Destination Victoria Falls - A natural world wonder

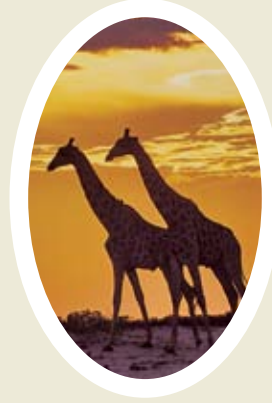

The Victoria Falls are approximately 1690m wide, with an estimated 550 million litres of water per minute cascading over a 111 metre chasm. It must be highlighted that Zimbabwe has 16 out of the 19 prime viewing spots and the 'untamed' rain forest. In 1855 David Livingstone, arguably the first European to see the awesome Falls, remarked "scenes so lovely must have been gazed upon by angels in their flight".
