## Part II

- Q. 1 Write an essay of 250-300 words on any one of the following topics. (10 Marks)
- the role of DSM V in mental health practices
  - the implication of Clinical Psychology in day to day life

- Q. 2 Read the passage below carefully and answer the questions that follow. (5 Marks)

It is bad to have food stuck between your teeth for long periods of time. This is because food attracts germs, which produce acid that damages your teeth and gums. Flossing helps to remove the food that gets stuck between your teeth. This explains why flossing helps to keep your mouth healthy, but some doctors say that flossing can be also good for your heart.

It may seem strange that something you do for your teeth can have any effect on your heart. Doctors have come up with a few ideas about how flossing works to keep your heart healthy. One idea is that the germs that hurt your teeth can leave the mouth and travel into your blood. Germs that get into the blood can then attack your heart. Another idea is based on the fact that when there are too many germs in your mouth, the body tries to fight against these germs. For some reason, the way the body fights these mouth germs may end up weakening the heart over time.

Not every doctor agrees with these ideas. Some doctors think that the link between good flossing habits and good heart health is only a coincidence. A coincidence is the occurrence of two or more events at one time apparently by mere chance. The incidence of these events is completely random, as they do not admit of any reliable cause and effect relationship between them. For example, every time I wash my car, it rains. This does not mean that when I wash my car, I somehow change the weather. This is only a coincidence. Likewise, some doctors think that people who have bad flossing habits just happen to also have heart problems, and people who have good flossing habits just happen to have healthy hearts.

The theory that flossing your teeth helps to keep your heart healthy might not be true, but every doctor agrees that flossing is a great way to keep your teeth healthy. So even if flossing does not help your heart, it is sure to help your teeth. This is enough of a reason for everyone to floss their teeth every day.

### Questions

- 1) Which of the following would be the best title for this passage?
  - A. why Doctors Disagree about Flossing
  - B. how to Keep Your Teeth Healthy
  - C. flossing Your Way to a Healthy Heart
  - D. flossing by Coincidence
- 2) Flossing effectively helps to keep your mouth healthy by preventing
  - A. germs from producing acid
  - B. food from entering your body
  - C. germs from entering into your blood
  - D. acid from contacting your teeth and gums

- 3) In paragraph 2, the author introduces ideas about how flossing works to keep your heart healthy. Exactly how many of these ideas does the author put forth in this paragraph?
- A. 1
  - B. 2
  - C. 3
  - D. 4
- 4) Based on the information in paragraph 2, it may be understood that germs in the mouth may harm your heart by
- i. getting into the blood that flows to the heart
  - ii. forcing the body to fight against too many of them
  - iii. causing food to get stuck in the arteries
- A. i only
  - B. i and ii only
  - C. ii and iii only
  - D. i, ii, and iii
- 5) In paragraph 2, the author explains how having too many germs in your mouth can “end up weakening the heart.” Using the passage as a guide, it may be understood that with respect to the actual way in which this occurs, doctors are
- A. reluctant to hypothesize
  - B. confident in their estimations
  - C. extremely knowledgeable

## PART II

**Q. 1 Write an essay of 200-250 Words on any one of the following topics. (10 Marks)**

- psychology: the emerging discipline
- the role of emotions in human's life
- mental disorders: Prevention & Response
- the role of religion in preventing from psychological distress

**Q. 2 Read the given paragraphs carefully and encircle the correct answers at the end. (5 Marks)**

Most people can remember a phone number for up to thirty seconds. However, when this short amount of time elapses, the numbers are erased from the memory. How does the information get there in the first place? Information that makes its way to the short term memory (STM) does so via the sensory storage area. The brain has a filter which only allows stimuli that is of immediate interest to pass on to the STM, also known as the working memory.

There is much debate about the capacity and duration of the short term memory. The most accepted theory comes from George A. Miller, a cognitive psychologist, who suggested that humans can remember approximately seven chunks of information. A chunk is defined as a meaningful unit of information, such as a word or name rather than just a letter or number. Modern theorists suggest that one can increase the capacity of the short term memory by chunking, or classifying similar information together. By organizing information, one can optimize the STM, and improve the chances of a memory being passed on to long term storage.

