

## **European School of Interventional Radiology (ESIR) Complex SFA and BTK interventions including challenges in endovascular treatment aspects of Diabetic Foot – Hands-On Course November 8-9, 2010 Crossroads Institute, Diegem, BE**

***Application for CIRSE Members only!***

***Get a 700 EUR refund for travel and hotel expenses for the Hands-On Course in cooperation with the Crossroads Institute.***

Course Convener: M. Sapoval (FR)  
Educational Programme Director: Dr. L. Stockx (BE)

Objective of this course:

- To review the clinical data available on BTK interventions – best clinical practices for treatment of these patients
- To review the various techniques and discuss the advantages and limitations of interventional procedures in treating complex peripheral vascular disease (complex SFA – BTK).
- Overview of advanced SFA/BTK angioplasty/stenting.
- Focus and update on procedure techniques and use of materials.

Requirements for Interventional Radiologists from Europe and the Middle East:

**CIRSE Members only!**

**In order to be eligible for the course you need to be a CIRSE member and fulfill the following criteria:**

- Have performed a minimum of 80 endovascular procedures (iliac & SFA procedures as a primary operator (intermediate level of experience)
- Be familiar with more complex iliac interventions and have good working knowledge of OTW and rapid exchange techniques.
- Work in a department which currently offers extensive PAOD interventional procedures as a treatment to patients (including iliac, SFA and BTK procedures among other interventions) or working in a department starting up such a program within 6 months after the course program (minimum 20 BTK procedures per year)

This initiative is kindly supported by

**Interventional Radiologists interested in attending this course are requested to apply by registering through the CIRSE website ([www.cirse.org](http://www.cirse.org)). We kindly ask you to arrange flight and hotel accommodation by yourself but you will be reimbursed against original invoices afterwards (max. of 700 EUR per person). The course is limited to 12 participants, early application is therefore recommended.**

**Monday, November 8, 2010**

- 13:00-13:15 Welcome & Introduction to Crossroads Institute
- 13:15-13:30 **Introduction to the Advanced Peripheral Interventions course** (*M. Sapoval*)
- 13:30-14:15 **The burden of diabetic foot: why should IR be involved in the clinical pathway for diabetic patients** (*tba*)
- 14:15-15:00 **Results of BTK angioplasty/stent**  
**Update on the literature of angioplasty/stent** (*M. Sapoval*)
- 15:00-16:00 **SFA and BTK: a step by step approach**  
(*M. Sapoval, R. Gandini*)
- 16:00-16:15 Coffee Break
- 16:45-17:15 **BTK : total chronic occlusion (CTO) : insights in material selection** (*R. Gandini, M. Sapoval*)
- 17:15-18:15 **Product overview: how design impacts clinical behaviour, important definitions**  
(*R. Gandini, M. Sapoval*)
- 18:15 Adjourn & Transfer to hotel
- 20:00 Welcome Dinner**

**Tuesday, November 9, 2010**

- 08:30-09:30 **Technique of sub intimal angioplasty including Safari technique** (*R. Gandini*)
- 09:30-12:00 **Hands-on exercise on hybrid flow models** (BTK model) (*Faculty*)
- 12:00-12:45 Lunch
- 12:45-15:15 **Patient case review**  
All participants should prepare a challenging case – either successfully treated, not treated yet, failed
- 15:15-15:45 Conclusions and take away messages, ESIR voluntary test
- 15:45-16:00 Evaluations
- 16:00 Adjourn & Transfer to airport

This initiative is kindly supported by

## LECTURE DETAILS

### Introduction to the Advanced Peripheral Interventions Course

*M. Sapoval (FR)*

#### **The burden of diabetic foot: why should IR be involved in the clinical pathway for diabetic patients** (*tba*)

- The incidence of PAOD in diabetic patients and what it means for our IR practice
- The basics of secondary prevention in CLI with and without diabetes
- The importance of multi-disciplinary approach
  - How to select patients
  - How to succeed
- Overview of clinical results in the literature

#### **SFA and BTK: a step by step approach**

*R. Gandini, M. Sapoval*

- Puncture site (how to choose)
- Alternative puncture site (ant / post tib., politeal)
- Do I need to reopen all 3 vessels?
- How to address medical management (pre, per and post adjunctive medical tt).

#### **BTK: total chronic occlusion (CTO): insights in material selection**

*M. Sapoval, R. Gandini*

- When to go sub intimal versus intraluminal
- How to select the sheath
- How to choose the guidewires
- How to choose the balloon
- Do we need specific recanalisation tools (laser, outback, ..)

#### **Product overview: how design impacts clinical behaviour, important definitions**

*M. Sapoval, R. Gandini*

- Design of wires – penetration power
- Design of balloons – RX versus OTW, semi compliant versus non compliant
- If possible conference call with engineers

## GENERAL INFORMATION

### Venue:

Crossroads Institute  
Park Lane – Culliganlaan 2B  
1831 Diegem  
Belgium  
Homepage: <http://www.crossroads-abbottvascular.com>

### Registration:

Interventional Radiologists interested to attend this course are requested to apply by registering through the CIRSE website ([www.cirse.org](http://www.cirse.org)) or the attached registration form. All applications must include a short CV and motivation letter.

- All applications will be reviewed.
- Once the application has been accepted flight and hotel accommodation have to be arranged by the participant himself and will be reimbursed against original invoices of a maximum of 700 EUR per person.

### CME Accreditation:

ESIR courses are accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. Each medical specialist should claim only those credits that he/she actually spent in the educational activity.

The EACCME is an institution of the European Union of Medical Specialists (UEMS, [www.uems.be](http://www.uems.be)).

Abbott has reserved rooms at the Holiday Inn at favourable rates. In case of approval please get in touch with us for the reference code.

Please tick the appropriate box for the course chosen.

- Complex SFA and BTK interventions including challenges in endovascular treatment aspects of Diabetic Foot - Hands-On Course** **Diegem (BE), November 8-9, 2010**

Please complete legibly and send by email to the CIRSE Central Office.

I need an invitation letter for visa application Date of Birth: .....

Female  Male Prof. / Dr. / Mr. / Mrs. / Ms. (please indicate)

Family Name: ..... First Name: .....

Institution: .....

Street / no: .....

City: ..... Zip Code: ..... Country: .....

Phone: ..... Fax: .....

Email: .....

Please send your **CV** and a **motivation letter** (why you want to attend this course). Travel and hotel will be sponsored by our industry partners (up to 700 EUR). You are kindly asked to submit your documents as soon as possible, as places are limited.

Please tick:

I confirm that I:

- Have performed a minimum of 80 endovascular procedures (iliac & SFA procedures) as a primary operator (intermediate level of experience)  
 Am familiar with more complex iliac interventions and have good working knowledge of OTW and rapid exchange techniques.  
 Work in a department which currently offers extensive PAOD interventional procedures as a treatment to patients (including iliac, SFA and BTK procedures among other interventions) or working in a department starting up such a program within 6 months after the course program (minimum 20 BTK procedures per year)

## Registration Fees (fees refer to one course)

### Early Registration Fees

(until 8 weeks prior to the course date)

- Member EUR 120  
 Resident Member\* EUR 50

### Late Registration Fees

(after 8 weeks prior to the course date)

- Member EUR 220  
 Resident Member\* EUR 80

\*To be accompanied by a confirmation of this status signed by the Head of Department. Please fax the confirmation within 5 days after your registration to +43 (0)1 904 2003 30.
