Instructions for: Non-Resident Firearm Declaration Continuation Sheet

- e) For firearms other than revolvers, the barrel length is the distance from the muzzle of the barrel to and including the chamber. See the diagrams below. One way to measure the barrel length of most common long guns is to put your cleaning rod down the barrel with the action closed. Then measure the length of the cleaning rod that fits into the barrel. The barrel length of a revolver does not include the cylinder. Revolver barrel length is measured from the muzzle of the barrel to the breach end immediately in front of the cylinder.

- g) - h) If you are declaring a restricted firearm, please print the number of your Authorization to Transport (ATT) and its expiration date. To find out how to apply for an ATT, call the Canadian Firearms Program at 1 800 731-4000 in Canada and the USA, (506) 624-5380 outside Canada and the USA, or visit [our web site](#) before you come to Canada.

Note: You must not enter Canada with a restricted firearm without an ATT
