

International Association of Electrical Inspectors Missouri - Kansas Chapter of I.A.E.I.

Keystone of the Electrical Industry

A not-for profit and educational organization cooperating in the formulation and uniform application of standards for the safe installation and use of electricity, and collecting and disseminating information relative thereto

Electrical Education Seminar with City of St. Joseph, Missouri

Tuesday, April 24, 2012

Location: Remington Nature Center, 1502 McArthur Drive, Saint Joseph, MO (816) 271-5499
(I-29 to I-229, exit on Highland Avenue (Exit 7). Go west on Highland Avenue., Right on MacArthur Drive.)

Our Tuesday educational program: Mr. Mike Weaver, C&M Enterprises, has graciously offered to present the seminar on

Analysis of Code Changes under the 2011 NEC®

This overview and analysis provides a jumpstart into the more significant changes that impact all electrical work. Over 5,000 proposals and 2,900 public comments, processed by twenty code making panels, have shaped the 2011 NEC® into a code unlike its predecessor. While all of the changes cannot be covered in this training event, this course is intended to provide detail into the more significant changes adopted into the 2011 National Electrical Code NEC®. Specific changes can be addressed which impact a particular state, region, or jurisdiction incorporated into the available training time frame. The accompanying coursework, "Analysis of Changes, 2011 NEC®", published by the International Association of Electrical Inspectors® (IAEI®) provides attendees with "up-close-and-personal" insight and detailed reference into approximately 300 of the more crucial changes to this latest version of the NEC®. While NEC® codebooks may be helpful and always recommended, this course is designed to provide all the necessary information to explain and understand the latest changes without additional materials. The PowerPoint presentation and the coursework provided for this training will ensure maximum exposure to the more significant changes and allow for attendees to reference all of the significant changes (with accurate and authoritative interpretations) easily after the seminar via the detailed coursework published by IAEI®. This course is especially suited for contractors, tradesmen, design professionals and code officials with "need-to-know" regarding revisions to the latest version of the NEC®. Those attendees will be able to recognize and analyze the changes that impact both new and existing electrical installations.

Come listen to **Mike Weaver** and learn on **2011 Analysis of Changes**.

Attendees will receive a complimentary copy of the 2011 Analysis which is a \$65 value.

Save with pre-registration.

About the Speaker

Mike Weaver - Principal of C&M Enterprises and 3 Dog Software in Salina, Kansas. He currently is a licensed master electrician, was President of M&W Electrical Company and has over 30 years of experience in the electrical construction industry. He is an experienced trainer/presenter of the *National Electrical Code®* and Part VIII of the *International Residential Code®*, a recognized presenter by the International Association of Electrical Inspectors, a member of the National Fire Association (NFPA) and the International Association of Electrical Inspectors (IAEI).
