diverse vinyl

diverse vinyl is a mail order department of diverse music, an independent record store based in Newport, South Wales. diverse vinyl was set up around April 1995 when it became clear that stores selling LPs in the UK were becoming a rarity and vinyl enthusiasts had nowhere to buy their new LP releases.

From its humble beginnings, diverse vinyl has now become the UK's largest retailer of new LP releases with stock across all genres from around the world. We satisfy vinyl enthusiasts in over 50 countries and have a friendly and very knowledgeable staff on hand to offer service. There's also a monthly newsletter to keep you informed of all the latest vinyl news.

Come and join our campaign and keep vinyl alive!

diverse music

Seen us at shows? Come and visit our shop in Newport, South Wales and browse all of our vinyl stock. All the latest rock and pop new releases, reissues and audiophile stock here under one roof.

LPs that have been stored for some time between plays can be susceptible to static, which attracts dirt particles in the grooves and affects their playback. LPs stored in damp conditions can also attract minute mould particles, which the listener can quite often misinterpret as a defect or a scratch on the LP. Even brand new LPs can contain release agents from a well oiled pressing machine. In order to get the best from your LPs we recommend they be cleaned regularly. Here at Diverse we offer two value for money solutions; one from the budget end of the market and one deluxe mechanical cleaning option.

okki nokki

We've always eschewed the idea of spending upwards of £1,000 on a cleaning machine but the Okki Nokki impressed us and is less than half the price so you have more money to spend on records!

An LP is cleaned horizontally on a turntable platter. A fine cleaning brush distributes the cleaning fluid evenly while the LP rotates. The soiled fluid is sucked away via a vacuum pump arm.

The time it takes to clean each side separately is saved in drying time and there's the convenience of being able to file your clean LPs straight away.

£395 (plus courier)

Additional fluid available at £6.95

The Disco Anti Stat offers one of the most cost effective ways of cleaning an individual record collection and can be used time after time. An LP is submerged vertically into a bath of fluid, containing a fine horse-hair brush. The label is kept dry by the clamp and spindle device. Once cleaned, an LP dries on the supplied rack in minutes.

The set comprises of:

- Disco Anti Stat
- drying rack
- 1 litre of cleaning fluid
- handy funnel and filter (fluid can be reused after filtration)

£45 (plus courier)

Additional fluid available at £17.95 per litre
