients in acute care and rehabilitation hospitals, skilled nursing facilities and home care settings. She has worked exclusively in home health care for the past 15 years and has extensive clinical experience in the assessment and treatment of the medically complex home care patient. She closely follows Medicare regulation changes and currently holds an OASIS Specialist Certificate. Dr. Clark has a special interest in treatment of cardiopulmonary conditions and has developed and presented numerous educational seminars to clinicians and older adults in the community. She is a member of the Geriatric, Cardiopulmonary, Neurology and Home Health sections of the American Physical Therapy Association. Dr. Clark graduated cum laude with a B.S. in physical therapy from Russell Sage College in 1988. She graduated with distinction with a DPT from Simmons College in 2007.
