**ENGLISH DEPARTMENT**

(Current Students Only) (Maximum 15: Minimum 9)

**English 301:** This class includes reading and study of literature as well as written communications and vocabulary. A research project paper is required written in MLA style. (\$125- 1/2 credit) Meets 7:30 am-10:30 am.

**English 302:** This class includes reading and study of literature as well as written communications and vocabulary. A research project paper is required written in MLA style. (\$125- 1/2 credit) Meets 10:35 am-1:35 pm.

**MATH DEPARTMENT**

(Current Students Only) (Maximum 15: Minimum 9)

**Algebra 301:** The class will emphasize applications of equations and linear functions in algebra. This course will prepare students for more advanced topics in algebra. (\$125- 1/2 credit) Meets 10:35 am-1:35 pm.

**Algebra 302:** The class will emphasize applications of polynomials, nonlinear, radical and rational functions in algebra. The class will also cover topics in data analysis. This course will prepare students for more advanced topics in math. (\$125- 1/2 credit) Meets 7:30 am-10:30 am.

**Geometry 301:** This class will emphasize applications of the basic principles of two-dimensional and three-dimensional geometry without reliance on proof. (\$125- 1/2 credit) Meets 7:30 am-10:30 am.

**SCIENCE DEPARTMENT**

(All Students : Minimum of 12 students)

**Physical Science:** This is an activity oriented science class with an emphasis on real-world applications that affect our lives. The main areas of study are physics and chemistry. Topics such as sound, electricity, measurement, matter, magnetism, electricity, motion, energy, heat, light, and machines will be covered. This course makes use of the laboratory to reinforce concepts and develop science reasoning skills and does involve a lot of math. (\$125- 1/2 credit) Meets 7:30 am-10:30 am.

**Earth Science:** Earth science is the study of the physical nature of the Earth and space. The main areas of study are geology, meteorology, and astronomy. Topics such as climate, hazards, Earth cycles, natural resources, plate tectonics, stellar evolution, and interactions within the solar system are covered. The course requires little math, but makes use of the laboratory to reinforce concepts and develop science reasoning skills. (\$125- 1/2 credit) Meets 10:35 am- 1:35 pm.

**2015  
 Summer School  
 Program Information**

**June 8 -July 9  
 7:30 am—10:30 am class  
 5 minute break  
 10:35 am—1:35 pm class**
