General information on materials and inputs used by the operation and their compliance with the National List and annotations: **Review Audit - Audit Information** In this section of the checklist, the auditor details audit planning, records collected and reviewed, significant observations, interviews, and audit activities conducted. Review Audit scope, purpose and methodology: Auditor requested and reviewed documents (indicate where obtained): The sections below cover the auditor's review of the operation's Organic System Plan (OSP) and specific practice standards, if applicable, related to onsite observations. "No" answers require explanations. Organic System Plan (7 CFR § 205.201) Is the OSP completed on a certifier-provided template? yes no Does the OSP have an adequate and complete description of practices and procedures to be performed and maintained, including the frequency with which they will be performed? | ves | no Does the OSP have a list of each substance used in the production system, including composition, source, storage, and use, including supportive documentation? yes no Does the OSP have a description of the monitoring practices and procedures to be used for ensuring the plan is implemented? yes no Does the OSP include a description of the recordkeeping system? Does the OSP have a description of management practices or physical barriers to prevent commingling? yes no Does the OSP have additional information required by the certifier? yes When was the last annual update provided to the certifier pursuant to 7 CFR § 205.406(a)?
