Design Requirements:

- ▶ Please refer to the City of St. Charles Engineering Design and Inspection Policy Manual and Details for construction and design requirements. It can be found at the following web-address:

<http://www.stcharlesil.gov/departments/PublicWorks/CityEngineeringOffice/policy-manual.html>

Additional Design Requirements:

- ▶ All Concrete Forms must be a minimum of 6-inches in height. (1x6 or 2x6 wood or metal forms are allowed)

- ▶ Temporary Pavement Patch (cold patch is not permitted): Flowable fill placement, if used, should not exceed more than 3-inches below the bottom of the existing pavement. After the flowable fill sets it must be capped with CA-06 stone and existing pavement section must be

matched. The remaining void shall be filled with a temporary concrete patch. A layer of visquene shall be placed in-between the flowable fill and concrete patch to permit removal without disturbance to the flowable fill. The concrete shall be removed and replaced with bituminous material prior to the next May 1st.

- ▶ Curb cuts may be completed by removing the “barrier” portion of the existing curb. Approval of this method will be subject to inspection by the Development Engineering Office and completed at the owner’s risk. Excessive spauling after saw cutting might require removal of the existing curb per the City’s discretion at the applicant’s expense.
- ▶ Any temporary road closures shall be completed with proper traffic control as mandated by Illinois Department of Transportation (IDOT).
- ▶ The contractor shall coordinate all closures with the City of St. Charles Police Department (630-377-4435) and Tri-Com (630-377-9011).