When making a conscious effort to memorize something, such as information for an exam, many people engage in "rote rehearsal". By repeating something over and over again, one is able to keep a memory alive. Unfortunately, this type of memory maintenance only succeeds if there are no interruptions. As soon as a person stops rehearsing the information, it has the tendency to disappear. When a pen and paper are not handy, people often attempt to remember a phone number by repeating it aloud. If the doorbell rings or the dog barks to come in before a person has the opportunity to make a phone call, he will likely forget the number instantly. Therefore, rote rehearsal is not an efficient way to pass information from the short term to long term memory.

A better way is to practice "elaborate rehearsal". This involves assigning semantic meaning to a piece of information so that it can be filed along with other pre-existing long term memories.

Encoding information semantically also makes it more retrievable. Retrieving information can be done by recognition or recall. Humans can easily recall memories that are stored in the long term memory and used often; however, if a memory seems to be forgotten, it may eventually be retrieved by prompting. The more cues a person is given (such as pictures), the more likely a memory can be retrieved. This is why multiple choice tests are often used for subjects that require a lot of memorization.

- Q. 1 According to the passage, how do memories get transferred to the STM?**
- they revert from the long term memory.
  - they are filtered from the sensory storage area.
  - they get chunked when they enter the brain.
  - they enter via the nervous system.
- Q. 2 The word elapses in paragraph 1 is closest in meaning to:**
- passes
  - adds up
  - appears
  - continues
- Q. 3 All of the following are mentioned as places in which memories are stored EXCEPT the:**
- STM
  - long term memory
  - sensory storage area
  - maintenance area
- Q. 4 Why does the author mention a dog's bark?**
- to give an example of a type of memory
  - to provide a type of interruption
  - to prove that dogs have better memories than humans
  - to compare another sound that is loud like a doorbell
- Q. 5 How do theorists believe a person can remember more information in a short time?**
- by organizing it
  - by repeating it
  - by giving it a name
  - by drawing it

**Q. 3 Complete the sentences using the given options. (5 Marks)**

## **SAMPLE TEST PAPER FOR MANAGEMENT/SOCIAL SCIENCES**

1. Write your name, father's name, and Roll No. on top of your answer sheet and rough work sheet.
2. Your undivided attention is required when instructions are being given. Instructions will not be repeated.
3. The test is divided into eight parts. Each part is composed of many short items. You will be given separate instructions for each part.
4. Talking, whispering and glancing around are prohibited. Any evidence of cheating or non-compliance will disqualify the candidate from the test.
5. Do not cross the answer to cancel it. Erase your previous answer clearly and rewrite it. More than one answer will not be considered.
6. You may detach the rough sheet for your convenience but ensure it to return it with the answer sheet.
7. Do not write any thing on the question paper. Write your answers only on the given answer sheet.
8. Answer(s) must be indicated by corresponding answer letter (A.B.C.D) and not by the answer / solution itself.
9. Do not begin to attempt any part of the exam unless you are told to do so.
10. Any violation of the instruction may result in disqualification of the candidate from the test.

### PART-III

(Comprehension)

**Time for  
Reading; 10 minutes  
Answering Questions; 5 minutes**

You must try to retain names, facts, figures and other salient features contained therein. You must not underline or mark the passage, use unfair means, jot down these figures anywhere.

While reading the passage you will not be allowed to refer to the questions, which follow. Similarly while answering the questions you will not be allowed to refer to the original passage.

The passage is spread over two pages. Begin reading the passage only when instructed to do so, stop reading as soon as the instructor tells you to “ stop”. The questions based on the passage are spread over two pages. Five minutes will be allowed to answer the 10 questions. Write your answer on the answer sheet with capital letters preceding your chosen answer.

---

### PART-IV

(Number Series)

**5 Minutes  
15 problems**

This part of the test requires you to study a series of numbers. Work out the pattern, and identify the next number in the series.

