Form	700.01										
Uniqu	CONCRETE POUR INSPECTOR'S CHECKLIST		5								
Status	s: Date:	Project No:									
File N	lo: Sub File No:										
Struc	Structure Item:										
Structure Location:											
Inspector:											
A. PL	ANS	Yes	l No	N/A	Date Corrected						
1.	Has inspector reviewed plans and special provisions affecting this concrete pour?	0	0	0							
2.	Does inspector understand plans and special provisions?	0	0	0	'						
3.	Have plans and / or special provisions that affect this pour been changed?			0							
B. FORMS		Yes	No	N/A	Date Corrected						
4.	Are forms in proper location (grade and alignment)?	0	0	0							
5.	Are form dimensions correct?	0	0	0							
6.	Have forms been braced and installed in accordance with any accepted shop plans?	0	0	0							
7.	If SIP forms are utilized, are all tack welds and screws in place as shown on shop plans?	0	0	0							
8.	Is all chamfer in place?	0	0	0							
9.	Have all form cracks been sealed?	0	0	0							
10.	Are forms clean and free of debris (dirt, wood chips, trash, etc.)?	0	0	0							
11.	Has the deck screed been adjusted and have grades been set and checked?	0	0	0							
12.	Has a dry run check of deck screed been made? (Check that old concrete matches new header. Also, check depth of slab to be cast.) Notify Bridge Construction Engineer of all deficiencies over ½ inch.	0	0	0							
13.	Have drains been installed in forms as per plans (size and location)?	0	0	0							

C. REINFORCING STEEL				N/A	Date Corrected
14.	Has reinforcing steel been sampled and approved? (DO NOT allow pour until rebar approval is received.)	0	0	0	
15.	ls all reinforcing steel stored properly (check continuously)?	0	0	0	
16.	ls all rebar clean (free of rust scale, pitting, no cracks in bends, breaks in epoxy or galvanized coatings)?	0	0	0	
17.	Has the rebar been placed as per plans (size and location)?	0	0	0	
18.	ls there proper clearance between rebar and forms?	0	0	0	
19.	Does all rebar meet the specified cover?	0	0	0	
20.	Has rebar been tied and supported (chairs) as per plans?	0	0	0	
21.	Has anchor bolt layout been checked prior to casting concrete cap?	0	0	0	
D. CO	NCRETE	Yes	No	N/A	Date Corrected
22.	Have concrete trucks and plant been approved by Materials Lab within the last 12 months?	0	0		
23.	Have the contract's hot and cold weather concrete batching and placement plans been accepted?	0	0	0	
24.	Are all concrete materials approved (cement, water, additives, fine and coarse aggregates, etc.)?	0	0	0	
	Are there adequate men, equipment, materials and concrete trucks available for pour (a minimum of two vibrators and two deck foggers are required)?	0	0	0	
26.	Are adequate curing and concrete protection materials on hand (wet mats such as burlene, insulated blankets, external heaters with tarps, ice, etc)?	0	0	0	
27.	Does the contractor have materials for emergency bulkheads?	0	0	0	
28.	Has the Materials Lab been notified for record sampling?	0	0	0	
29.	Are slump and air test equipment, test cylinder molds and cylinder curing box available?	0	0	0	
30.	Have slump and air test been performed and have test cylinders been made as required?	0	0	0	
31.	Have all forms been wet down just prior to concrete placement?	0	0	0	
32.	Is the concrete truck mixing within specs (revolutions, air, slump, total water in mix, etc)?	0	0	0	
33.	Is the concrete placed per the specs (no dropping above five feet and no segregation of concrete allowed)?	0	0		
34.	Is the concrete vibrated properly? DO NOT use vibrator to move concrete from one place to another.	0	0		
1 2 6	Has deck screed finished concrete adequately? Burlap drag is highly recommended immediately after screeding. Limit use of bull float. DO NOT SPRINKLE WATER ON DECK!	0	0	0	
36.	Is curing of concrete ASAP? Placement of curing component and fogging of concrete deck should begin immediately after screeding operation.	0	0	0	
27	Has straight edge of sufficient length been used in finishing the ends and edges of deck to ensure the grades and slopes are maintained?	0	0	0
