---	-----------------	------------------------------------

**First Owner**  
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

**Ownership History**  
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

**Lease**  
When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.

**New Owner Reported**  
When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

**Title Issued**  
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

**CARFAX History Impact™**  
Accidents, service records, number of owners and many other history factors can impact a vehicle's value. The CARFAX History Impact is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX impacts the value of a particular vehicle. The vehicle's retail book value plus the CARFAX History Impact will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about

your next used car.

**New Car Test Drive Review**

*NewCar* **TestDrive**.com

**Category:**

Summary:

**Review:**

**These are indeed the ultimate driving machines.**

By Mitch McCullough, Editor-in-Chief, NewCarTestDrive.com

BMW's 3 Series cars offer a truly satisfying driving experience. They offer rear-wheel drive and five-speed gearbox, and BMW's commitment to this combination speaks volumes about its priorities.

Other cars in this price range surpass the 3 Series in significant areas. The Lexus ES 300 is smoother and far quieter, and the Acura TL provides roomier rear seating accommodations and more features for less cash. But those are near-luxury cars, while the BMW is a true sports sedan. If driving satisfaction is top priority, one of the 3 Series models should top your shopping list.

Which model? The 325i sedan is a terrific car and you may never miss the power of the 330i. The sport wagons add space and versatility and the only way we could tell we weren't driving a sedan was to glance into the rear view mirror; it's taut. Coupes add sports appeal with their two-door styling, while split rear seats offer some versatility. The convertible, well, do you have to ask? The 330 models add a lot of performance to the equation. All-wheel drive offers winter capability to a car not noted for that and is equipped with a more sophisticated Dynamic Stability Control system. The M3 is the best high-performance car on the market that isn't a total exotic. Order mine with the Sequential Manual Gearbox.

Concerned about maintenance costs? Free scheduled maintenance for four years or 50,000 miles comes standard with all 2003 BMW 3 Series models.

These BMWs are superb cars and that's why the 3 Series continues to be the benchmark for sports sedans. It's been that way since the late 1970s, and we don't see it changing.

Overview:

This is the benchmark. The BMW 3 Series cars are the aspiration for every automaker building a sports sedan or mid-size luxury sedan.

There's a good reason for that. The 3 Series cars are superb. Whether it's the 325i or the M3, these are terrific driver's cars. Each of them is dynamically outstanding, a highly refined machine that corners, accelerates, and stops swiftly. These cars put drivers in touch with the road instead of isolating them. Driving them is a joy. Their

blend of luxury and sports and their high levels of quality makes living with them joyful as well. Their interiors are well-equipped and comfortable.

Another reason automakers are envious of the 3 Series is that it exemplifies BMW's consistency in product character and value. The 3 Series cars have been the benchmark for quite some time now and we do not see this changing in the near future.

2003 brings only minor changes to the line. Among them: The available BMW Onboard Navigation System has been re-engineered. Sedans add a center rear head restraint as standard equipment. BMW's Full Maintenance Program now covers four years or 50,000 miles, up from 3/36,000 previously.
