

# Final Walk-Through Checklist

The final walk-through gives homebuyers an opportunity to **inspect** a property **before** closing on the sale of a property.

During the walk-through, buyers can determine if the repair work they requested in the sales agreement has been completed. They can also **confirm** that the **condition** of the property has not deteriorated since last seen.

Because the walk-through takes place only a few days or even hours before closing, it's easy for excited homebuyers to skip taking another **careful look** at the property. However, being thorough during these final steps can save buyers from unexpected headaches and expense.

**Bring this checklist** and a copy of your sales agreement to the walk-through to keep you on track. Be sure to **discuss** any issues you discover with your agent before closing.

First thing to do when you enter the house is to run the washing machine, dryer and dishwasher thru a short cycle. This way when you are done with all the items on the checklist they should have turned off. Make sure to look for leaks around and below the washers.