**Examples:**

**Possible Answers**

## SAMPLE TEST PAPER FOR MS ENGLISH (LITERATURE)

*Time Allowed: 1½ Hours*

*Max Marks: 50*

### Instructions

- Do not copy the questions on to the answer book.
- Attempt both questions.
- Submit the question paper with the answer book.
- Marks will be awarded for idea, argument, examples, clarity and correct expression.

### Q. 1 Read the passage below and answer the questions that follow.

(1) Cicero said, “A room without a book is a body without a soul.” (2) Certainly when I enter someone’s home for the first time, I am likely to gravitate to the bookshelf, in part to glean further insight into the personality of its owner. (3) Now that the family encyclopedia is likely to have been replaced by a CD-ROM, it is possible that the book might be reduced to an item of decoration rather than information and entertainment.

(4) In a sense, books have always been more than just repositories of information. (5) The look and feel of a book is as much a part of its appeal as its contents. (6) There is something immensely satisfying about opening a new book: the smell of the paper, the feel of the cover, the design on the dust jacket and the weight of the volume all contribute to the impression it makes. (7) The most aesthetically pleasing volumes, the leather bound volumes, and the volumes with beautiful bindings are actually often bought by interior decorators to add to the look of a study, office or of a living room.

(8) Books have a symbolic power. We shudder when we hear of ‘book burning’, associated down the ages with tyranny and oppression. (9) Books as cultural icons remind us of freedom of speech and enhanced opportunities, they remind us of the intellectual aspirations of the human race.

- i. Which is the best version of the underlined portion of sentence 3 (reproduced below)?  
But now that the family encyclopedia is likely to have been replaced by a CD-ROM it is possible that the book might be reduced to an item of decoration rather than information and entertainment.

- A. might be reduced to an item of decoration rather than information

The above is an illustration of test items regarding sentence completion, sentence equivalence, verbal reasoning, sentence correction. Actual test items may be different but they will focus grammar, language ability and stylistic arrangement of sentences. Reading comprehension may also be tested. This portion of the test will be the same for literature and linguistics students. The first question will be of 25 marks.

**Q2.** What are the main features of the English novel of the early twentieth century? Discuss citing examples of popular novels and novelists.

**OR**

The passage below is from Heart of Darkness. It presents Marlow's first impression of the manager of the central station in the Congo. Draw a character sketch of the manager based on Marlow's description.

“My first interview with the manager was curious. He did not ask me to sit down after my twenty-mile walk that morning. He was commonplace in complexion, in features, in manners, and in voice. He was of middle size and of ordinary build. His eyes, of the usual blue, were perhaps remarkably cold, and he certainly could make his glance fall on one as trenchant and heavy as an axe. But even at these times the rest of his person seemed to disclaim the intention. Otherwise, there was only an indefinable, faint expression of his lips, something stealthy- a smile - not a smile-I remember it, but I can't explain. It was unconscious, this smile was, though just after he had said something it got intensified for an instant. ... He had no genius for organizing, for initiative, or for order even. That was evident in such things as the deplorable state of the station. He had no learning, and no intelligence. His position had come to him - why? Perhaps because he was never ill . . .”

- Q) Jill's weight is 500 Newton. If Earth gravitationally collapses from its present radius of 6000 km down to a radius of only 600 km, Jill's weight would then be
- a) 5 Newton.
  - b) unchanged.
  - c) 2000 Newton.
  - d) 5000 Newton.
  - e) 50,000 Newton.
- Q) An astronaut's normal weight is 600 Newton. How much will she weigh while orbiting in a satellite at 12,000 kilometers [two earth radii] above the surface of Earth?
- a) zero
  - b) 67 Newton
  - c) 150 Newton
  - d) 200 Newton
  - e) 300 Newton
- Q) Suppose that Earth suddenly collapsed to one-fourth of its present radius. Compared to your present weight, your weight would then be
- a) 16 times larger.
  - b) 8 times larger.
  - c) 4 times larger.
  - d) unchanged.
  - e) 16 times smaller.
- Q) Suppose you throw an apple horizontally. Neglecting air resistance, just after you release the apple from your hand, the net force on the apple is
- a) zero.
  - b) directed horizontally backward.
  - c) directed horizontally forward.
  - d) directed upward.
  - e) directed downward.
